PGP

Welcome to our brand new catalogue!

EVOCHEM S.A. is engaged in the business of production and trade of adhesives, sealants, insulation and waterproofing materials, paints, wood preservatives and protection materials and chemicals for the protection and maintenance of buildings and technical constructions. In addition, the company's range of products include spray paints and technical sprays, cleaners and specialized chemicals.

EVOCHEM S.A. is a private family-owned business committed to continuous development and aims to produce and deliver high quality products and services for its customers and partners, values that establish the modern philosophy of the company. Particular emphasis is placed on the adoption of ecological production methods and the research and development of high value products that are more environmentally and consumer friendly offering the best value for money.

The company invests in the service and satisfaction of its customers, enhancing its presence in Greece and Cyprus and continuously expanding its sales network by exporting its products to more than 10 countries abroad.

EVOCHEM S.A., following to the requirements of the World Market, offers innovative products of outstanding quality for construction professionals as well as for consumers who want professional products for their DIY applications. It also meets the needs of the wood, paper, packaging and assembly industries, offering industrial adhesives and high quality chemicals.

The key to the company's success is its emphasis of the human factor. **EVOCHEM S.A.** invests in improving performance in the working environment, developing and improving processes, facilities, machinery and information systems, making it a safe working environment for its people.

EVOCHEM S.A. is geared towards the development of innovative products and technologies of high energy efficiency, environmentally and user-friendly. With significant sales of adhesives and sealants, spray and coating materials for industrial and construction professionals as well as DIY users, **EVOCHEM S.A.** has established a comprehensive range of new, smarter and more efficient products under its leading brands **MERCOLA, SWAN, MINOS** and **PGP**.

Evochem®

Our leading brands

Since 1958, **MERCOLA** has been present in the field, supported by a broad technological background and a strong customer base, serving the needs of the industrial sector, including the wood and paper industries, the automotive industry and, more generally, the industry with specialized adhesives. Since the mid-1990s, facing the rapid de-industrialization of the country, the strategy has been redefined and an emphasis has been put on the DIY construction and consumer market. In order to achieve this goal, special effort was given to strengthen its presence in the retail market, establishing strong relationships with the market of over 2000 independent shop as well as established retail chains. This customer-centric approach has resulted in the improvement of its existing range of products and the immediate development of new product categories that respond to new market trends.

SWAN colors, known in the market as the "best value-for-money" colors, offer the best quality at extremely competitive prices, making them popular in both the industrial and DIY markets. By avoiding advertising costs, SWAN colors quickly became known by word of mouth, which contributed to the development of the SWAN range of new, specialized and DIY products.

In 1968, the first Greek sprays production company was established, with the historical brand name of the Greek market, **MINOS**. Since then, the name MINOS is synonymous with the spray and the convenience and practicality it offers. MINOS spray, recognizable by both professional and DIY users, relies on their long-lasting success in "exceptional quality with just one pass" and in the wide range of products. In addition to paint spray, the range of MINOS spray is continuously enriched with the development of spray application techniques, offering a range of solutions in cases where any other application method would be impossible.

For 40 years, American-based technology **PGP** products have been produced and distributed in the Greek market. PGP DRYPROOF, as well as the other products that complement the range, are the main source of success. PGP products over the years service successfully the most demanding market for insulation and waterproofing, providing truly reliable solutions to deal with moisture found in constructions. Having as its primary object the development and production of products to combat moisture in underground constructions, PGP broadens its range of products, thus covering all consumer needs.

Our new catalogue is easy to use...

Our new catalogue contains our entire range of building, construction and consumer products. It includes all the information you need to make the decision process easier for you. All sections are colour coded for quick reference. At the end of the list you will find a quick search index of our products in alphabetical order.

More comprehensive...

Our catalogue is renewed and updated every year with new, smarter products to deliver effective solutions, more environmentally and user-friendly, thus expanding your choices. Our catalogue does not include industrial adhesives because they are produced according to the specifications of the customer.

It is a useful tool for your business ...

We hope you find our new catalogue useful and you will be inspired by the range of products it contains. For any queries and orders, our Customer Service Department is at your service.

TEMPO

No1 PVA wood adhesive that dries transparent D2

DESCRIPTION

TEMPO is a waterbased PVAC dispersion wood adhesive formulated for high performance bonding. It offers rapid and high strength bonding as well as temperature and humidity resistance. Dries transparent. It is suitable for indoor applications.

ADVANTAGES

- Excellent bonding strength
- Humidity resistance
- Temperature resistance
- Resistance to ageing
- Dries transparent
- Environmentally friendly

APPLICATIONS

- Bonding of hard and soft wood mitre joints such as beech, oak, pine, walnut, rosewood, etc.
- Bonding of soft wood furniture and wood constructions.
- Bonding of MDF, formica, hardboard, chipboard, veneers.
- Bonding of plasterboard, polystyrene, cork, textiles and other covering materials on chipboard, and MDF.

CONSUMPTION: 150 - 200 gr/m²

14 Wood Adhesives

TEMPO MARINE D4

The new waterbased D4 wood adhesive

DESCRIPTION

TEMPO MARINE D4 is polymer dispersion wood adhesive formulated for high specifications bonding. Offers rapid and high strength bonding as well as excellent resistance to humidity conditions. It is most suitable for outdoor applications. Dries transparent. Complies to specification EN 204/D4.

ADVANTAGES

- One component
- Excellent bonding strength
- Excellent water resistance D4 (waterproof)
- Suitable for exterior use
- Fast bonding
- Temperature resistance
- Resistance to ageing
- Dries transparent
- Environmentally friendly

APPLICATIONS

- It is suitable for exterior timber constructions such as wooden pergolas, door and window wooden frames etc.
- Marine applications
- Bonding of hard and soft wood, MDF, formica, soft- and hardboard, synthetic resin board, chipboard, veneers which are exposed to high humidity and water conditions.
- Bonding of furniture where high resistance to humidity and ageing is required.
- Bonding of other materials on chipboard, wood and board, such as cardboard, paper or textile-backed PVC cloth.

CONSUMPTION: 100 - 200 gr/m²

PU 501 EXPRESS

The strongest D4 polyurethane wood adhesive

DESCRIPTION

PU 501 EXPRESS is a moisture curing, single-component, reactive wood adhesive, based on polyurethane, highly resistant to water and temperature. Provides excellent resistance to humidity, solvents, temperature and withstands rough handling. While curing the adhesive foams up slightly, offering the advantage of fixing possible imperfections. Offers an extra strong bonding and it is suitable for outdoor constructions as well as marine applications. Complies with specifications D4 according to DIN EN 204.

ADVANTAGES

- One component
- Excellent bonding strength
- Excellent water resistance D4 (waterproof)
- Suitable for exterior use
- Fast bonding
- Temperature resistance
- Self-expanding – covers imperfections

APPLICATIONS

- Marine applications
- Bonding of windows and doors, e.g. laminating of windows and joint bonding of doors
- Laminate bonding of wood and wood materials
- Joint bonding for outdoor use
- Joint bonding of MDF boards
- Bonding of mineral building boards
- Bonding of ceramic materials, concrete materials and hard foams including polystyrene

CONSUMPTION: 100 - 150 gr/m²

16 Wood Adhesives

PU 400 MARINE

The new D4 polyurethane wood adhesive

DESCRIPTION

PU 400 MARINE is a moisture curing, single-component, reactive wood adhesive, based on polyurethane, highly resistant to water and temperature. Provides excellent resistance to humidity, solvents, temperature and withstands rough handling. While curing the adhesive foams up slightly, offering the advantage of fixing possible imperfections. Offers an extra strong bonding and it is suitable for outdoor constructions as well as marine applications. Complies with specifications D4 according to DIN EN 204.

ADVANTAGES

TEMPO EXPRESS

No 1 professional choice for hardwood rapid bonding D2

DESCRIPTION

TEMPO EXPRESS is a waterbased PVAC dispersion wood adhesive formulated for high performance bonding. It offers rapid and high strength bonding as well as temperature and humidity resistance. It is specially formulated for hardwood and exotic wood applications. Dries transparent.

ADVANTAGES

- Excellent bonding strength
- Rapid application
- Wide range of bonding applications
- Humidity resistance
- Temperature resistance
- Resistance to ageing
- Dries transparent
- Environmentally friendly

APPLICATIONS

- Bonding of hardwood mitre joints such as beech, oak, walnut etc.
- Bonding of soft wood furniture and wood constructions such as pine, chestnut, birch etc.
- Bonding of MDF, formica, hardboard, chipboard, veneers.
- Bonding of plasterboard, polystyrene, cork, textiles and other covering materials on chipboard, and MDF.

TEMPO WB 500

No 1 professional choice for outdoor applications

DESCRIPTION

TEMPO WB 500 is a waterbased PVA dispersion wood adhesive formulated for high demand bonding. Offers rapid and high strength bonding as well as excellent resistance to humidity conditions. It is very suitable for outdoor applications. Dries transparent. Complies to specification EN 203/D3.

ADVANTAGES

- Excellent bonding strength
- Excellent water resistance D3
- Suitable for exterior use
- Temperature resistance
- Resistance to ageing
- Dries transparent
- Environmentally friendly

APPLICATIONS

- It is suitable for exterior timber constructions such as wooden pergolas, door and window wooden frames etc.
- Bonding of hard and soft wood, MDF, formica, soft- and hardboard, synthetic resin board, chipboard, veneers which are exposed to high humidity conditions.
- Bonding of furniture where high resistance to humidity and ageing are required.
- Bonding of other materials on chipboard, wood and board, such as cardboard, paper or textile-backed PVC cloth.

CONSUMPTION: 150 - 200 gr/m²

18 Wood Adhesives

MINOS WOOD ADHESIVE

PVA wood adhesive that dries transparent D2

DESCRIPTION

MINOS WOOD ADHESIVE is a white waterbased, thixotropic, fast curing wood adhesive based on PVA, which dries transparent. Offers a high strength bond, resistant to heat, aging, vibrations and shocking. Does not stain, it is odorless, and environmentally friendly. Suitable for interior applications.

ADVANTAGES

- Excellent bonding strength
- Humidity resistance
- Temperature resistance
- Resistance to ageing
- Dries transparent
- Environmentally friendly

APPLICATIONS

- Suitable for all wood constructions.
- Bonding of hard and soft wood mitre joints.
- Bonding of MDF, plywood, veneers.
- Bonding plasterboard, polystyrene, cork, cardboard, fabric to chipboard and MDF.

CONSUMPTION: 100 - 150 gr/m²

TEMPO XYLOVIL PRESS

PVA wood adhesive for veneer bonding D2

DESCRIPTION

TEMPO XYLOVIL PRESS is a high quality PVAC dispersion wood adhesive formulated for bonding veneers with the use of cold press. It offers a rapid and high strength bonding as well as temperature and humidity resistance. Dries in a transparent and tough film. It is suitable for indoor applications.

ADVANTAGES

- Excellent bonding strength with the use of cold press
- Humidity and temperature resistance
- Dries transparent
- Prevents bleed - through on open grained and unbacked wood veneers
- Environmentally friendly

APPLICATIONS

- Bonding of veneer sheets, MDF, formica, chipboard.
- Bonding of hard and soft wood such as beech, oak, pine, walnut, rosewood, etc.
- Bonding of plasterboard, polystyrene, cork, textiles and other covering materials on chipboard, and MDF.v
- Can be applied with cold or hot press(20°C - 80°C)

TEMPO GENERAL PURPOSE WOOD & TILE ADHESIVE

General purpose, PVA thixotropic, fast curing adhesive D1

DESCRIPTION

TEMPO GENERAL PURPOSE is a waterbased, general purpose, thixotropic, fast curing adhesive based on PVAC suitable for bonding wood, ceramic tiles and much more. It offers a high strength bond, resistant to heat, aging, vibrations and shock. Does not stain, it is odorless, and friendly to the environment. Suitable for interior applications.

ADVANTAGES

- Suitable for many applications
- Excellent bonding strength
- Rapid application
- Heat resistance
- Moisture resistance
- Resistance to ageing
- Environmentally friendly

APPLICATIONS

- Bonding hard and soft wood such as beech, oak, walnut, pine, chestnut etc.
- Improves bonding as an additive to cement based tile adhesives
- Bonding ceramic tiles on walls, chipboards MDF etc.
- Bonding plasterboard, polystyrene, cork, cardboard, to chipboard and MDF
- Suitable for many construction applications

CONSUMPTION: 150 - 250 gr/m²

20 Wood Adhesives

TEMPO PARQUET

One component PVAC adhesive for wooden flooring D2

DESCRIPTION

TEMPO PARQUET is waterbased, one component PVAC adhesive for wooden flooring. It offers high bonding strength, high yield, moisture and temperature resistance.

ADVANTAGES

- High bonding strength
- High yield
- Excellent moisture and temperature resistance
- Waterbased
- Economic

APPLICATIONS

• Suitable for bonding all types (solid wood, laminate etc.) and size of wooden flooring on most types of substrate such as cement screed, wooden floor, ceramic tiles, marble, mosaic, metallic surfaces etc.

CONSUMPTION: 1 - 3 m²/kg

PACKAGING	ITEMS/ BOX	CODE	PRICE €

TEMPO PU PARQUET 1K ELASTIC

1 component super elastic polyurethane wooden floor adhesive

DESCRIPTION

TEMPO PU PARQUET 1K ELASTIC is a high performance, super elastic, one component polyurethane adhesive for wooden flooring. It is highly suitable for under floor heating systems.

ADVANTAGES

- One component – ready to use
- High bonding strength
- Temperature resistance (-20° C έως +120° C.)
- Excellent humidity and chemical resistance
- Excellent resistance to ageing
- Soundproofing properties
- Highly elastic
- Bonds most sizes and types of wooden flooring

APPLICATIONS

- Suitable for bonding all types (solid wood, laminate etc.) and size of wooden flooring on most types of substrate such as cement screed, wooden floor, ceramic tiles, marble, mosaic, metallic surfaces etc.
- It is most suitable for professional use.
- Suitable for bonding synthetic grass

CONSUMPTION: 1 - 1,5 m²/Kg

DECKMASTER**Single component sealant for decorative decks****DESCRIPTION**

DECKMASTER is a high quality single component sealant, based on special synthetic elastomeric resins, with high adhesive strength, elasticity and excellent resistance in UV rays and seawater. It is suitable for marine applications as well as decorative deck joints.

ADVANTAGES

- Excellent applicability
- High adhesive strength on most surfaces
- Excellent ageing resistance
- Permanent colour – UV resistant
- Excellent resistance to water and moisture exposure
- Permanently elastic after cure
- High temperature stability from -40°C - +150°C

APPLICATIONS

- Sealing teak deck joints on marine decks as well as decorative garden, swimming pool and patio wood deck joints in houses, restaurants, bars and other common areas
- Bonding and sealing constructions

DECOR XYLOFARM AQUA

Waterbased impregnation wood stain varnish based on a new hybrid urethane and acrylic technology

DESCRIPTION

DECOR XYLOFARM AQUA is a waterbased impregnation wood stain varnish based on a new hybrid urethane and acrylic technology. It is environmentally and user friendly. Due to a special formula based on a blend of waxes and new technology special waterbased resins it penetrates deeply into the wood protecting it against common environmental attacks. Contains UV filters for effective protection from exposure to the sun ultraviolet rays. It is water repellent, protects wood from discolouring, blue stains and deterioration. Does not peel, crack or blister (there is no need for sanding) and it is highly elastic. Offers effective protection from all weather conditions and enhances wood's natural beauty. Due to its ingredients, protects the dry film from fungus growth especially in areas exposed to high humidity or/and adverse weather conditions. It is suitable for interior and exterior use. It is available in transparent and many natural shades of wood.

ADVANTAGES

- 2 in 1 product: protects & decorates
- New hybrid technology
- Enriched with a blend of waxes
- Friendly for the environment and the user
- Contains UV filters
- Excellent penetration
- Highly elastic, does not peel, crack or blister
- Resistance to ageing
- Very easy application
- Interior and exterior use

APPLICATIONS

- Total protection and care of new wood constructions such as doors, window frames, ceilings, claddings, fences, roofs, pergolas and any other wooden surface.
- Maintenance of existing wooden surfaces, constructions and furniture.

XYLOFARM PROTECT AQUA

Waterbased transparent wood preservative against wood rotting and blue stain fungi, insects and termites

DESCRIPTION

XYLOFARM PROTECT AQUA is a specially formulated, ready to use, waterbased transparent wood preservative. It protects timber against wood rotting and blue stain fungi, insects and termites. Treated parts must always be protected with a topcoat treatment before they are exposed to the influence of the weather. We recommend impregnation wood stain varnishes DÉCOR XYLOFARM or DÉCOR XYLOFARM AQUA. Instead you can select another topcoat from our full range of topcoat varnishes.

ADVANTAGES

- Long term protection from parasites & insects
- Excellent protection from blue stain & fungi
- Excellent penetration
- Resistance to ageing

APPLICATIONS

- Protection of new wood constructions such as roofs, windows, doors, rafters, beams, fences, pergolas, claddings, etc.
 - Protection of existing wood constructions and furniture.
 - It is suitable for timber out of ground and water contact.
- For infected wood constructions we recommend the use of XYLOFARM AQUA KILLER.

BPR PT8

XYLOFARM PROTECT AQUA complies with: 'EU - BPR Directive, Annex 5, PT8: Wood Preservatives' Registration number: 0101

XYLOFARM EXTRA

Solvent-borne transparent wood preservative against wood rotting and blue stain fungi, insects and termites

DESCRIPTION

XYLOFARM EXTRA is a specially formulated, ready to use, solvent-borne transparent wood preservative. It protects timber against wood rotting and blue stain fungi, insects and termites. Treated parts must always be protected with a topcoat treatment before they are exposed to the influence of the weather. We recommend impregnation wood stain varnishes DÉCOR XYLOFARM or DÉCOR XYLOFARM AQUA. Instead you can select another topcoat from our full range of topcoat varnishes.

ADVANTAGES

- Long term protection from parasites & insects
- Excellent protection from blue stain & fungi
- Excellent penetration

XYLOFARM AQUA KILLER

Microemulsion wood preservative concentrate formulated for the eradication of common wood boring insects and termites

DESCRIPTION

XYLOFARM AQUA KILLER is a microemulsion wood preservative concentrate formulated for the eradication of common wood boring insects and termites. XYLOFARM AQUA KILLER is a curative and preventative treatment for timber and framing lumber. XYLOFARM AQUA KILLER is an innovative formula which contains an active diffuser that allows active ingredients to continue to penetrate inside pieces of wood even after complete evaporation of the water.

ADVANTAGES

- Excellent penetration into timber (in terms of extent and speed)
- Non-flammable
- Extremely low odour
- Effective against all wood boring beetles
- Concentrates and dilutions are water based
- Surfactants used are non-hazardous and biodegradable

APPLICATIONS

XYLOFARM AQUA KILLER has been formulated for the insecticide treatment of timbers, which are affected or could be affected by wood boring insects and termites. Type of wood: All timber framing types (wood under shelter without any humidity risks) or framing lumber (excluding parts in contact with the ground). XYLOFARM AQUA KILLER is a preventive and curative treatment.

DECK OIL & DECK OIL RENOVATOR

Premium protection for teak decks

DESCRIPTION

DECK OIL is the ultimate way to enhance and protect garden and marine teak decks as well as exterior wooden constructions. Based on the traditional Scandinavian formula of linseed, tung and fish oils provides longer lasting protection than traditional Teak Oil. It penetrates deep into the wood to replace natural oils and resins lost through weathering. It has a lightly tinted appearance that brings out the natural colour of the wood and enhances the grain pattern. DECK OIL is a water repellent formulation and contains UV absorbing pigments so decks are protected in all types of weather.

ADVANTAGES

- The ultimate protection for hardwood
- Excellent penetration
- Replaces natural oils
- Water repellent
- Resists cracking or peeling
- Prevents graying and staining of wood
- All weather protection
- Revitalizes weathered wood
- Ensures the longevity of teak and other hardwoods
- Easy application

APPLICATIONS

- DECK OIL is suitable for use on finest quality marine teak decks and wooden parts such as hand and toe rails, cockpit gratings etc.
- Suitable for use on all types of timber decking including boards and tiles.
- It is particularly suitable for hardwood decking (such as teak, iroko and meranti), as well as synthetic decks (WPC).
- It is ideal for reviving the colour of weathered decks.
- It is the ultimate protection of decks in front of the seaside and around swimming pools.
- Regular application will help prevent the wood from greying algae and mould growth and maintain the original colour and appearance.
- Suitable for other types of marine wood decks such as yellow pine, white pine, fir, spruce, and cedar.
- It is also suitable for all outdoor wooden constructions such as flowerbeds, timber frames, fencing, garden sheds etc.

CONSUMPTION: 10 - 14 m²/Lt

TEAK OIL & TEAK OIL RENOVATOR

Protection and maintenance oil for teak wood

DESCRIPTION

The Dutch TEAK OIL, well known for its marine applications, offers outstanding maintenance and protection of hard wood such as teak, mahogany, rosewood etc., which has been exposed to weather or extensive use conditions. The unique blend of oils has a deep penetrating ability into the wood grain. It extends the life of teak and other wood by replacing the natural oils taken away by exposure to weather conditions and sunlight. It offers a clear oiled appearance, enhancing the natural beauty of wood, while preventing graying and staining.

ADVANTAGES

- TEAK OIL is the most friendly and effective protection for hardwood
- Excellent penetration
- Resists cracking or peeling
- Prevents graying and staining
- Restores the original appearance of wood
- Ensures the longevity of teak and other hardwoods
- Easy application

APPLICATIONS

- Marine applications (boat decks etc.).
- Maintenance of garden furniture.
- Maintenance of any kind of unvarnished wooden furniture that has been dried out by central heating and dry atmospheres
- Treatment of any kind of wooden surface with a natural look finish.

CONSUMPTION: 10 - 14m²/Lt

RENOVATOR

TEAK OIL RENOVATOR is available in teak and oakshade to enhance faded and worn wood surfaces.

YACHT VARNISH

Marine grade polyurethane wood varnish

DESCRIPTION

YACHT VARNISH is a marine grade 1 component alkyd polyurethane varnish that provides ultimate long lasting protection of exterior and interior woodwork. It contains UV filters which protect against sunlight. The durable polyurethane based formula provides long term flexibility, ensuring crack, blister and peel resistance that cannot be achieved with an ordinary varnish. Due to its excellent combination of hardness and elasticity it is suitable as a wood floor – parquet varnish.

ADVANTAGES

- Tough durable finish
- Crack, Peel resistant
- UV and salt water resistant
- Long lasting protection
- Clear finish

APPLICATIONS

- Ideal for use on all exterior and interior wood constructions such as doors, window frames, ceilings, claddings, pergolas etc.
- All marine applications
- Interior and exterior wood floors

CONSUMPTION: 6 - 10 m²/Lt .

PARQUET VARNISH AQUA

Waterbased polyurethane varnish suitable for wood parquet floors

DESCRIPTION

PARQUET VARNISH AQUA is a one or two component (with catalyst) waterbased polyurethane varnish suitable for wood parquet flooring. It is odourless, easily applied and cures to a beautiful finish that enhances wood's natural beauty. Does not peel, crack or blister, and it is highly elastic. It contains UV filters for effective protection from exposure to the sun UV rays. It is water repellent, offers effective protection from all weather conditions and enhances the wood's natural beauty. The final finish is water repellent and highly resistant to ageing. The addition of catalyst improves resistance to mechanical stress and chemicals.

ADVANTAGES

- Odourless
- Contains UV filters
- Excellent penetration
- Highly elastic, does not peel, crack or blister
- Resistance to ageing
- Very easy application
- Application as 1 or 2 component

APPLICATIONS

- Ideal for any type of wood flooring: solid wood, engineered wood, non-plastic synthetic.
- Excellent protection of new wood constructions such as doors, window frames, ceilings, claddings, pergolas, and any other wood surface.
- Protection and maintenance of existing wooden surfaces, constructions and furniture

CONSUMPTION: 9-12 m²/Lt

WOOD VARNISH AQUA

Transparent acrylic waterbased wood varnish for interior and exterior use

DESCRIPTION

WOOD VARNISH AQUA is a transparent acrylic waterbased wood varnish for interior and exterior use. It is suitable for all wooden surfaces. It is odourless, easily applied and cures to a beautiful gloss or satin finish that enhances wood's natural beauty. It is highly elastic, does not peel or crack and contains UV filters for effective protection from the sun's ultraviolet rays. The final finish is water repellent and highly resistant to ageing.

ADVANTAGES

- Odourless
- Contains UV filters
- Excellent penetration
- Highly elastic, does not peel, crack or blister
- Resistance to ageing
- Very easy application
- Interior and exterior use

APPLICATIONS

- Protection of all wooden surfaces such as doors, windows, frames, claddings, furniture, cupboards etc.
- Maintenance of existing wooden surfaces, constructions and furniture.

WOOD SEALER & VARNISH

Low build basecoat - varnish for wooden surfaces

DESCRIPTION

WOOD SEALER & VARNISH is a clear - transparent sealer and varnish for wooden surfaces based on acrylic resins. It offers excellent protection from dirt, water, blue stain, rot as well as UV protection. It acts as a moisture barrier layer to prevent peeling and excessive absorption from final coats. It is easily applied, fast drying and offers excellent coverage. It is a true decorative coating enhancing the wood's natural beauty.

ADVANTAGES

- 2 in 1, primer and varnish
- Seals wood grain
- Provides uniform clear finish
- Fast dry formula applies easily
- Excellent protection from water and UV rays

APPLICATIONS

- Excellent decorative protection for wood elements and constructions such as furniture, staircases, doors, windows, wood paneling, handrails etc.
- Very effective sealer for priming wooden parquet floors, claddings and wood decorative elements prior to the final coat (varnish or paint).
- Renovation and improvement of existing wooden constructions and furniture.
- Can be used as a final coat to seal wood surfaces, providing a natural feel.

T-WAX

Protecting clear wax for wooden surfaces based on natural beeswax & carnauba

DESCRIPTION

T-WAX is wood wax treatment with cleaning and nourishing action. The special blend of natural waxes enriched with silicone is excellent for nourishing and cleaning wooden surfaces. It produces a rich, satiny luster. It naturally protects wood and guards against dryness and frequent use.

ADVANTAGES

- Removes finger marks, coffee cup rings etc.
- Protects wood against dryness
- Produces a rich, satiny luster
- Suitable for a variety of surfaces

APPLICATIONS

- Ideal for nourishing unsealed wooden surfaces
- Protects polished woods, lacquered surfaces, plastics, ceramic wall tiles, vinyl upholstery, leather and metal.
- Suitable for most wooden surfaces such as antique furniture, floors, cupboards, doors, woodcarvings, claddings, accessories where a tough protective varnished surface is not required

CONSUMPTION: 50-200 gr/m²

PREMIUM FLOOR VARNISH

2 component acrylic - polyurethane varnish for exterior and interior wood, cement, stone and metallic floors

DESCRIPTION

PREMIUM FLOOR VARNISH is a clear 2 component acrylic - polyurethane varnish that provides ultimate long lasting protection of exterior and interior wood, cement, stone and metallic floors. It contains UV filters which protect against sunlight. The durable polyurethane based formula provides a long lasting finish with excellent mechanical and chemical resistance as well as resistance to pedestrian traffic, humidity and extreme weather conditions. The excellent combination of hardness and elasticity make it the ideal floor varnish.

ADVANTAGES

- Forms an elastic, seamless, transparent protective membrane
- Excellent traffic and wear resistance
- Excellent adhesion properties
- Excellent sun and frost resistance
- In case of mechanical damage, the membrane can be easily repaired locally in minutes

APPLICATIONS

- Ideal for use on all exterior and interior wood parquet floors
- Waterproofing, sealing and protection of cement floors
- Waterproofing, sealing and protection of natural stone floors (for artificial stones a compatibility test is recommended)
- Ideal finish – varnish for metallic floors and surfaces
- Protection and waterproofing of most building surfaces

TEMPO WOOD FILER

Waterbased acrylic wood filler

DESCRIPTION

TEMPO WOOD FILLER is a ready to use, water based dispersion wood filler, suitable for filling nail holes, small cracks and imperfections in timber surfaces prior to finishing. Spreads evenly into cracks and holes without shrinking, crumbling or cracking. In addition, it offers a fast drying time, superior strength and it requires very little sanding to achieve a desired finished look. It can be stained, varnished or painted. It is ideal for professional applications. For interior and exterior use. Available in 17 colours: natural, maple, pine, oregon, oak, beech, walnut, light mahogany, teak, dark walnut, dark mahogany, chestnut, cherry, wenge, white, gray and black.

ADVANTAGES

- Easy to use
- Low odour
- Flexible
- Fast drying
- Easy sanding
- Excellent finish
- Paintable
- Waterbased – environmentally friendly
- Interior & exterior use

APPLICATIONS

- Suitable for filling nail holes, small cracks and imperfections in timber surfaces such as soft and hard wood, MDF, plywood, wood panelling and other woodwork prior to finishing.
- Recommended for furniture, doors, panel walls and ceilings

38 Wood Protection & Treatment

STRIPP & CLEAN

Varnish and paint remover, NEW FORMULA methylene chloride free

DESCRIPTION

STRIPP & CLEAN is a new technology paint & varnish remover. Friendly for the environment and the user its new non methylene chloride formula complies with the European legislation 276/2010/EU. STRIPP & CLEAN with a new double-strength formula is the most safe, fast, and easy way to remove old varnishes, lacquers and paints from most surfaces. STRIPP & CLEAN's thixotropic formulation makes it ideal for both vertical and horizontal surfaces – non drip formula.

ADVANTAGES

- Suitable for all common types of paint and varnish
- Friendly for the environment and the user
- Powerful formula - works in minutes
- Non drip formula
- Easy application

APPLICATIONS

- Removes polyurethane and solvent based varnishes and lacquers from wooden surfaces such as furniture, floors, walls, ceilings, fences, pergolas and all wood constructions. Restores the original wooden surface.
- Removes acrylic and emulsion paints from walls and ceilings.
- Removes enamel paints from metal and wooden surfaces such as furniture, railings, fences etc.
- Suitable for use on wood, metal, walls and ceilings, concrete etc.

CL 38 TEAK CLEANER

Highly effective cleaner for teak and other types of tropical wood

DESCRIPTION

CL 38 TEAK CLEANER is a highly effective cleaner for teak and other types of tropical wood. Its unique concentrated formula enables easy removal of stains and weathering from exposure to environmental attack. Restores the original appearance of wood. Combine CL 38 TEAK CLEANER with TEAK OIL or DECK OIL to preserve and protect the clean surface.

ADVANTAGES

- High performance cleaning agent
- Highly concentrated
- Restores the original appearance of wood
- Suitable for many types of timber

APPLICATIONS

- It is suitable for garden furniture, garden, pool and boat decks
- It is also suitable for any type of unvarnished wood construction such as pergolas, flower pots, fences etc.
- Can be applied on many types of tropical wood such as teak, iroko, bangirai, merbau, meranti as well as other types of exterior wood such as pine, fir, oregon etc.
- Regular application will help prevent the wood from greying and maintain the original colour and appearance.

CONTACT C113

All purpose contact adhesive

DESCRIPTION

CONTACT C113 is a universal contact adhesive based on synthetic rubber, resins and solvents. It has excellent resistance to temperature, humidity, oils and acids.

ADVANTAGES

- Excellent bonding strength to most substrates
- Fast application
- Sufficient open time
- Excellent resistance to ageing
- Excellent temperature resistance (-15°C έως +70°C)
- Interior and exterior use

APPLICATIONS

- Bonds leather, rubber, wood, panels, chipboard, veneers, felt, cork, carton, metals, rigid PVC, plastics, hard and flexible polyurethane to each other as well as to wooden and metallic surfaces, MDF, concrete etc.
- Ideal for applications in construction, shoe and woodworking industries, home repairs, DIY and hobby

CONTACT KLEBOSTIK 44

Extra strong thixotropic contact adhesive for professional use

DESCRIPTION

CONTACT KLEBOSTIK 44 is an extra strong contact adhesive for professional use based on synthetic rubber, resins and solvents. It has excellent resistance to temperature, humidity, oils and acids.

ADVANTAGES

- Excellent bonding strength to most substrates
- Excellent initial grab
- Fast application
- Long open time
- Excellent resistance to ageing
- Excellent temperature resistance (-15°C έως +70°C)
- Suitable for professional use
- Interior and exterior use

APPLICATIONS

- Bonds laminated plastics (Formica, Perstorp, Duropal, Resopal, etc.), wood, veneer, plastic edging strips, chipboard, panels, rubber, leather, carton, hard and flexible polyurethane, felt, cork, fabrics to each other as well as to wooden and metallic surfaces, MDF, concrete etc.

EPOXITE RESIN 95

2 component, extra strong epoxy adhesive

DESCRIPTION

EPOXITE RESIN 95 is a two component, industrial type, epoxy adhesive. It exhibits excellent adhesion strength and high resistance in humidity, solvents and temperature variations. It does not shrink and it is ideal for bonding similar and dissimilar construction and industrial materials.

ADVANTAGES

- Extremely powerful bonding
- Bonds dissimilar materials
- Wide variety of applications
- High humidity resistance
- High temperature resistance
- Excellent resistance to most chemicals
- Paintable
- It does not contain solvents

APPLICATIONS

- Ideal for bonding metals, marble, concrete, ceramics, hard plastics, wood, etc.
- Fills horizontal cracks and small holes on concrete
- Bonds fresh to hardened concrete
- Fixing reinforcement rods into concrete
- Priming and reinforcing concrete surfaces as it is, or diluted with nitro solvent

EPOXITE FIX ALL 30'

2 component, extra strong epoxy adhesive - putty

DESCRIPTION

EPOXITE FIX ALL 30' is an industrial type two component adhesive-putty, which offers great resistance to temperature, humidity and solvents. It is suitable for bonding similar or dissimilar industrial and construction materials. Bonds metal, marble, concrete, ceramics, wood and much more.

ADVANTAGES

- Super strong bonding
- Bonds dissimilar materials
- Wide variety of applications
- High temperature resistance
- Excellent resistance to most chemicals
- Sandable and paintable

APPLICATIONS

- Ideal for bonding metals, marble, concrete, ceramics, hard plastics, wood, etc
- Seals water pipes, water heaters, car radiators, washing machines, etc
- Bonding dissimilar objects for crafting
- Repair-bonding of porcelain & clay objects.

42 Epoxies

EPOXITE RESIN 95 INJECTION

2 component injectable epoxy resin

DESCRIPTION

EPOXITE RESIN 95 INJECTION is a two component injectable epoxy resin suitable for sealing cracks on concrete. Because of its very low viscosity, it can penetrate into very thin cracks. It does not shrink and it is ideal for bonding similar and dissimilar construction and industrial materials. It exhibits very high resistance to friction, ice, acids, alkalis, corrosion, solvents and temperature variations.

ADVANTAGES

- Extremely powerful bonding
- Bonds dissimilar objects
- Very low viscosity for easy penetration
- High resistance to humidity
- High resistance to elevated temperature
- High resistance to several chemicals
- Does not contain solvents
- Transparent when dries

APPLICATIONS

- Repairs cracks and small holes on armed concrete, like foundations, pillars, beams, floors, walls etc
- Bonding fresh to hardened concrete (bonding bridge)
- Waterproofs and seals leaks in pools, water & fuel tanks, recreation vessels, etc.

EPOXITE CONSTRUCT

2 component, extra strong anchoring epoxy adhesive - putty

DESCRIPTION

EPOXITE CONSTRUCT is a two component, industrial type, powerful epoxy adhesive-putty. It exhibits high resistance in humidity, solvents and temperature variations. It does not shrink and it is ideal for bonding similar and dissimilar construction and industrial materials. It is specially recommended for marble.

ADVANTAGES

- Extremely powerful bonding
- Bonds dissimilar materials
- Wide variety of applications
- High humidity resistance
- High temperature resistance
- Excellent resistance to most chemicals
- Paintable
- It does not contain solvents

APPLICATIONS

- Ideal for bonding marble, granite, ceramic tiles, metal, concrete, stone, ceramics, wood, etc.
- Repairs cracks and small holes on concrete
- Bonds fresh to hardened concrete
- Fixing and imbedding steel reinforcement for concrete
- Bonding of reinforcement steel jackets

PLASTIC METAL

2 component polyester putty

DESCRIPTION

PLASTIC METAL is high quality two component polyester putty suitable for filling large imperfections and gaps with one coat application. It gives exceptional adhesion, easy application and sanding. It dries fast, without cracking even in thick layers. It is resistant to water, petrol, alkalic solutions and acids.

ADVANTAGES

- Excellent bonding strength
- Perfect finish
- Easy sanding
- Does not shrink
- Excellent resistance to ageing
- Excellent resistance to water
- Excellent resistance to solvents, alkalis, and acids
- Excellent temperature resistance
- Interior and exterior use

APPLICATIONS

- Ideal for repairs on metallic, wooden, plastic, stone, marble surfaces.
- Automobile, boat, wagon and house repairs.

CONSUMPTION: 1-2 m²/Kg

PLASTIC METAL FINE

2 component polyester putty for thin coat filling - finishing

DESCRIPTION

PLASTIC METAL FINE is a high quality 2 component, white, fine polyester putty suitable for thin coat finishing. It has exceptional adhesion, easy application and sanding. It dries fast, without cracking and provides a smooth, non-porous surface. It is resistant to water, petrol, alkaline solutions and acids.

ADVANTAGES

- Excellent bonding strength
- Perfect finish
- Easy sanding
- Does not shrink
- Excellent resistance to ageing
- Excellent resistance to water
- Excellent resistance to solvents, alkalis, and acids
- Excellent temperature resistance
- Interior and exterior use

APPLICATIONS

- Ideal for repairs on metallic, wooden, plastic, stone, marble surfaces.
- Automobile, boat, wagon and house repairs.

CONSUMPTION: 1-2 m²/Kg

PLASTIC METAL SOFT

2 component polyester putty for filling of cavities

DESCRIPTION

PLASTIC METAL SOFT is a high quality 2 component, white, soft polyester putty suitable for filling of cavities and rusted areas. It has exceptional adhesion and elasticity, easy application and sanding. It dries fast, without cracking and provides a smooth, non-porous surface. It is resistant to water, petrol, alkaline solutions and acids.

ADVANTAGES

- Excellent bonding strength
- Perfect finish
- Easy sanding
- Does not shrink
- Excellent resistance to ageing
- Excellent resistance to water
- Excellent resistance to solvents, alkalis, and acids
- Excellent temperature resistance
- Interior and exterior use

APPLICATIONS

- Ideal for repairs on metallic (bare metal, galvanized, aluminium), wooden, plastic, stone, marble surfaces, plastic bumpers (not PE).
- Automobile, boat, wagon and house repairs.

CONSUMPTION: 1-2 m²/Kg

MULTI FILLER

2 component polyester putty fortified with glass fibers

DESCRIPTION

MULTIFILLER is a high quality two-component polyester putty fortified with glass fibers, suitable for filling holes and large imperfections and gaps with one coat application. It has exceptional adhesion and easy sanding. It dries fast, without cracking even in thick layers. It is resistant to water, petrol, alkalic solutions and acids.

ADVANTAGES

- Excellent bonding strength
- Perfect finish
- Easy sanding
- Does not shrink
- Excellent resistance to ageing
- Excellent resistance to water
- Excellent resistance to solvents, alkalis, and acids
- Excellent temperature resistance
- Interior and exterior use

APPLICATIONS

- Ideal for repairs on metallic, wooden, plastic, stone, marble surfaces.
- Automobile, boat, wagon and house repairs

CATALYSTS

Catalysts for polyester adhesives and fillers

DESCRIPTION

Catalysts for polyester adhesives and fillers.

Red catalyst for **PLASTIC METAL**, **PLASTIC METAL FINE**, **PLASTIC METAL SOFT & MULTIFILLER**.

White catalyst for **MARMOBOND**

MARMOBOND

2 component, knife grade, polyester marble and granite adhesive & putty

DESCRIPTION

MARMOBOND is a specially formulated, high viscosity, knife grade, two component, polyester marble adhesive-putty used to vertically and horizontally bond, grout, repair, rebuild and fill. It does not shrink, cures fast (5-8 min) and shows extremely strong bonding.

ADVANTAGES

- Excellent bonding strength to most building substrates
- Fast application
- Reasonable open time
- Excellent resistance to ageing
- Excellent temperature resistance
- Interior and exterior use

APPLICATIONS

- Suitable for bonding, grouting and filling cavities of white and coloured marble, granite, ceramics, natural and artificial stones on horizontal and vertical building substrates.

CONSUMPTION: 1-2 m²/Kg

CONSTRUCT

Pure unsaturated, pre-accelerated 2 component liquid polyester resin

DESCRIPTION

CONSTRUCT is a two component thixotropic liquid polyester resin suitable for constructions and fabrications. It offers excellent adhesion properties, high strength and elasticity. It is easily applied, dries fast, does not shrink and it is easily sanded. Can be used on its own or with glass fiber mat.

ADVANTAGES

- Excellent bonding strength to most building substrates
- Fast and easy application
- Reasonable open time
- Excellent resistance to ageing
- Excellent temperature resistance
- Interior and exterior use

APPLICATIONS

- Construction and repair of polyester surfaces.
- Construction and repair of boats, tanks and moulds.
- Plastification of wooden boats, canopies and cars
- Waterproofing of tanks, terraces, flowerbeds
- Reinforcement of surfaces

CONSUMPTION: 3 - 6 m²/ Lt

PACKAGING	ITEMS/ BOX	CODE	PRICE €
1 m ²	1	07121	5.00
Length (>10 m ²)	1	07122	3.70

GLASS FABRIC

High quality glass fabric suitable for constructions and repairs

DESCRIPTION

High quality glass fabric suitable for construction and repair of vessels and boats, as well as for the repair of polyester, wood and metallic constructions. It is a special non woven fabric consisting of randomly distributed small glass fibers held together with an emulsion binder forming a continuous flat surface with the form of a mat..

ADVANTAGES

- Isomeric and equally distributed glass fibers, very easy to shape, so that the glass fabric can follow the inclinations and the shape of any surface without leaving empty spaces.
- Easy, efficient and in depth impregnation of the glass fabric with resin MERCOLA CONSTRUCT, thanks to its mat nature.
- The particular orientation of the fibers makes them resistant to forces applied from every direction

APPLICATIONS

- Construction and repair of vessels (boats, inflatables, sailing boats etc).
- Construction of various artefacts, prior to the preparation of the relative mould.
- Structural reinforcement
- Construction of canopies watertanks, storage, etc.

48 Plumbing Materials

PVC ADHESIVE

Thixotropic solvent based PVC, CPVC, UPVC pipe adhesive

DESCRIPTION

PVC ADHESIVE is a thixotropic solvent based adhesive, designed to offer rapid and high strength adhesion to PVC pipes, fittings and accessories from PVC. It is highly resistant to all weather conditions, boiling water and most chemicals. Supplied in a special packaging with a brush for easy application.

ADVANTAGES

- Excellent bonding strength
- Rapid adhesion
- Does not shrink
- Excellent resistance to ageing
- Excellent resistance to boiling and cold water
- Excellent resistance to solvents, alkalis, and acids
- Excellent temperature resistance
- Easy application - supplied with special brush

APPLICATIONS

• It is suitable for bonding PVC pipes for sewer, drain, potable water, pressure, hot water and industrial systems. It is also suitable for bonding fittings and accessories from PVC.

CONSUMPTION: 3-4 m²/ Lt

PVC PRIMER

Primer for preparing PVC pipes prior to bonding

DESCRIPTION

PVC PRIMER is a specially formulated solvent for cleaning and preparing the PVC pipes prior to bonding. It removes grease, oil and dirt. It attacks the PVC surface, allowing a deep penetration of the adhesive which results in a strong permanent joint.

ADVANTAGES

- Degreasing and cleaning
- Deep penetration
- Guarantees perfect bonding
- Fast drying formula

APPLICATIONS

- Degreasing, cleaning and preparing PVC pipes for high strength bonding
- Suitable as a thinner for PVC ADHESIVE
- Release joints of PVC pipes through impregnation of the connection joint

BORAX

Crystalline borium salt, ideal for deoxidation and cleaning metals

DESCRIPTION

BORAX is white crystalline borium salt, ideal for deoxidation and cleaning metals like iron, copper, bronze, lead and zinc.

ADVANTAGES

- Dissolves metallic oxides offering clean surface for welding
- It is necessary for copper – pipe welding
- Acts as a corrosion inhibitor, protecting the sensitive welding points
- Cleans and degreases metallic surfaces
- Reassures excellent and long-lasting weld adhesion

APPLICATIONS

- Reinforces welding using copper or phosphorus rods on copper pipes, bronze pipes and other iron-like metals.
- Acts as a corrosion inhibitor against metal oxidation, reassuring long-lasting protection of the weld.
- When dissolved in water at about 4%, it provides a degreasing solution for metallic surfaces.

PACKAGING	ITEMS/ BOX	CODE	PRICE €
125ml	12	01868	2.15

FLUX

Thixotropic paste used for cleaning and preparing copper pipes prior to welding

DESCRIPTION

FLUX is a thixotropic yellow paste used for cleaning and preparing copper pipes prior to welding. When heated, it releases special chemical cleaners, which clean the copper pipe effectively, reassuring an even distribution of the solder.

ADVANTAGES

- Cleans effectively without scrub.
- Indispensable for copper pipe welding.
- Reassures excellent and long lasting solder adhesion.
- Offered in a convenient package with a brush attached under the lid in order to reassure an even spreading

APPLICATIONS

- Reinforces copper or bronze pipe welding and also other ferrous metals.
- Indispensable for all tin-lead solders.
- Suitable for welding on heating and air conditioning coils, water pipes, etc

SUPER TAPIS

Ready to use thixotropic wallpaper adhesive

DESCRIPTION

SUPER TAPIS is a ready to use mixed paste adhesive, based on a polymer dispersion of PVAC, specially formulated for wallpaper application. It offers extra strong bonding and high performance on many different substrates. It has an excellent temperature and humidity resistance.

ADVANTAGES

- Excellent bonding strength
- Humidity resistance
- Temperature resistance
- Environmentally friendly

APPLICATIONS

- SUPER TAPIS is suitable for bonding plain, plasticized and special types of wallpaper, on various different substrates such as wood, walls, chipboard and hardboard, MDF, formica, metallic surfaces etc
- For a successful bonding it is required the one surface to be porous

CONSUMPTION: 5 - 6 m²/Kg

PACKAGING	ITEMS/BOX	CODE	PRICE €
1Kg	12	01719	8.10
5Kg	4	01715	35.20

GLUE TEX

Wallpaper adhesive

DESCRIPTION

GLUE TEX is a powder-based wallpaper adhesive based on high-quality methylcellulose. It is simply mixed with water. It is suitable for low and medium weight wallpapers. It is ideal for clean and easy roller application directly onto the wall. It is ideal for professional and DIY users.

ADVANTAGES

- Application without splashes and drops
- Ready for use in 5 minutes
- Easy to apply
- Very economical
- High initial bonding combined and easy maneuverability

APPLICATIONS

- Suitable for wallpapers and decorative trims of low and medium weight.

SUPRAFIX SUPER

Extra strong floor covering adhesive

DESCRIPTION

SUPRAFIX SUPER is a solvent free acrylic polymer emulsion adhesive for linoleum and carpet floor-coverings. Dries to a tacky film. Used to reduce the appearance of trowel serrations shadowing through thin plastic flooring. It is suitable for use over normal under-floor heating installations.

ADVANTAGES

- Excellent adhesive strength
- High yield
- Excellent moisture and temperature resistance
- Suitable for under-floor heating
- Very long open time
- Possibility for minor corrections and replacement
- Bonds a wide range of floor coverings
- Friendly for the environment – solvent free

APPLICATIONS

- Suitable for bonding jute-backed or latex foam-backed carpeting, PVC, cork, linoleum, floor coverings to sub-floors of cement, screed, wood, MDF, flooring grade chipboard, plywood, hardboard, metallic surfaces etc.
- Suitable for bonding heavy vinyl and other heavy duty types of wall coverings
- Suitable for bonding synthetic grass

CONSUMPTION: 3 - 4 m²/Kg

**GIVES NEW LIFE
TO WORN
RUGS & CARPETS**

CARPET FIX

Carpet backing repair adhesive

DESCRIPTION

CARPET FIX is a ready to use waterbased acrylic adhesive, suitable for rug and wall to wall carpet backing repair. Provides a new rubbery backing in worn carpets. Offers a great deal of features, such as fray-proofing, stitch locking and yarn reinforcement. Eliminates dust from the worn old substrate. Helps carpets retain their shape. The new backing will prevent sliding.

ADVANTAGES

- Prevents carpet movement and sliding
- Provides waterproof barrier between rug surface and floor
- Extends rug lifetime
- Does not transfer or leave residue on substrate
- Transparent when dry

APPLICATIONS

- CARPET FIX is suitable for repairing worn backing in most machine made carpets and rugs.

CONSUMPTION: 3 - 4 m²/Kg

PL BOOK

Paper and bookbinding PVA adhesive

DESCRIPTION

PL BOOK is a high quality thermoplastic adhesive, based on a water soluble PVAC dispersion, specially formulated for paper and book-binding. When dry it gives a very strong and elastic bond. It has a high viscosity, does not shrink and dries transparent.

ADVANTAGES

- Excellent bonding strength
- Humidity resistance
- Temperature resistance
- Environmentally friendly

APPLICATIONS

- Bookbinding of book's spines, catalogs and journals.
- Assembling of note blocks, ticket blocks etc.
- Carton box assembling and covering
- Starching of fabrics and artificial flowers
- Bonds paper, carton and fabrics

Sealants & Adhesives

BONDFLEX 450 FC MARINE

Marine grade polyurethane sealant and adhesive

DESCRIPTION

BONDFLEX 450 FC MARINE is a high quality, extra strong, one-component, elastic, marine grade polyurethane sealant, suitable for a wide range of sealing and bonding applications in building and shipbuilding industries.

ADVANTAGES

- Excellent adhesion
- Stays elastic after curing
- Excellent resistance to many chemicals
- Excellent resistance to fresh and salt water and alkalis
- Maintains its properties even at low temperatures down to -30°C
- Paintable

APPLICATIONS

- All sealing and bonding applications in the building and metal industry
- Sealing and bonding applications in shipbuilding industry
- Structural bonding in vibrating constructions
- Especially developed for concrete applications
- Suitable for polyester, metals and most plastics
- Sealing of joints in bituminous membranes
- Sealing and bonding applications in automotive industry

BONDFLEX 390 FC

Polyurethane sealant and adhesive

DESCRIPTION

BONDFLEX 390 FC is a high quality, one-component elastic polyurethane sealant and adhesive, suitable for a wide range of sealing and bonding applications in building and shipbuilding industries.

ADVANTAGES

- Excellent adhesion
- Stays elastic after curing
- Excellent resistance against all atmospheric conditions
- Excellent resistance to many chemicals
- Rapid polymerization
- Can be painted

APPLICATIONS

- All sealing and bonding applications in building and metal industries
- Sealing and bonding applications in shipbuilding industry
- Structural bonding in vibrating constructions
- Sealing and bonding applications in automotive industry
- All kinds of structural bonding and sealing applications
- All sealing and bonding applications in building and metal industries

BONDFLEX 290 LM

Very elastic polyurethane sealant and adhesive

DESCRIPTION

BONDFLEX 290LM is a high quality, super elastic, one component, polyurethane sealant for bonding, sealing and filling joints in the building industry.

ADVANTAGES

- Highly elastic
- Excellent adhesion
- Rapid polymerization
- Excellent resistance against all atmospheric conditions
- Can be painted

APPLICATIONS

- Sealing of floor joints and connection joints in building constructions
- All usual building joints with medium to high movement (min. width: 4 mm)
- All sealing and bonding applications in building and metal industries
- Connection joints between window - doorframes and walls
- Sealing joints of bituminous waterproofing membranes

ALL FIX**MS polymer adhesive and sealant****DESCRIPTION**

ALL FIX is a high quality one component adhesive and sealant based on MS-Polymer new advanced technology with high adhesive strength. It is chemically neutral and fully elastic. It is suitable for applications in construction, automotive, marine and aerospace areas where a tough flexible rubber joint or adhesive with powerful bond strength is required.

ADVANTAGES

- Excellent applicability
- High bonding strength and fast cure onto nearly all surfaces
- Primerless adhesion even on damp surfaces
- High performance mechanical properties
- Colour stability and UV resistant
- No staining of highly porous materials such as natural stone, blue stone, marble, granite
- Permanently elastic after curing
- Paintable with most paints
- Ecological advantages -free of isocyanates, solvents, halogens and acids

APPLICATIONS

- Fixing, bonding and assembling constructions
- Sealing and bonding in the building and construction industry
- Sanitary and kitchen areas -resists mould growth
- Structural bonding in vibrating constructions
- Sealing of floor and wall joints
- Sealing and bonding of natural stone (marble, granite etc.)
- Sealing of connection joints in metal constructions
- Mirror bonding, direct application onto the back of the mirror

TOPSIL

Marine grade, elastic joint sealant based on silicones

DESCRIPTION

TOPSIL AQUARIUM is a high-quality 'SNJF' marine grade, elastic one-component joint sealant based on silicones. It is suitable for marine applications and all usual building applications.

ADVANTAGES

- Very easy application
- Colorfast, UV – resistant
- Stays permanently elastic after curing
- Excellent adhesion on most materials
- High mechanical properties
- Very easy application
- Colorfast, UV – resistant
- Temperature resistance -60°C-+200°C

APPLICATIONS

- Top sealing of technical glazing applications
- Bonding and sealing of aquariums
- Flexible bonding and sealing in glazing and metal constructions
- Sealing in cold storage rooms, air condition systems and containers
- Sealing in demanding marine applications

MEGASIL

Professional grade acetic elastic sealant based on silicones with fungicide

DESCRIPTION

MEGASIL is a high quality professional grade, elastic 100% silicone one component joint sealant. It is suitable for all usual building applications

ADVANTAGES

- Stays elastic after curing
- Excellent adhesion properties
- Colourfast
- Fast curing
- Very easy application
- Mildew resistant
- UV resistant

APPLICATIONS

- Building and construction joints
- Glazing
- Sanitary installations
- Sealing in cold storage rooms and containers
- Sealing in air condition systems

MEGASIL BATH & KITCHEN

Acetic elastic sanitary sealant based on silicones with fungicides

DESCRIPTION

MEGASIL BATH & KITCHEN is acetic high-quality, very elastic, one-component joint sealant based on silicones specially formulated for sanitary installations. It is suitable for sealing joints in bathrooms and kitchens where high humidity and mildew resistance is required. It presents excellent adhesion properties on many substrates and UV resistance.

ADVANTAGES

- Stays elastic after curing
- Permanent colors
- Excellent adhesion properties
- UV – resistant
- High mildew resistance
- Very easy application

APPLICATIONS

- Bathroom / kitchen joint sealing
- Sealing joints around bathtubs and showers
- Sealing joints around sinks and worktops
- Sealing joints around washbasins and toilets
- Sealing joints in areas where there is risk of mould growth
- Not suitable for aquarium sealing

60 Sealants & Adhesives

NEUTROSEAL

Neutral, elastic joint sealant based on silicones

DESCRIPTION

NEUTROSEAL is high-quality, neutral, elastic one component joint sealant based on silicones. It is suitable for most usual building surfaces. Contains fungicides.

ADVANTAGES

- Chemically completely neutral (pH=7)
- Stays elastic after curing
- Permanent colors
- Very good adhesion on many materials
- UV – resistant
- Contains fungicides
- Very easy application

APPLICATIONS

- Bathroom / kitchen sealing
- Top sealing at glazing jobs
- Sealing of all the usual building and construction joints
- Sealing of expansion joints between different building materials
- Sealing of polycarbonate and polyacrylate panels
- Sealing between treated wood and glass
- Sealing between PVC and glass
- Sealing of joints in air conditioning systems and cold-storage applications

FIRESEAL 1500°C

Sealing paste, which withstands temperatures of up to 1500°C

DESCRIPTION

FIRESEAL 1500°C is high-quality sealing paste, which cures to form a hard joint which withstands temperatures of up to 1500°C.

ADVANTAGES

- Ready for use
- Does not crumble or crack after hardening
- Heat resistant up to 1500°C
- Free of asbestos

APPLICATIONS

- Sealing of joints and openings at high temperature areas
- Installation of heating systems, furnaces, barbeques, ovens etc
- Suitable for concrete, metal, bricks

GASKET SEAL

Elastic sealant based on silicones which withstands temperatures up to 300°C

DESCRIPTION

GASKET SEAL is a high quality, one component, elastic sealant based on silicones, which withstands temperatures of up to 300°C.

ADVANTAGES

- High temperature resistance up to 285°C intermitted up to 305°C
- Stays permanently elastic after curing
- Very good applicability

APPLICATIONS

- Creation of heat-resistant gaskets
- Sealing between metal parts
- Gaskets in pumps and motors
- Sealing in heating systems
- Sealing in kitchen machinery

MEGACRYL

Professional grade joint sealant based on acrylic dispersion

DESCRIPTION

MEGACRYL is high quality one component flexible acrylic sealant. Seals cracks and joints in interior and exterior applications

ADVANTAGES

- Water resistant after curing
- Colourfast
- Excellent adhesion properties on most porous surfaces
- Paintable after curing
- Waterproof after curing
- Excellent resistance to weather conditions and UV-light
- Very easy application

APPLICATIONS

- Seals cracks and joints at door and window frames, window sills, prefab elements, stairs, skirtings, corrugated roof sheets, chimneys, conduit-pipes and much more.
- Bonds to brick, concrete, plasterwork, wood, glass, ceramic tiles, metals, aluminium, rigid PVC etc.
- Suitable for sealing building and construction joints with movement up to 15%

COLOR WOOD SEALANT

Silicone - free wood joint sealant

DESCRIPTION

COLOR WOOD SEALANT is a solvent and silicone-free joint sealant, suitable for wood, aluminium, metal and many porous building materials. After curing the material is sandable, UV resistant and can be further treated with clear parquet and wood varnishes. It is available in 7 natural wood shades.

ADVANTAGES

- Chemically neutral
- Elastomeric
- Very good adhesion on many porous surfaces, PVC and aluminium
- Sandable
- Over paintable
- Colourfast
- UV resistant
- Water resistant
- Very easy application

APPLICATIONS

- Sealing of joints between masonry and wood
- Sealing joints between skirting boards and parquet or wall
- Sealing of joints in wood, aluminium and metal frames
- Sealing of connection joints and openings between wooden parquet and laminate flooring
- Filling gaps, cracks and imperfections on wooden surfaces and floors

ANCHOR ADHESIVE

2 component fast curing anchoring adhesive

DESCRIPTION

ANCHOR ADHESIVE is a fast curing solvent- and styrene free vinylester resin based 2 part anchoring adhesive (CE OPTION 7).

ADVANTAGES

- Fast curing
- Approved for applications on concrete in dry or wet conditions (CE OPTION 7)
- High load capacity
- Certified for applications with threaded bars class 5.5, class 8.8 and stainless steel, and reinforced bars.
- Approved by DIPT for use with solid and hollow bricks
- Applied with standard guns
- Can be used at high and low temperatures (-40°C - +80°C, non continuous)
- No -sagging even on ceiling applications
- Creates waterproof joints
- Fire resistance certification F120
- Solvent- and styrene free

APPLICATIONS

Anchoring for all grades of:

- Rebars / reinforcing steel
- Threaded rods
- Bolts and special fastening systems

Suitable substrates:

- Concrete
- Hollow and solid masonry
- Hard natural stone
- Solid rock
- Wood

It is advisable to carry out a suitability test prior to any application in terms of the desired bonding strength, and for the prevention of surface staining due to the wide variety of possible substrates, in terms of strength, composition and porosity.

SUPER CONTACT MONTAGE

Solvent based montage adhesive

DESCRIPTION

SUPER CONTACT MONTAGE is a solvent-based, ready to use assembly adhesive, based on neoprene rubber. It replaces the use of nails and screws in many applications.

ADVANTAGES

- Extra strong bonding
- Fast application
- Instant grab
- Bonds on uneven substrates
- Weather and moisture resistant
- Interior and exterior use

APPLICATIONS

- Assembling and fixing in building and renovation projects.
- Suitable for bonding and fixing door signs, profiles, architraves, skirting boards, panels, wooden floor panels, cable ducts, sills, ceramic tiles, bricks, natural and artificial stones, metal, cork etc.
- Bonding chipboard and uPVC panels on brickwork, stone render and concrete

Polyurethane based montage adhesive D4

DESCRIPTION

PU 501 MONTAGE is a high quality, one-component, ready to use, polyurethane-based assembly adhesive. It offers high bonding strength and high water resistance.

ADVANTAGES

- Excellent bonding and mechanical strength
- Fast application
- Self-expanding - Suitable for uneven surfaces
- Waterproof D4 DIN EN 204
- Solvent free

APPLICATIONS

- It is suitable for structural bonding of a wide range of different materials
- Aluminum profile frame corner bonding
- Wooden window - door frames and construction elements
- Garden and house furniture
- Insulation materials (i.e. EPS, XPS etc.)
- Wood, stone, concrete, metal and plastic construction elements
- Structural bonding of steel reinforcing and other construction elements in walls and concrete.
- Wood, stone, concrete, metal and plastic construction elements. Not suitable for PE & PP

68 Sealants & Adhesives

W - FIX MONTAGE

Waterbased montage adhesive

DESCRIPTION

W- FIX MONTAGE is a ready to use waterbased assembly adhesive. It replaces the use of nails and screws in many applications. It is an excellent value for money solution for easy applications.

ADVANTAGES

- Extra strong bonding
- High yield
- Fast application
- Wide range of applications
- Bonds on uneven substrates
- Solvent free – friendly to the environment
- Interior and exterior use

APPLICATIONS

- Assembling and fixing in building and renovation – home improvement projects
- Suitable for bonding and fixing door signs, profiles, architraves, skirting boards, sills, cable ducts, panels, decorative profiles, ceramic tiles, bricks, metals etc.
- Bonds stone, brick, wood, expanded and extruded polystyrene panels, metal, plastics (except PS, PE, PP) and much more

SUPER MIRROR

Mirror adhesive based on MS-polymer

DESCRIPTION

SUPER MIRROR is a high performance, one-component, high bonding strength, mirror adhesive based on M-S Polymer. It is specially formulated for fixing traditional silver backed mirrors directly onto building substrates. It is also suitable for sealing low movement joints in construction, automotive, marine, aerospace industries, where a tough flexible rubber sealant is required.

ADVANTAGES

- High bonding strength on nearly all surfaces
- Excellent adhesion on porous and non-porous substrates
- High performance mechanical properties
- Flexible elastic rubber – movement accommodation up to 20%
- Straightforward application even in adverse conditions
- No bubble formation within sealant (in high temperature and humidity applications)
- Good extrudability even at low temperatures
- UV resistance
- Free of isocyanates, solvents, halogens and acids
- No staining of porous materials such as natural stones, granite, marble, etc
- Very easy to tool and finish

APPLICATIONS

- Fixing mirrors on porous and non-porous building substrates such as ceramic tiles, wood, MDF, concrete, stone, glass, metal and formica. It has been successfully tested on metal surfaces such as steel, brass, galvanized steel and on plastic substrates such as PVC, polystyrene, polycarbonate, ABS, polyamide, polyester (GRP).
- All sealing and bonding applications in the building industry
- Structural bonding in vibrating constructions

SEAL & FIX

All purpose silicone like joint sealant and adhesive

DESCRIPTION

SEAL & FIX is a high quality silicone-like joint sealant adhesive with excellent bonding strength. It is suitable for high demand bonding and sealing applications. SEAL & FIX remains elastic and mechanically stable at low and high temperature conditions. Mildew resistant. Not UV resistant.

ADVANTAGES

- Suitable for bonding and sealing
- Excellent adhesion on most materials
- Mechanically stable
- Elastic
- All purpose
- Easy to use

APPLICATIONS

- Bonds metal, wood, stone, plastics, glass, china, marble and much more
- It is the ideal tool for repairs around the house and DIY applications
- Sanitary installations and glazing on aluminium frames
- Sealing joints, cracks and other construction applications

**SUPER
STRONG**

UNDERBODY SEALANT

Anticorrosive and soundproofing underbody sealant

DESCRIPTION

UNDERBODY SEALANT is an elastic underbody sealer, based on synthetic rubber, suitable for corrosion protection and sound insulation of car bodies. It has effective corrosion inhibitors that protect against road salts. Its rubber texture protects the underbody from stone chipping. The product is elastic between -200°C – $+800^{\circ}\text{C}$. It offers excellent adhesion on metallic and many other surfaces including old underbody sealants. Does not run or spoil.

ADVANTAGES

- Dries fast
- Does not crack
- Does not lose its shape
- Remains permanently elastic
- Dries fast
- Does not crack
- Does not lose its shape
- Remains permanently elastic

APPLICATIONS

- Car underbodies, wings, turrets, side sills
- Car front and rear sills
- Car trunks, door insides etc.
- Any mechanical or steel construction where noise dampening and corrosion protection are required
- Can be overpainted within 10 minutes with fast drying alkyd or acrylic paints when fully dry

PACKAGING	ITEMS/BOX	CODE	PRICE €
Black 1Kg	12	01559	9.35
Black 5Kg	4	01560	35.20

BRUSH SEALANT

Elastomeric thixotropic brush sealant

DESCRIPTION

BRUSH SEALANT is an elastomeric thixotropic brush applied sealant suitable for most types of joints on car bodies, trucks, boats, caravans or prefabricated buildings. It is waterproof, offers anti-vibration protection and has excellent adhesion to most surfaces. Can be overpainted with most types of paints.

ADVANTAGES

- Dries fast
- Does not crack
- Does not lose its shape
- Remains permanently elastic

APPLICATIONS

- Can be applied between metal surfaces prior to bonding, riveting or bolting to absorb cracking noises and vibrations.
- In all types of automotive joints.
- Sealing material between metal surfaces.
- Adhesive for car filters, filters, elastic carpeting and rubber joints.
- Suitable as a waterproofing sealing material

PACKAGING	ITEMS/BOX	CODE	PRICE €
Beige 1 Kg	12	01557	8.25

Polyurethane Foams

MEGAFOAM

Professional grade self expanding, polyurethane foam

DESCRIPTION

MEGAFOAM is high quality, self-expanding, one – component, ready to use polyurethane foam. Contains CFC-free propellants, which are completely harmless to the ozone layer.

ADVANTAGES

- Excellent adhesion on most substrates
- High thermal and sound insulation
- Higher yield - Excellent filling capacities
- Excellent mounting capacities
- Excellent stability (no shrinking or expansion after curing)
- User and environment friendly

APPLICATIONS

- Fixing and sealing of window and doorframes
- Filling of cavities around pipes or other
- Sealing of all openings in roof constructions
- Fixing of insulation materials and roof constructions
- Thermal and sound insulation
- Sealing and filling around pipes and conduits
- Application of a soundproofing layer on motors
- Improving thermal insulation in cooling systems
- Not recommended for applications on Teflon, PE & PP

CONSUMPTION: 750 ml yield up to 45 Lt

PACKAGING	ITEMS/ BOX	CODE	PRICE €

MEGAFOAM LOW EXPANSION

Professional grade low expansion, polyurethane foam

DESCRIPTION

MEGAFOAM LOW EXPANSION is high quality, self-expanding, one – component, ready to use polyurethane foam for professional use. It has a minimal expansion after application (less than 50%) and is therefore very economical to use. It contains CFC-free propellants, which are completely harmless to the ozone layer.

ADVANTAGES

- Low post-expansion
- Excellent adhesion on most substrates
- High thermal and sound insulation
- Higher yield - Excellent filling capacities
- Excellent mounting capacities
- Excellent stability
- User and environment friendly

APPLICATIONS

- Fixing and sealing of window and doorframes
- Filling of cavities around pipes or other
- Sealing of all openings in roof constructions
- Fixing of insulation materials and roof constructions
- Thermal and sound insulation
- Sealing and filling around pipes and conduits
- Application of a soundproofing layer on motors
- Improving thermal insulation in cooling systems

Not recommended for applications on Teflon, PE & PP

PACKAGING	ITEMS/ BOX	CODE	PRICE €
500ml	12	09408	6.50

GUN & FOAM CLEANER

PU foam applicator gun cleaner

DESCRIPTION

GUN & FOAM CLEANER has specially been developed to clean the PU-foam applicator guns. It is used together with MEGAFOAM LOW EXPANSION GUN, MEGAFOAM LOW EXPANSION and MEGAFOAM. A correct cleaning of the gun and proper use of the product will ensure an optimal function and prevent blockage of the applicator gun.

ADVANTAGES

- Guarantees the longevity of the applicator gun
- Cleans spills of uncured foam from surfaces and valves
- Easy and effective application

APPLICATIONS

- PU-foam applicator guns cleaning
- Cleaning of the valve and spray-nozzle of PU-foam canisters
- Removal of uncured foam
- Can be applied on emulsion and acrylic paints after a suitability test.
- Not suitable for expanded or extruded polystyrene, polyethylene and materials affected by strong solvents such as nitro. Not suitable as well for surfaces with low adhesion properties such as EPS & XPS polystyrene

74 Polyurethane Foams

MEGAFOAM LOW EXPANSION GUN

Professional grade low expansion, polyurethane gun foam

DESCRIPTION

MEGAFOAM LOW EXPANSION GUN is high quality, self-expanding, one – component, ready to use polyurethane foam for professional use. It is fitted with a plastic adaptor head for use with a foam applicator gun. It has a minimal expansion after application (less than 50%) and is therefore very economical to use. It contains CFC-free propellants, which are completely harmless to the ozone layer.

ADVANTAGES

- Low post-expansion
- Excellent adhesion on most substrates
- High thermal and sound insulation
- Higher yield - Excellent filling capacities
- Excellent mounting capacities
- Excellent stability
- User and environment friendly

APPLICATIONS

- Fixing and sealing of window and doorframes
 - Filling of cavities around pipes or other
 - Sealing of all openings in roof constructions
 - Fixing of insulation materials and roof constructions
 - Thermal and sound insulation
 - Sealing and filling around pipes and conduits
 - Application of a soundproofing layer on motors
 - Improving thermal insulation in cooling systems
- Not recommended for applications on Teflon, PE & PP

Insulation & Waterproofing

PU FLEX 1000

Premium grade, liquid-applied, polyurethane roof insulation material

DESCRIPTION

PU FLEX 1000 is one component liquid-applied, permanently highly elastic, polyurethane membrane used for long-lasting waterproofing. Due to the polyurethane technology, it offers the solution to sealing problems where other methods fail, such as on surfaces with standing water and ice. Cures by reaction with atmospheric moisture.

ADVANTAGES

- Life time up to 25 years
- Simple application (1 component – ready to use)
- Forms a walkable uniform seamless membrane
- Resistant to water
- Resistant to frost
- Maintains its mechanical properties over a temperature range of -30°C to +90°C
- Crack-bridging up to 2mm
- Excellent UV resistance
- Water vapour permeability
- The waterproofed surface can be walked on
- Defects can be easily repaired locally within minutes
- Highly cost effective

APPLICATIONS

- Waterproofing of roofs, balconies and terraces
- Waterproofing of wet areas (under-tile) in bathrooms, balconies, kitchens, etc
- Protection of polyurethane foam insulation and alternative insulation panels
- Waterproofing of flowerbeds and foundations
- Waterproofing and protection of concrete constructions like bridge-decks, tunnels, etc.

CONSUMPTION: 1,3 - 1,8 Kg/m² for 2 coat application

ISOCRYL PREMIUM HYBRID

Premium grade, liquid-applied, hybrid polyurethane - acrylic, roof insulation material

DESCRIPTION

ISOCRYL PREMIUM is a one component, premium grade, high performance liquid-applied, hybrid waterproofing membrane based on polyurethane and synthetic acrylic resins. It is suitable for waterproofing old and new building surfaces. It forms an elastic seamless vapor permeable membrane without joints with excellent resistance to humidity, weather conditions as well as high temperatures and UV rays. Due to the innovative hybrid PU-ACRYL technology ISOCRYL PREMIUM is the most suitable material for high demand applications with long lasting results.

ADVANTAGES

- 10 years application guarantee – polyurethane technology
- Elastic, seamless, vapor permeable membrane without joints
- Excellent elasticity up to 400% and ability to follow substrate expansion
- Highly reflective to sun UV rays offering thermo insulation advantages
- Superior adhesion on most building surfaces
- Maintains its mechanical properties over a temperature span of -15°C to +70°C
- Excellent resistance to water & ageing
- Bridges small joints – gaps
- The waterproofed surface can be walked on
- User and environmentally friendly - waterbased
- Easy to apply (one component – ready to use material)

APPLICATIONS

- Waterproofing of rooftops and terraces
- Waterproofing of gutters, domes, cornices, ondulated panels, flowerbeds, planter boxes etc
- Waterproofing bitumen and polyurethane hard foam surfaces
- Suitable for concrete surfaces, bitumen material, wood, stone, brickwork, PVC, polyurethane foam, plaster, plasterboard, metal etc..

CONSUMPTION: 0,8 - 1,2 Lt/m² for 2 coat application

ISOCRYL

Premium grade, liquid-applied, acrylic roof insulation material

DESCRIPTION

ISOCRYL is a one component, high performance liquid-applied, pure acrylic, waterproofing material with a new fiber reinforced formulation for extra durability. Presents excellent resistance to weather conditions. It is suitable for weatherproofing old and new building surfaces. Forms an elastic seamless vapor permeable membrane without joints with excellent resistance to humidity as well as high temperatures and UV rays.

ADVANTAGES

- Elastic, seamless, vapor permeable membrane without joints
- Excellent elasticity up to 400% and ability to follow substrate expansion
- Fiber reinforced
- Highly reflective to sun UV rays offering thermo insulation advantages
- Superior adhesion on most building surfaces
- Maintains its mechanical properties over a temperature span of -15°C to +70°C
- Excellent resistance to water & ageing
- Bridges small joints – gaps
- The waterproofed surface can be walked on
- User and environmentally friendly - waterbased
- Easy to apply (one component – ready to use material)

APPLICATIONS

- Waterproofing of rooftops and terraces
- Waterproofing of gutters, domes, cornices, ondulated panels, flowerbeds, planter boxes etc
- Waterproofing bitumen and polyurethane hard foam surfaces
- Suitable for concrete surfaces, bitumen material, wood, stone, brickwork, PVC, polyurethane foam, plaster, plasterboard, metal etc

ISOCRYL REPAIR WET APPLY

Immediate waterproofer for wet & dry surfaces

DESCRIPTION

ISOCRYL REPAIR WET APPLY is a high performance flexible waterproofing paste that offers immediate waterproofing on most conventional substrates. Based on a solvent pure acrylic fiber reinforced thixotropic formula, it offers an easy both brush or spatula applied solution for emergency roof repairs or general maintenance. Can be applied in damp conditions, even in ponding water and presents exceptional weather resistance

ADVANTAGES

- 1 coat application
- No primer required in most circumstances
- Can be applied in damp conditions, during rainfall
- Flexible, strong adhesion
- Immediate waterproofing
- Ideal for areas subject to ponding
- Exceptional weather resistance
- Maintains its mechanical properties over a temperature span of -15°C to +70°C
- Labour and time saving

APPLICATIONS

- Waterproofing of difficult spots on roofs such as corners, joints, metallic bases and supports, chimney stacks, cracks and other defective areas.
- Waterproofing gutters and roof flashings.
- It is suitable for most building substrates such as concrete, asphalt, bituminous roof coatings, cement, wood, stone, ceramic tiles, brickwork, metal, rigid PVC, cement board, plaster, polyurethane foam, glass and many other surface materials.
- ISOCRYL REPAIR WET APPLY is suitable for non-walkable areas. If the material is applied on walkable terraces, then a protective material must be used such as promenade tiles

Can be applied on wet surfaces

PACKAGING	ITEMS/BOX	CODE	PRICE €
White 750ml	12	5179	7.90
Ceramic red 750ml	12	5181	7.90

ISOCRYL REPAIR

Thixotropic fiber reinforced repair waterproofer

DESCRIPTION

ISOCRYL REPAIR is a high performance 1 component flexible, thixotropic, fiber reinforced roof coating based on pure acrylic resins with excellent weather resistance properties. It is specially designed to solve waterproofing problems in difficult areas such as corners, ceramic roof tiles, metallic bases and supports and any other area where an insulation membrane is difficult to apply and a rich thixotropic material to cover defective spots and cracks is required.

ADVANTAGES

- Thixotropic elastic formula that does not crack
- Enriched with fibers, glass beads and micro- sphere additives
- Rich material for easy application in difficult areas
- Excellent elasticity and bonding
- Superior adhesion on most building surfaces
- Excellent resistance to water and humidity
- Maintains its mechanical properties over a temperature span of -15°C to +70°C
- Excellent resistance to ageing and UV rays
- User and environmentally friendly - waterbased
- Easy to apply

APPLICATIONS

- Particularly suitable for sealing and fixing deteriorated and loose roof tiles.
- Waterproofing of difficult spots on roofs such as corners, metallic bases and supports, cracks, joints etc.
- Suitable for usual building surfaces, cementitious surfaces, bituminous materials, wood, stone, bricks, PVC, polyurethane foam, plasterboard, plaster, metal surfaces etc.

SWAN MONOPAL

Premium grade, liquid-applied, acrylic roof insulation material

DESCRIPTION

SWAN MONOPAL is a one component, high performance liquid-applied, pure acrylic, waterproofing material with excellent resistance to weather conditions. It is suitable for weatherproofing old and new building surfaces. Forms an elastic seamless vapor permeable membrane without joints with excellent resistance to humidity as well as high temperatures and UV rays.

ADVANTAGES

- Elastic, seamless, vapor permeable and reflective membrane without joints
- Excellent elasticity
- Superior adhesion on most building surfaces
- Excellent water/humidity resistance
- Excellent resistance to ageing and UV rays
- User and environmentally friendly - waterbased
- Easy to apply (one component – ready to use material)

APPLICATIONS

- Waterproofing of rooftops and terraces
- Waterproofing of gutters, domes, cornices, undulated panels etc
- Waterproofing bitumen and polyurethane hard foam surfaces
- Suitable for concrete surfaces, bitumen material, wood, stone, brickwork, PVC, polyurethane foam, plaster, metal etc.

PGP DRYPROOF ELASTIC

Liquid-applied, acrylic roof insulation material

DESCRIPTION

PGP DRYPROOF ELASTIC is a one component, liquid-applied, pure acrylic, waterproofing material with excellent resistance to weather conditions. It is suitable for weatherproofing old and new building surfaces. Forms an elastic seamless vapor permeable membrane without joints with excellent resistance to moisture as well as high temperatures and UV rays.

ADVANTAGES

- Elastic, seamless, vapor permeable membrane without joints
- Excellent elasticity
- Highly reflective to sun UV rays offering thermo insulation advantages
- Superior adhesion on most building surfaces
- Excellent resistance to water & ageing
- Bridges small joints – gaps
- The waterproofed surface can be walked on
- User and environmentally friendly - waterbased
- Easy to apply (one component – ready to use material)

APPLICATIONS

- Waterproofing of rooftops and terraces
- Waterproofing of gutters, domes, cornices, ondulated panels, flowerbeds, planter boxes etc.
- Waterproofing bitumen and polyurethane hard foam surfaces
- Suitable for concrete surfaces, bitumen material, wood, stone, brickwork, PVC, polyurethane foam, plaster, plasterboard, metal etc

PGP DRYPROOF FIBRATED ELASTIC

Liquid-applied, waterproofing material based on acrylic resins and special natural thermo insulating fibers

DESCRIPTION

PGP DRYPROOF FIBRATED ELASTIC is a one component, liquid-applied, waterproofing material based on acrylic resins and special natural thermo insulating fibers. Provides excellent resistance to weather conditions as well as thermo insulating properties. It is suitable for weatherproofing old and new building surfaces. Forms an elastic seamless vapor permeable membrane without joints with excellent resistance to moisture as well as high temperatures and UV rays.

ADVANTAGES

- Elastic, seamless, vapor permeable membrane without joints
- Excellent elasticity
- Thermo insulating properties
- Highly reflective to sun UV rays offering thermo insulation advantages
- Superior adhesion on most building surfaces
- Maintains its mechanical properties over a temperature span of -20°C to +70°C
- Excellent resistance to water & ageing
- Bridges small joints – gaps
- The waterproofed surface can be walked on
- User and environmentally friendly - waterbased

APPLICATIONS

- Waterproofing of rooftops and terraces
- Suitable for concrete surfaces, bitumen material, wood, stone, brickwork, PVC, polyurethane foam, plaster, plasterboard, metal etc

CONSUMPTION: 1 - 2 m²/Lt

WALL ISOCRYL ELASTIC**Highly elastic pure acrylic wall and facade insulation paint****DESCRIPTION**

WALL ISOCRYL is a high quality elastic, waterbased, waterproofing paint based on pure acrylic resins, with excellent properties against all weather conditions. It is suitable for waterproofing old and new walls and facades. It forms an elastic membrane that protects the surface from humidity as well as high temperatures.

ADVANTAGES

- Weatherproofing exterior walls and surfaces
- Elastic, seamless membrane without joints
- Superior adhesion on most building surfaces
- Excellent coverage
- Excellent water/humidity resistance
- Vapour permeability, permitting structure breathing
- Protects surfaces from carbonization and chalking
- Excellent resistance to ageing and UV rays
- Most suitable for buildings close to the seaside
- May be tinted with most common tinting systems
- Waterbased - user and environmentally friendly – inflammable – easy clean

APPLICATIONS

- Waterproofing old and new walls and facades
- Waterproofing and protection from UV rays of bitumen and polyurethane hard foam surfaces
- Suitable for concrete surfaces, plaster, wood, stone, brickwork, gypsum boards, cement boards, bituminous materials polyurethane etc

CONSUMPTION: 10-12 m²/Lt

PGP[®]

DRYPROOF

MASONRY WATERPROOFER

100%
PROTECTION FROM HUMIDITY
ALKALIS & MOULD

**THE ONLY
AUTHENTIC PROTECTION
FOR NEGATIVE
WATER PRESSURE**

PGP DRYPROOF MASONRY WATERPROOFER

Highly effective ready to use cement fortified waterproofing paint for masonry walls with excellent waterproofing properties even when negative hydrostatic pressure is present

DESCRIPTION

PGP DRYPROOF MASONRY WATERPROOFER is a highly effective ready to use waterproofing paint for masonry walls. Based on a unique solvent based combination of portland cement and acrylic copolymer resins, exhibits excellent waterproofing properties even when negative hydrostatic pressure is present. It is suitable for interior and exterior use. It is the only waterproofing product offering a twin anchoring mechanism, even on wet surfaces, providing unsurpassed reliability.

ADVANTAGES

- 5 years guarantee for negative water pressure and up to 20 years for positive*.
 - Withstands negative hydrostatic pressure for up to 7 meters of water (10 psi.)
 - Ideal for use indoors or outdoors above or below ground level
 - Allows surface breathing
 - Cured surface may be over painted, plastered, tiled etc.
 - Ready for use
 - Available in white and light blue; white can be tinted to any light color.
- *(Subject to correct application and to substrate quality)

APPLICATIONS

DRYPROOF MASONRY WATERPROOFER is suitable for waterproofing

- Basement walls and foundations
- Swimming pools and fountains
- Roof tops
- Water tanks and drainage
- Drive ways and garages
- Exposed walls
- Most common masonry surfaces such as cement, mortar, concrete blocks etc

CONSUMPTION: 2,5 - 3 m²/Lt

PGP DRYPROOF WATERBASED WATERPROOFER

Highly effective ready to use waterbased waterproofing paint for masonry walls with excellent waterproofing properties even when negative hydrostatic pressure is present

DESCRIPTION

PGP DRYPROOF MASONRY WATERBASED WATERPROOFER is a highly effective ready to use waterproofing paint for masonry walls. Based on a unique waterbased formula of carboxylated styrene acrylate resins, exhibits excellent waterproofing properties even when negative hydrostatic pressure is present. It is suitable for interior and exterior use above or below ground level.

ADVANTAGES

- Withstands negative and positive hydrostatic pressure
- Ideal for use indoors or outdoors above or below ground level
- Allows surface breathing
- Cured surface may be over painted, plastered, tiled etc.
- Available in white and light blue; white can be tinted to any light color

APPLICATIONS

DRYPROOF MASONRY WATERBASED WATERPROOFER is suitable for waterproofing

- Basement walls and foundations
- Swimming pools and fountains
- Roof tops
- Water tanks and drainage
- Drive ways and garages
- Exposed walls
- Most common masonry surfaces such as cement, mortar, concrete blocks etc

PGP CLEAN & FREE

Special acid cleaner, used for the effective removal of alkalis and salts of cement surfaces

DESCRIPTION

PGP CLEAN & FREE is a special acid cleaner, used for the effective neutralization of alkalis of cement surfaces, the removal of concrete's salts and the opening of surface pores. It is particularly recommended for the preparation of structural surfaces prior to the application of waterproofing materials DRYPROOF MASONRY WATERPROOFER and DRYPROOF WATERBASED WATERPROOFER.

ADVANTAGES

- Easy and fast application
- Very effective
- Suitable for interior and exterior use

APPLICATIONS

- Prepares smooth concrete for application of waterproofing materials or painting
- Removes efflorescence (salt-like deposits caused by moisture) from concrete
- Cleans - etches the surface pores
- Cleans mortar from bricks and tiles
- Conditions galvanized surfaces for painting
- Can be applied on concrete, stones, tiles, bricks and galvanized metal

CONSUMPTION: Diluted product in 5Lt of water cleans 30m²

EPOXITE DRYMAX WET

2 component 100% solids epoxy waterproofing hardener - primer and varnish

DESCRIPTION

EPOXITE DRYMAX WET is an extremely powerful, transparent, 2 component solvent free epoxy waterproofing hardener - primer and varnish. It exhibits high scrub resistance and superior hardness. It is highly resistant to water, acids, alkalis, petroleum based products etc. It is suitable for waterproofing, strengthening and protecting concrete and most common building surfaces.

ADVANTAGES

- Excellent adhesion and very high penetration capacity on porous substrates
- Full surface waterproofing
- Can be applied to damp areas
- Excellent substrate strengthening
- Dries fast and it does emit volatile organic compounds (for non well ventilated spaces)
- Suitable for interior or exterior use
- Easy application

APPLICATIONS

- Waterproofing and priming concrete surfaces before applying epoxy and polyurethane coatings or self-leveling compounds.
- Waterproofing (moisture barrier) and priming concrete surfaces before applying polyurethane or epoxy parquet adhesives.
- Application as a final coat on cement screeds - concrete for strengthening and stabilizing the surface in order to avoid dust formation

CONSUMPTION: 3 - 6 m²/Lt

Gray SET 35Kg	1	5176	88.00

Contains a concentrated emulsion.
Add 1-1.5Lt of water

ISOMIX WATERPROOF ELASTIC 2K

2 component, brushable, elastic sealing slurry

DESCRIPTION

ISOMIX WATERPROOF 2K SET is an elastic, 2-component, brushable, sealing slurry. Exhibits strong adhesion to most building surfaces, long term sealing properties and high resistance to UVA. It consists of a cement-based dry mix with selected filler grades (component A) and concentrated acrylic based emulsion resin (component B).

ADVANTAGES

- Highly elastic
- Crack-bridging ability
- Withstands negative water pressure offering total waterproofing against water pressure up to 7 atm, according to DIN 1048
- Vapour permeability
- Resistance to ageing
- Bonding to wet surfaces without priming
- Easy and low cost application
- Exterior and interior use

APPLICATIONS

- Waterproofing balconies and terraces
- Waterproofing basements, internally or externally, against humidity or water under pressure.
- Waterproofing of surfaces exhibiting contraction-expansion and vibration effects such as terraces, balconies, above ground water tanks, swimming pools, inverted roofs etc
- Waterproofing corners, joints and uncovered spots.
- Ideal as a substrate for sealing cracks in humid areas prior to tile fixing, such as bathrooms, terraces, balconies etc.
- Waterproofing surfaces made of concrete, plaster, bricks, cement-blocks, aerated concrete blocks, mosaic, gypsum boards, wood, metal, expanded or extruded polystyrene etc

CONSUMPTION: 3 Kg/m² for three coatings

ISOMIX WATERPROOF SC 900

1 component, brushable, elastic sealing slurry

DESCRIPTION

ISOMIX WATERPROOF SC900 is one component, brushable, sealing slurry. It contains high strength Portland cement, selected inert fillers, special additives and resins which offer excellent adhesion and elasticity as well as long lasting water resistance. Does not crack nor shrink. The range of applications includes simple waterproofing applications as well as negative water pressure conditions.

ADVANTAGES

- Withstands negative water pressure
- Elastic
- Exhibits outstanding adhesion to most building surfaces
- Demonstrates excellent durability to ageing
- Easy to apply
- Offers excellent adhesion to following layers / plaster
- Withstands temperature variations
- Exterior and interior use

APPLICATIONS

- Waterproofing of basements internally (walls with water infiltration problems) and externally prior to covering the foundations with earth.
- Waterproofing sewage tanks, water tanks, swimming pools, flower beds etc.
- Waterproofing floors prior to the final covering (tiles, marble, wooden parquet etc).
- Waterproofing of concrete elements and walls.
- It is also suitable for bricks, cement blocks, stones etc

CONSUMPTION: 2.5-3 Kg/m² of drymix/m² per layer of 2mm thickness.

PGP DRYPROOF ASPHALT COATING

Specially formulated asphalt-based, fibered waterproofing material with thermo insulating properties

DESCRIPTION

PGP DRYPROOF ASPHALT COATING is a specially formulated asphalt-based, fibered waterproofing material. It combines the waterproofing properties of an asphalt roof coating, and the thermo insulating properties of rock wool in one coat. It provides year round weatherproofing, insulates and seals small leaks, cracks and seams.

ADVANTAGES

- Combines asphalt and rock wool in one coat
- Waterproofing and thermo insulation in one coat
- Seals cracks and hairlines on old asphalt coatings
- Ideal substrate before applying insulation system
- 5 years guarantee
- Available in black color

APPLICATIONS

- Waterproofing of foundations
- Waterproofing roof tops
- Repair and renovation of old bitumen and asphalt surfaces
- Waterproofing metallic, galvanized roof tops, prefabricated houses, caravans etc.
- Applied on most common masonry surfaces such as cement, mortar, metallic, galvanized surfaces below and above the ground level

CONSUMPTION: 2 - 3 m²/Lt

PACKAGING	ITEMS/BOX	CODE	PRICE €
Black 3Lt	4	7173	18.00
Black 10Lt	1	7174	55.00

PGP DRYPROOF ROOF COATING

Specially formulated asphalt-based fibrated aluminium waterproofing material with thermo insulating properties

DESCRIPTION

PGP DRYPROOF ROOF COATING is asphalt-based, fibrated aluminium waterproofing material. It combines the waterproofing properties of an asphalt roof coating, the reflectivity of aluminium paint and the thermo insulating properties of rock wool in one coat. It provides year round weatherproofing, insulates and seals small leaks, cracks and seams.

ADVANTAGES

- Combines asphalt, aluminum and rock wool in one coat
- Waterproofing and thermo insulation in one coat
- Reflects sunlight
- Seals cracks and hairlines on old asphalt coatings
- 5 years guarantee
- Available in silver colour

APPLICATIONS

- Waterproofing roof tops
- Repair and renovation of old bitumen and asphalt surfaces
- Waterproofing metallic, galvanized roof tops, prefabricated houses, caravans etc.
- Applied on most common masonry surfaces such as cement, mortar, metallic, galvanized surfaces above the ground level

CONSUMPTION: 5 - 8 m²/Lt

PGP DRYPROOF ROOF PAINT

Specially formulated asphalt-based aluminium paint

DESCRIPTION

PGP DRYPROOF ROOF PAINT is specially formulated asphalt-based aluminium paint. It combines the waterproofing properties of asphalt and the reflectivity of aluminium in one coat. Protects surfaces from humidity and weather conditions, reflects more than 70% of solar radiation, thus decreasing the temperature up to 9°C under the roof during the summer.

ADVANTAGES

- Combines asphalt and aluminum in one coat
- Reflects sunlight
- 5 years guarantee
- Available in silver colour

APPLICATIONS

- Protection, repair and renovation of old bitumen and asphalt surfaces
- Protection, repair and renovation of metallic, galvanized roof tops, prefabricated houses, caravans etc.
- Applied on most common masonry surfaces such as cement, mortar, metallic, galvanized surfaces above the ground level

CONSUMPTION: 5 - 8 m²/Lt

ISOPHALT RENOVATOR PRIMER

Protective primer for bituminous surfaces

DESCRIPTION

ISOPHALT RENOVATOR is a white primer for bitumen surfaces based on synthetic hybrid resins. It reinforces and renovates bituminous surfaces and bituminous membranes by penetrating the asphalt mass and refreshing the dried and worn out surfaces. It forms a strong white protective film that offers UV-protection. It works as a bonding primer providing a sound anchor for acrylic and hybrid waterproofing membranes such as ISOCRYL and ISOCRYL PREMIUM. It is resistant to bituminous oils and offers excellent coverage and surface adhesion properties.

APPLICATIONS

- Excellent long lasting protection from sun and humidity
- Superior whiteness
- Reflective to sun UV rays offering thermal insulation advantages
- Excellent adhesion properties
- Excellent coverage
- Perfect final finish

ΕΦΑΡΜΟΓΕΣ

- Weather and sun protection of bituminous surfaces
- Bonding primer for acrylic and hybrid waterproofing membranes on asphalt and most building surfaces

**REPAIR & RENOVATION
OF OLD AND WORN
BITUMINOUS SURFACES**

ISOPHALT LATEX**Waterbased waterproofing bituminous emulsion****DESCRIPTION**

ISOPHALT LATEX is waterbased bituminous emulsion based on a mixture of pure asphalt and fillers. It is odourless, non flammable and free from dangerous solvents. It is suitable for protection and waterproofing building surfaces. A continuous waterproof film is formed after water evaporation, with excellent adhesion properties to the substrate. The dried film is resistant to acid or alkali solutions.

ADVANTAGES

- Excellent adhesion on most building surfaces
- Excellent water/humidity resistance
- Excellent resistance to ageing
- User and environmentally friendly – free from organic solvents
- Easy to apply and work with

APPLICATIONS

- Waterproofing of vertical or horizontal concrete surfaces such as terraces and slope roofs, foundations, interior and exterior walls, floors, retaining walls, basement walls etc and as vapour barrier.
- Can be mixed with sand and cement to create a plastoelastic mortar with excellent mechanical properties suitable for industrial floors, gyms etc.
- ISOPHALT LATEX is compatible with common building substrates such as concrete, plaster, masonry, brick, stones, metal, plasterboard etc.

CONSUMPTION: 0,6 - 1 Kg/m²

ISOPHALT VARNISH

Solvent based waterproofing bituminous varnish

DESCRIPTION

ISOPHALT VARNISH is a bituminous solvent based waterproofing varnish with excellent adhesion on most surfaces. It is used as a primer to increase bonding of bituminous waterproofing membranes, as well as a final coat for waterproofing concrete or other surfaces (protection against oxidation). It dries fast and provides a durable and uniform waterproofing film with very good adhesion properties on construction materials, withstanding acid and alkaline solutions, as well as saline water. It is affected by mineral oils.

ADVANTAGES

- Hard and uniform water repellent anticorrosive film
- Superior adhesion on most building surfaces
- Excellent water, humidity, sea water resistance
- Excellent resistance to ageing
- Easy application

APPLICATIONS

- Surface primer for adhesion of bituminous membranes.
- Waterproofing and protection of external concrete surfaces.
- Waterproofing and repair of gutters, grooves and various other similar applications.
- Excellent anticorrosive protection of water pipes, natural gas pipes etc.
- ISOPHALT VARNISH is compatible with polyurethane, concrete, light-weight concrete, asbestos, cement, brick, stones, metal, wood and plasterboard. It is not compatible with polystyrene because it contains organic solvents

CONSUMPTION: 1 Kg/m²

ISOCRYL CLIMA PROOF WALL

Energy saving bioclimatic wall coating

DESCRIPTION

ISOCRYL CLIMA PROOF Wall is a premium quality acrylic total protection coating based on 100% acrylic resin and micro- sphere technology additives that produce excellent results in thermal insulation and overall building protection, suitable for exterior and interior use. It offers protection from adverse weather conditions and specifically in extreme temperature differences, direct sunlight, rain and atmospheric pollution. It has superior reflectivity and a high resistance to ageing. It presents excellent surface adhesion and working properties and offers a beautiful matt, long lasting finish. Its micro- cell structure creates a very high resistant heat transfer barrier providing a true heat conservation mechanism, many times its thickness.

ADVANTAGES

- Energy efficient
- Very low conductivity
- High content of lightweight glass beads and micro- sphere technology additives
- Outstanding gap filling and crack resistance
- Offers excellent protection from adverse weather conditions
- High reflectivity
- High resistance to ageing
- Great surface adhesion
- Easy application
- Protects surfaces from carbonization and chalking

APPLICATIONS

- Ideal for thermal insulation and waterproofing of exterior walls
- Suitable for thermal insulation of interior walls
- Application on plaster, concrete, wood, stone, cement board, plasterboard, bricks, wood, ondulated roof panels as well as suitably primed metal surfaces

ISOCRYL CLIMA PROOF ROOF

Energy saving bioclimatic roof coating

DESCRIPTION

ISOCRYL CLIMA PROOF Roof is premium quality acrylic total protection insulation material based on 100% acrylic resin and micro- sphere technology additives that produce excellent results in thermal insulation and overall building protection, suitable for exterior use. It offers protection from adverse weather conditions and specifically in extreme temperature differences, direct sunlight, rain and atmospheric pollution. It has superior reflectivity and a high resistance to ageing. Its micro- cell structure creates a very high resistant heat transfer barrier providing a true heat conservation mechanism, many times its thickness.

ADVANTAGES

- Energy efficient
- Very low conductivity
- High content of lightweight glass beads and micro- sphere technology additives
- Outstanding gap filling and crack resistance
- Offers excellent protection from adverse weather conditions
- High reflectivity
- High resistance to ageing
- Great surface adhesion
- Easy application
- Protects surfaces from carbonization and chalking

APPLICATIONS

- Waterproofing of rooftops, terraces, walls
- Waterproofing bitumen and polyurethane hard foam surfaces (with special primer)
- Suitable for concrete surfaces, bitumen material, wood, stone, brickwork, PVC, polyurethane foam, plaster, plasterboard, metal etc.

CONSUMPTION: 1 -3m²/Lt

PGP DRYPROOF THERMOBLOCK

High quality water based acrylic paint enriched with glass beads, with thermal insulation and anti-mould properties

DESCRIPTION

PGP DRYPROOF THERMOBLOCK is a high quality water based acrylic paint with thermal insulation and anti-mould properties. Its unique formula based on acrylic resins and SCOTCHLITE 3M glass beads reduces considerably heat loss during winter while in summer reduces cooling costs. Furthermore due to the reduction of the temperature differentiation between exterior walls and interior temperature it eliminates the growth of mould created from condensation. It is suitable for interior and exterior use.

ADVANTAGES

- Keeps the house warm in winter and cool in summer
- Offers great savings in heating and cooling costs
- Reduces internal moisture
- Prevents mold growth

APPLICATIONS

- Ideal for thermal insulation and waterproofing of exterior walls
- Suitable for thermal insulation of interior walls
- Ideal for resolving problems of condensation and mould in kitchens, bathrooms, ceilings, cupboards etc.
- Application on plaster, concrete, wood, stone, cement board, plaster-board, bricks, wood, ondulated roof panels

CONSUMPTION: 7 - 10 m²/Lt

WATER BLOCK M22

Solvent based clear silane water and oil repellent designed to protect stone, marble, cement, tile surfaces

DESCRIPTION

WATER BLOCK M22 is clear silane water and oil repellent designed to protect a variety of surfaces without altering their natural appearance. It is ideal for marble and granite surfaces as well as natural and artificial stones, tile joints and porous ceramic tiles (cotto), decorative bricks etc. It exhibits excellent penetration ability and allows surface breathing. Provides excellent protection against nature's destructive forces, staining from oils and household dirt. Provides a long lasting, breathable barrier which exhibits superior resistance to water, oils, stains, moisture intrusion, airborne dust, salt, acid rain, alkali, frost and high temperatures.

ADVANTAGES

- Excellent water & oil repellence
- Long lasting protection
- Excellent penetration
- Vapour permeable – allows surface breathing
- Does not alter the natural appearance of the surface applied
- Resistance to temperature variations
- Easy to apply – ready to use material
- Immediate effectiveness
- Interior and exterior use

APPLICATIONS

- Waterproofing and protection from staining, and frequent use of unpolished marble and granite surfaces. It is most suitable for interior and exterior horizontal surfaces. For colored marble we suggest a compatibility test.
- Waterproofing and long lasting protection from staining of natural and artificial stone surfaces. It is most suitable for horizontal surfaces such as verandas, garden stone patios etc.
- Waterproofing and long lasting protection from staining of tile joints and porous ceramic tiles (terracotta)
- Waterproofing and protection of decorative bricks
- Waterproofing concrete building surfaces
- Surfaces treated with WATER BLOCK M22 can be easily cleaned from spots and stains with clean water

CONSUMPTION: 5 - 10 m²/Lt

Note: Prior to application of **WATER BLOCK M22**

it is advised to clean surfaces with **CL 17 OXY CLEAN** or **CL 22 OXY CLEAN**

WATER BLOCK M33

Solvent based clear silane water repellent designed to protect stone, marble, cement, tile surfaces

DESCRIPTION

WATER BLOCK M33 is a clear silane water repellent designed to protect a variety of surfaces without altering their natural appearance. It is suitable for natural and artificial stones, tile joints and porous ceramic tiles (cotto), decorative bricks, ceramic roof tiles and porous building surfaces. It exhibits excellent penetration ability and allows surface breathing. Provides excellent protection against nature's destructive forces and staining. It forms a long lasting, breathable barrier which exhibits superior resistance to water, stains, moisture intrusion, airborne dust, salt, acid rain, alkali, frost and high temperatures.

ADVANTAGES

- Excellent waterproofing properties
- Long lasting protection
- Excellent penetration
- Vapour permeable – allows surface breathing
- Does not alter the natural appearance of the surface applied
- Resistance to temperature variations
- Easy to apply – ready to use material
- Immediate effectiveness
- Interior and exterior use

APPLICATIONS

- Waterproofing and long lasting protection from staining of natural and artificial stone surfaces. It is suitable for vertical surfaces such as stone facades as well as horizontal such as verandas, garden stone patios etc.
- Waterproofing and long lasting protection from staining of tile joints and porous ceramic tiles (terracotta)
- Waterproofing and protection of decorative bricks
- Waterproofing and protection from cracking due to moisture intrusion and frost of ceramic roof tiles
- Waterproofing and protection of white unpolished marble surfaces and colored with compatibility test
- Waterproofing concrete building surfaces
- Waterproofing porous building surfaces such as stucco and plaster
- Priming building surfaces before coating with silane paints
- It is suitable for interior and exterior horizontal and vertical surfaces. Surfaces treated with WATER BLOCK M33 can be easily cleaned from spots and stains with clean water

CONSUMPTION: 5 - 10 m²/Lt

Note: Prior to application of **WATER BLOCK M33**

it is advised to clean surfaces with CL 17 OXY CLEAN or CL 22 OXY CLEAN

WATER BLOCK AQUA

Micro technology waterbased clear silane water repellent

DESCRIPTION

WATER BLOCK AQUA is a new micro technology waterbased clear silane water repellent designed to protect a variety of surfaces without altering their natural appearance. It is suitable for natural and artificial stones, tile joints and porous ceramic tiles (cotto), decorative bricks, ceramic roof tiles and porous building surfaces. It exhibits excellent penetration ability and allows surface breathing. Provides excellent protection against nature's destructive forces and staining. It forms a long lasting, breathable barrier which exhibits superior resistance to water, stains, moisture intrusion, airborne dust, salt, acid rain, alkali, frost and high temperatures.

ADVANTAGES

- New waterbased technology
- Excellent waterproofing properties
- Long lasting protection
- Excellent penetration
- Vapour permeable – allows surface breathing
- Does not alter the natural appearance of the surface applied
- Resistance to temperature variations
- Easy to apply – ready to use material
- Immediate effectiveness
- Interior and exterior use

APPLICATIONS

- Waterproofing and long lasting protection from staining of natural and artificial stone surfaces. It is suitable for vertical surfaces such as stone facades as well as horizontal such as verandas, garden stone patios etc.
- Waterproofing and long lasting protection from staining of tile joints and porous ceramic tiles (terracotta)
- Waterproofing and protection of decorative bricks
- Waterproofing and protection from cracking due to moisture intrusion and frost of ceramic roof tiles
- Waterproofing and protection of white unpolished marble surfaces and colored with compatibility test
- Waterproofing concrete building surfaces
- Waterproofing porous building surfaces such as stucco and plaster
- Priming building surfaces before coating with silane paints
- It is suitable for interior and exterior horizontal and vertical surfaces.
- Surfaces treated with WATER BLOCK AQUA can be easily cleaned from spots and stains with clean water

CONSUMPTION: 5 - 10 m²/Lt

Note: Prior to application of **WATER BLOCK AQUA**

it is advised to clean surfaces with **CL 17 OXY CLEAN** or **CL 22 OXY CLEAN**

PORODUR UVA

Protective and decorative transparent acrylic solvent based varnish for stone surfaces

DESCRIPTION

PORODUR UVA is high quality transparent, pure acrylic, silicone-enriched solvent based varnish for stones and artificial building materials. It has excellent penetrating capacity, excellent resistance to UV rays and adverse weather conditions. It protects surfaces from wearing, tearing, humidity and staining. Preserves and enhances the natural beauty of the surface applied for decorative purposes. It is suitable for interior and exterior use.

ADVANTAGES

- Excellent finishing - enhances the natural beauty of stones
- Excellent penetration
- Excellent water repellence
- Long lasting protection from stains, rain, humidity, fungi, mould etc.
- Resistance to temperature variations
- Excellent UV resistance
- Easy to apply - ready to use material
- Interior and exterior use

APPLICATIONS

- Protection and decoration of porous surfaces such as natural or artificial stones, Karystos or Pilio type tiles, marble, bricks, artificial building materials, ceramic tiles (cotto), ceramic roof tiles, cement tiles, cement, decorative gypsum elements, concrete etc.
- Suitable for walls, fireplaces, benches, floors etc.
- Ideal for the protection of substrates decorated with cement screed finish.
- Strengthening of loose or deteriorated substrates.

CONSUMPTION: 6 - 8 m²/Lt

Note: Prior to application of PORODUR UVA it is advised to clean surfaces with CL 17 OXY CLEAN or CL 22 OXY CLEAN

PORODUR AQUA UVA

Protective and decorative transparent acrylic water based varnish for stone surfaces - PU HYBRID

DESCRIPTION

PORODUR AQUA UVA is high quality transparent, pure acrylic waterbased varnish for stones and artificial building materials, enriched with nano particles and silicone. It has excellent penetrating capacity, excellent resistance to UV rays and adverse weather conditions. It protects surfaces from wearing, tearing, humidity and staining. Preserves and enhances the natural beauty of the surface applied for decorative purposes. It is suitable for interior and exterior use.

ADVANTAGES

- Excellent finishing - enhances the natural beauty of stones
- Excellent penetration
- Excellent water repellence
- Long lasting protection from stains, rain, humidity, fungi, mould etc.
- Resistance to temperature variations
- Excellent UV resistance
- Easy to apply – ready to use material
- Interior and exterior use

APPLICATIONS

- Protection and decoration of porous surfaces such as natural or artificial stones, Karystos or Pilio type tiles, marble, bricks, artificial building materials, ceramic tiles (cotto), ceramic roof tiles, cement tiles, cement, decorative gypsum elements, concrete etc.
- Suitable for walls, fireplaces, benches, floors etc.
- Ideal for the protection of substrates decorated with cement screed finish.
- Strengthening of loose or deteriorated substrates

CONSUMPTION: 8 - 10 m²/Lt

Note: Prior to application of PORODUR AQUA UVA it is advised to clean surfaces with CL 17 OXY CLEAN or CL 22 OXY CLEAN

100 Surface Protection

CONCRETE SEALER

Solvent based acrylic varnish for stamped - concrete floors

DESCRIPTION

CONCRETE SEALER is a high quality transparent, pure acrylic, sealer for stamped concrete and cementitious floors and artificial building materials. It has excellent penetrating capacity and UV resistance. It protects surfaces from humidity and stains. It offers significant strengthening and scrub resistance providing dust free surfaces. Depending on the number of coats applied creates a film, which protects and enhances the appearance of the artificial surfaces for decorative purposes. It is suitable for interior and exterior use.

ADVANTAGES

- Excellent finishing - enhances the natural beauty of surfaces
- Excellent penetration
- Excellent water repellence
- Excellent scrub resistance – dust-free surfaces
- Long lasting protection from stains, rain, humidity, fungi, mould etc.
- Resistance to temperature variations
- Excellent UV resistance
- Easy to apply – ready to use material
- Interior and exterior use

APPLICATIONS

- Protection and decoration of porous surfaces such as stamp concrete floors, artificial stones, cementitious and industrial floors and paving stones, bricks, artificial building materials, cement, decorative gypsum elements, concrete etc.
- Strengthening of loose or deteriorated substrates

CONSUMPTION: 8-10 m²/Lt

PREMIUM FLOOR VARNISH

2 component acrylic - polyurethane varnish for exterior and interior wood, cement, stone and metallic floors

DESCRIPTION

PREMIUM FLOOR VARNISH is a clear 2 component acrylic - polyurethane varnish that provides ultimate long lasting protection of exterior and interior wood, cement, stone and metallic floors. It contains UV filters which protect against sunlight. The durable polyurethane based formula provides a long lasting finish with excellent mechanical and chemical resistance as well as resistance to pedestrian traffic, humidity and extreme weather conditions. The excellent combination of hardness and elasticity make it the ideal floor varnish.

ADVANTAGES

- Forms an elastic, seamless, transparent protective membrane
- Excellent traffic and wear resistance
- Excellent adhesion properties
- Excellent sun and frost resistance
- In case of mechanical damage, the membrane can be easily repaired locally in minutes

APPLICATIONS

- Ideal for use on all exterior and interior wood parquet floors
- Waterproofing, sealing and protection of cement floors
- Waterproofing, sealing and protection of natural stone floors (for artificial stones a compatibility test is recommended)
- Ideal finish - varnish for metallic floors and surfaces
- Protection and waterproofing of most building surfaces

CONSUMPTION: 5 - 10 m²/lt

ANTIGRAFFITI COATING

2 component polyurethane coating, suitable for protecting building surfaces and walls from graffiti painting

DESCRIPTION

ANTIGRAFFITI COATING is a high quality two component polyurethane coating, suitable for protecting building surfaces and walls from graffiti painting. Its unique polyurethane technology provides excellent resistance to water, solvent and extreme weather conditions. It does not yellow and chalk. It protects the coated surface with a clear membrane. Surfaces coated with ANTIGRAFFITI COATING can be cleaned depending on the type of graffiti using a high pressure hot water jet or the special GRAFFITI REMOVER cleaner which does not affect the substrate. Contrary to sacrificial coatings, it has a very long life cycle. It is also suitable for protection of graffiti art from vandalism. It can be applied on metal, concrete, plaster, dry-wall, MDF, wood, stone, marble. It is available in clear - transparent and other colors upon order

ADVANTAGES

- Creates a clear - transparent protective membrane
- Does not allow paints to penetrate the surface – can be easily cleaned
- Allows the substrate to breathe
- Outstanding adhesion on most building surfaces
- Excellent UV and frost resistance
- Excellent resistance to solvents and chemicals
- Surface damage can be repaired immediately

APPLICATIONS

- Graffiti protection of public buildings, schools, bridges, houses, marble facades, industrial buildings.
- Protection of graffiti art from vandalism. A test must be performed before full scale application due to different types of paints used.
- Applied on horizontal and vertical building surfaces. It offers high wear and impact resistance.
- Suitable for marble, stone, visible concrete, cement, plaster, metal, wood, plasterboard, cementboard and like materials.
- Can be applied on emulsion and acrylic paints after a suitability test.
- Not suitable for expanded or extruded polystyrene, polyethylene and materials affected by strong solvents such as nitro. Not suitable as well for surfaces with low adhesion properties such as EPS & XPS polystyrene

CONSUMPTION: 3 - 8 m²/Kg per layer

GRAFFITI REMOVER

High performance graffiti remover

DESCRIPTION

TGRAFFITI REMOVER is a high performance graffiti remover for surfaces which have been coated with the ANTIGRAFFITI COATING. It dissolves easily most types of paints without affecting the antigraffiti coating. It is recommended for professional cleaning companies, building managers and property owners. It is also suitable for cleaning coaches and buses, trains, letter-boxes, vending machines etc.

APPLICATIONS

- Removal of graffiti from surfaces treated with ANTIGRAFFITI COATING.
- Cleaning of gloss surfaces such as glass, steel, plexiglas etc.
- Cleaning of vehicle bodies

CONSUMPTION: 3-5 m²/Kg

Paint & Waterproofing Primers

ISOCRYL PRIMER DUR

Nanotechnology transparent, acrylic solvent based wall and roof primer

DESCRIPTION

ISOCRYL PRIMER DUR is strong, transparent, acrylic solvent based primer, fortified with nano particles with improved adhesion promotion and penetration properties. It is suitable for protection and strengthening of concrete, plaster and other building surfaces.

ADVANTAGES

- Excellent adhesion and high penetration to porous surfaces
- Substrate strengthening
- Dries fast and does not cause yellowing of subsequent paint coats
- Strong anchoring properties due to nanotechnology formulation
- Ensures better adhesion and spreading of paints
- Interior and exterior use
- Easy application

APPLICATIONS

- Priming of interior and exterior walls and facades (plaster, stone, brick, gypsum, cement boards etc.) prior to painting with acrylic, emulsion or elastomeric paints.
- Priming of roofs and terraces prior to application of roof insulation materials.
- Priming of building surfaces prior to sealing with elastomeric sealing materials (elastomeric, polyurethane).
- Strengthening of cement screeds and floors that present deterioration and chalking

CONSUMPTION: Walls: 10 - 15m²/Lt Roofs: 5 - 8m²/Lt

ISOCRYL PRIMER DUR AQUA

Nanotechnology transparent, acrylic waterbased wall and roof primer

DESCRIPTION

ISOCRYL DUR AQUA is strong, transparent, acrylic waterbased primer, fortified with nano particles with improved adhesion promotion and penetration properties. It is odorless and friendlier for the environment and the user. It is suitable for protection and strengthening of concrete, plaster and other building surfaces. It is suitable for interior and exterior use. Due to its water based technology it is specially recommended for indoor use. It is slightly tinted blue, in order to prevent any missed spots, while it is perfectly covered with white or light shades of final coat..

ADVANTAGES

- Excellent adhesion and high penetration to porous surfaces
- Substrate strengthening
- Dries fast and does not cause yellowing of subsequent paint coats
- Ensures better adhesion and spreading of paints
- Strong anchoring properties due to nanotechnology formulation
- Interior and exterior use
- Easy application - slightly tinted blue

APPLICATIONS

- Priming of interior and exterior walls and facades (plaster, stone, brick, gypsum, cement boards etc) prior to painting with acrylic, emulsion or elastomeric paints.
- Priming of roofs and terraces prior to application of roof insulation materials.
- Priming of building surfaces prior to sealing with elastomeric sealing materials (elastomeric, polyurethane).
- Strengthening of cement screeds and floors that present deterioration and chalking

CONSUMPTION: 10 - 15m²/L depending on dilution

ISOMIX BETON PRIMER

Quartz - adhesion promoting primer for cementitious materials

DESCRIPTION

ISOMIX BETON PRIMER is an excellent adhesion quartz primer based on a blend of acrylic resins and selected quartz sand. It is specially formulated for smooth and low absorption surfaces. It shows great resistance in an alkaline environment.

ADVANTAGES

- Excellent surface adhesion and high capacity of penetration on low absorption surfaces.
- Ideal for strengthening the surface applied
- Adhesion bridge for the application of wall plaster or other mortars.
- Dries fast and does not cause yellowing
- Interior and exterior use
- Easy to apply – coloured for distinguishing applied areas

APPLICATIONS

- Suitable for priming smooth surfaces as an adhesion bridge before the application of wall plaster or acrylic stucco.
- It is suitable for priming smooth cement surfaces, plasterboards, polystyrene plates EPS & XPS, concrete etc.
- It is also suitable for priming the surface of old ceramic tiles before laying and gluing new ones on top.

It is advisable to perform a suitability test prior to full scale application

CONSUMPTION: 0,2 - 0,4 Kg/m²

SWAN SUPER PRIMER

Waterbased acrylic undercoat suitable for exterior and interior use

DESCRIPTION

SWAN SUPER PRIMER is waterbased undercoat suitable for exterior and interior use. It offers excellent adhesion, smooth finish, superior coverage and whiteness. The excellent penetration guarantees extra yield in the final finish by diminishing the absorption of the surfaces. It is suitable as an undercoat for plaster, cement, plasterboard etc before the final coating of emulsion or acrylic paints.

ADVANTAGES

- Excellent adhesion properties
- Superior coverage
- Decreases the absorption of the surface
- Exterior and interior use

APPLICATIONS

- Application as primer of horizontal and vertical building surfaces.
- It is suitable for concrete, plaster, cementboard, plasterboard etc..

CONSUMPTION: 15 m²/Lt .

**Improves quality
of final coat**

SWAN PRIMER MAX 3:1

High quality transparent water-based primer based on 100% acrylic resins

DESCRIPTION

SWAN PRIMER MAX 3 : 1+ is a high quality transparent water-based primer based on pure acrylic resins that offers very good adhesion and penetration compared to conventional plastic primers. It creates a strong binding layer for the final color. It does not allow polymer transfer from the paint to wall and increases the smoothness and strength of the paint film. This offers increased performance, quality and economy in color. It is resistant to alkali and other surfaces like plaster, concrete, cement board, cementitious fine putty, plasterboard for interior and exterior applications and it is re coatable with most emulsion paint.

ADVANTAGES

- Increased performance - 3: 1 dilution with clean water
- Excellent adhesion properties
- Superior coverage
- Decreases the absorption of the surface
- Ensures a uniform surface in the final color
- Covers stains
- Exterior and interior use

APPLICATIONS

- Application as primer of horizontal and vertical building surfaces.
- It is suitable for concrete, plaster, cementboard, plasterboard etc.

CONSUMPTION: 9 - 14 m²/Lt

TITANIUM BLOCK

Total block multi-use primer & sealer

DESCRIPTION

TITANIUM BLOCK is a high performance waterbased sealing primer with strong adhesion on multiple surfaces, able to cover most nicotine stains, soiling, aged-dried and smelly masonry and wooden wall surfaces. It is also very effective surface treatment for demanding and high quality paint applications.

ADVANTAGES

- Excellent multi surface adhesion.
- Unique sealing properties – covers stains and smoke soiling.
- Seals ultra absorbent surfaces
- Seals wooden surfaces (tannin blocker)
- External and internal use
- Provides economic use of final paint coat

APPLICATIONS

- Fire soiled buildings
- Persistent wall stains
- Ultra absorbent and difficult surfaces (concrete, plaster, wooden surfaces)

CONSUMPTION: 7 - 10 m²/Lt

LIGNODUR PRIMER ANTI-UV

High performance weather and UV protective and stabilizing primer

DESCRIPTION

LIGNODUR PRIMER ANTI - UV is specialized penetrating high performance and high efficiency primer. It forms strong bonds with the wood mass, reacting and fortifying the wood's lignin. It offers very excellent weather and UV resistance and long term protection.

ADVANTAGES

- Excellent penetration to wooden surfaces.
- High reactivity – fortifies the wood in depth
- Protects the wood from wear and discoloration
- Exterior and interior use

APPLICATIONS

- Wooden surface exposed to adverse weather and UV

CONSUMPTION: 8 - 12 m²/Lt

**NEW TECHNOLOGY
PROTECTIVE
WOOD PRIMER ANTI-UV**

**APPLIED AFTER
XYLOFARM AQUA KILLER
& BEFORE FINAL VARNISH**

110 Paint & Waterproofing Primers

PRIMER PU 900

Transparent moisture curing polyurethane primer

DESCRIPTION

PRIMER PU 900 is a transparent, solvent based, deep penetrating, fast curing, one-component polyurethane primer suitable for preparation, protection and strengthening of concrete and other building surfaces. Penetrates deep on the substrate and offers excellent anchoring for polyurethane and elastomeric sealants. Cures by reaction with ground and air moisture, it is highly elastic and highly resistant to water and frost.

ADVANTAGES

- Excellent adhesion on porous surfaces
- Substrate strengthening
- Interior and exterior use
- Easy to apply
- Fast and clean application

APPLICATIONS

- Priming roofs prior to the application of polyurethane membrane PU FLEX 1000.
- Priming floor joints prior to the application of polyurethane sealants BOND FLEX Mercola.
- Priming construction joints prior to the application of polyurethane sealants BOND FLEX or MEGASIL silicone.
- Priming concrete floors prior to the application of polyurethane wooden parquet adhesive TEMPO PU PARQUET 1K.
- PRIMER PU 900 may be applied on concrete, cement, plaster, stone, marble, bricks, wood, cementboard, plasterboard etc.
- Priming of glazed surfaces such as ceramic tiles with spreading silica sand over the PRIMER PU 900

CONSUMPTION: 7 - 12 m²/Lt

EPOXITE DUR

Transparent 2 component solvent based, epoxy primer

DESCRIPTION

EPOXITE DUR is an extremely powerful, transparent, 2 component solvent based epoxy primer. It exhibits high scrub resistance and hardness. It is highly resistant to water, acids, alkalis, petroleum based products etc. It is suitable for strengthening and protecting concrete or plaster surfaces.

ADVANTAGES

- Priming concrete surfaces before applying epoxy swimming pool and floor paints.
- It can be used as a final coat on cement screeds so as to strengthen and stabilize the surface in order to avoid dust formation (dust formation on concrete surface due to chalking).
- Suitable as well for plaster, stone, brick, gypsum, cement boards, metal

APPLICATIONS

- Priming concrete surfaces before applying epoxy swimming pool and floor paints.
- It can be used as a final coat on cement screeds so as to strengthen and stabilize the surface in order to avoid dust formation (dust formation on concrete surface due to chalking).
- Suitable as well for plaster, stone, brick, gypsum, cement boards, metal

CONSUMPTION: 8 - 14 m²/Kg

112 Paint & Waterproofing Primers

ADHESIL

Primer - adhesion promoter for difficult and polished surfaces

DESCRIPTION

ADHESIL is a transparent primer for adhesion promotion working on a molecular level. It works on high gloss, smooth or polished surfaces and in general difficult – low energy surfaces where most usual coatings, adhesives fail to adhere.

ADVANTAGES

- Excellent adhesion on glass or enamel coatings
- Excellent adhesion on inox, aluminium, galvanized and non-ferrous metals
- Suitable for highly polished and compact surfaces such as polished marble, high luster marble
- Excellent adhesion on most plastic and plasticized surfaces
- Easy and fast application
- Provides cleaning action

APPLICATIONS

Improves bonding of:

- Epoxy and polyurethane adhesives and coatings on difficult to adhere surfaces such as high gloss ceramic tiles.
- Polyurethane and epoxy-urethane parquet adhesives.
- Polyurethane, silicone and hybrid sealants and flexible bonding adhesives.
- Acrylic paints, elastomeric coatings and sealants on difficult to bond surfaces such as glass, aluminium, inox, galvanized steel, plastics etc..

CONSUMPTION: 8 - 14 m²/Lt

ISOMIX GYPSUM PRIMER

Plasterboard primer

DESCRIPTION

ISOMIX GYPSUM PRIMER is a ready to use waterbased, transparent acrylic primer, suitable for interior and exterior use. It is ideal for priming very absorbent surfaces such as plasterboards, plaster and concrete surfaces. ISOMIX GYPSUM PRIMER reduces surface absorbency and improves surface adhesion properties. It is ideal for preparing surfaces for painting, plastering, tiling or wallpaper bonding.

ADVANTAGES

- Excellent surface adhesion properties
- Excellent penetration on porous substrates
- Ideal for strengthening the surface applied
- Reduces surface absorbency
- Dries fast
- Interior and exterior use
- Odourless – environmentally and user friendly

APPLICATIONS

It is suitable for priming plasterboards, plaster, smooth concrete surfaces prior to the final coating with acrylic, emulsion and elastomeric coatings

CONSUMPTION: 7 - 10 m²/Lt

PACKAGING	ITEMS/BOX	CODE	PRICE €
Transparent 1Lt	15	07024	4.00
Transparent 4Lt	1	07025	12.40

Fillers

114 Fillers

STANDARD

Ready to use, white acrylic masonry filler

DESCRIPTION

STANDARD is ready mixed white acrylic masonry filler suitable for both interior and exterior use. It is suitable for smoothing and preparing surfaces prior to painting, as well as filling and coating cracks and holes on walls, ceilings, floors and doors. May be applied on plaster, concrete, brick, stones, render and wood.

ADVANTAGES

- Ready mixed formula
- Smoothens uneven surfaces
- Excellent workability, offers a tough smooth finish
- Dries fast and can be easily sanded
- Presents low shrinkage – does not crack
- Forms a non-absorbent white substrate, ready for painting
- Interior and exterior use
- Rapid and clean application

APPLICATIONS

- It is suitable for smoothing and preparing as well as filling cracks of interior and exterior walls and ceilings prior to the final coat.
- It is suitable for plaster, smooth concrete surfaces, aerated concrete blocks, plasterboards, cementboards etc

SUPER LITE

Revolutionary ready to use, lightweight white filler based on micro cell technology

DESCRIPTION

SUPER LITE is a revolutionary ready mixed lightweight white filler based on a new micro cell technology. It is ideal for the preparation of surfaces in one go prior to painting. It is suitable for plaster, concrete, brick, stones, render, wood and much more.

ADVANTAGES

- Fills all cracks in one go – No need to build up layers of filler
- Easy to use – lightweight paste is easy to apply
- Quick drying – ready to paint/prime in 30 minutes – 1 hour
- Sanding is not required – finishes to a smooth finish
- No sagging
- Non-shrink
- Interior and exterior use
- Rapid and clean application

APPLICATIONS

- It is suitable for quick and easy preparation of surfaces prior to painting as well as filling cracks of interior and exterior surfaces.
- It is suitable for plaster, smooth concrete surfaces, brick, stones, render, wood, plasterboard, cement board and much more

PACKAGING	ITEMS/BOX	CODE	PRICE €
White 800gr	12	07007	5,10

FLEX

Ready to use, white super elastic acrylic filler

DESCRIPTION

FLEX is ready mixed, specially formulated, white, super elastic acrylic putty based on pure acrylic resins. It is suitable for filling cracks and connection joints on walls, ceilings, floors and terraces. Exhibits excellent adhesion on plaster, concrete, bricks, stones, metal, wood etc.

ADVANTAGES

- Ready mixed formula
- Excellent workability
- Dries fast
- Retains its elasticity even at low temperatures
- Presents low shrinkage
- Water resistant after curing
- UV resistant
- Paintable after curing
- Interior and exterior use

APPLICATIONS

- Sealing of horizontal and vertical joints - capable of accommodating a joint movement up to 15%.
- Sealing of most common building joints such as joints between wall and windows / doors, rooftop joints, joints in prefabricated buildings etc.
- It is suitable for plaster, concrete, bricks, stones, metal, wood, aerated concrete blocks, plasterboards, cementboards etc

116 Fillers

ISOMIX ALL PURPOSE FILLER

General purpose white acrylic filler

DESCRIPTION

ISOMIX ALL PURPOSE FILLER is a white acrylic putty, suitable for repairs and surface preparation before painting. Ideal for filling cracks and holes on all building surfaces. It is easily mixed with water, spread evenly and dries quickly. It does not shrink - it does not crack, it is easily sanded, and gives a durable and uniform finish. It creates a perfect - absorbent - surface ready to be sanded and painted. It is suitable for indoor and outdoor use.

ADVANTAGES

- Easy application - sanding
- Excellent adhesion and fast drying
- Zero shrinkage and excellent finishing
- Indoor and outdoor use

APPLICATIONS

- Fills cracks and holes in walls, ceilings, around door and window frames, skirting boards etc.
- Ideal for preparing surfaces before painting
- Suitable for plaster, plasterboard, cement board, brick, concrete, stone and wood
- In outdoor applications it is necessary to paint the surface with acrylic paint.

GLAZING PUTTY

Traditional ready to use glazing putty

DESCRIPTION

GLAZING PUTTY is the traditional ready to use glazing putty based on the original formula with a blend of three different oils.

ADVANTAGES

- Waterproof when dry
- Paintable
- Easy to apply
- Does not crack
- Easy to remove from tools

APPLICATIONS

- Sealing glass traditional metal and wooden frames

JOINT FILLER

Ready mixed white acrylic plasterboard filler

DESCRIPTION

JOINT FILLER is a ready mixed white acrylic plasterboard filler suitable for filling joints and cracks as well as smoothing and preparing surfaces prior to painting. It provides a flat and smooth final surface ready for priming and painting. It is also suitable for filling and coating cracks and holes on plaster and concrete surfaces.

ADVANTAGES

- Ready mixed formula
- Smooths uneven surfaces
- Excellent workability, offers a tough smooth finish
- Dries fast
- Presents low shrinkage
- Forms a perfect substrate, ready for painting
- Interior use
- Rapid and clean application

APPLICATIONS

- It is suitable for filling and coating cracks as well as smoothing and preparing plasterboards prior to painting.
- Filling and grouting plasterboards combined with joint tapes
- Fills gaps and imperfections on plaster and gypsum surfaces and constructions

CONSUMPTION: 2 - 3 Kg /m²

ISOMIX FIX & COAT

Cementboard primer

DESCRIPTION

ISOMIX FIX & COAT is a specially formulated product, combining acrylic resins, various fillers and special additives which, when mixed with Portland cement, is suitable for repairing, smoothing, joint filling and coating of cement boards, as well as surfaces made of concrete or wall plaster. It is also suitable for bonding insulating and reinforcing materials on common building surfaces (walls, concrete boards, plaster etc) and for priming and coating insulation materials.

ADVANTAGES

- Excellent surface adhesion and high capacity of penetration on low absorption surfaces.
- Substrate reinforcement
- Adhesion bridge for the application of wall plaster or other mortars.
- Interior and exterior use
- Easy to apply

APPLICATIONS

- Priming of smooth surfaces, as an adhesion bridge, before the application of wall plaster or acrylic stucco.
- Repair and joint filling of concrete boards and concrete
- Reinforcing of old wall plasters and loose surfaces in general.
- Laying exterior reinforcing mesh on walls.
- Bonding of insulation materials on walls.
- Priming and coating of insulation materials.

It is advisable to perform a suitability test prior to full scale application

CONSUMPTION: 1 - 1,5 Kg/m² / 5mm thick

118 Fillers

ISOMIX ARMOGIPS WR

Joint filler plaster suitable for filling joints of water-resistant plasterboards

DESCRIPTION

ISOMIX ARMOGIPS WR is a joint filler plaster suitable for filling the joints of water resistant plasterboards in humid areas. Based on fine-grained gypsum and special additives, it exhibits excellent water resistance, strength and surface adhesion properties.

ADVANTAGES

- Water resistance
- Excellent surface adhesion properties
- Extra strong
- Easy to use - just add to water
- Homogenous paste texture
- Dries fast
- Easily sanded
- Very low shrinkage

APPLICATIONS

- Filling joints between water resistant plasterboards on vertical and horizontal applications
- Plastering / smoothing plasterboard surfaces in humid areas
- Repair works on smooth surfaces in humid areas

CONSUMPTION: 0,4 – 0,8 Kg/m²

PACKAGING	ITEMS/BOX	CODE	PRICE €

PGP BETON FILLER

Ready to use elastic concrete filler reinforced with ceramic microspheres

DESCRIPTION

PGP BETON FILLER is a ready to use elastic concrete filler reinforced with ceramic microspheres ideal for filling cracks and joints. Does not crack or shrink due to its formulation based on acrylic PVA and ceramic microspheres. Withstands surface movements and vibrations. It is easily sanded and has thermo insulation properties. Its gray colour blends with cementitious substrates. May be applied on concrete, plaster, drywall, bricks, stones, render and wood

ADVANTAGES

- Ready mixed formula
- Reinforced with ceramic microspheres
- Very elastic
- Fills easily uneven breaks
- Excellent surface adhesion properties
- Dries fast and can be easily sanded
- Presents low shrinkage – does not crack
- Excellent mould resistance
- Paintable
- Interior and exterior use

APPLICATIONS

- Fills cracks up to 6cm deep and 2cm wide as well as concrete irregularities
- It is suitable for concrete surfaces, plaster, plasterboards, cementboards, wood, bricks, stone etc

120 Fillers

PGP FIBRATED FILLER

Ready mixed masonry filler based on acrylic resins and rock wool fibers

DESCRIPTION

PGP FIBRATED FILLER is ready mixed masonry filler based on acrylic resins and rock wool fibers, suitable for both interior and exterior use. It is suitable for filling and coating cracks and holes on walls, ceilings, floors and doors. Due to its unique formulation fills cracks easier with less shrinkage and withstands bigger surface movement and vibrations than conventional elastic fillers. May be applied on most usual building surfaces.

ADVANTAGES

- Ready mixed formula
- Fortified with rock wool fibers
- Excellent workability, offers a tough smooth finish
- Dries fast and can be easily sanded
- Presents very low shrinkage – does not crack
- Forms a non-absorbent white substrate, ready for painting
- Interior and exterior use
- Rapid and clean application

APPLICATIONS

- It is suitable for filling cracks and joints of interior and exterior walls and ceilings prior to the final coat.
- It is suitable for plaster, smooth concrete surfaces, aerated concrete blocks, plasterboards, cement boards etc

SWAN SUPER EMULSION

Excellent quality emulsion paint suitable for interior use

DESCRIPTION

SWAN SUPER EMULSION is high quality emulsion paint based on synthetic resins, suitable for interior use. It offers very good coverage and a smooth and bright finish with resistance to ageing. It presents great surface adhesion properties, high resistance to frequent washing and atmospheric pollution. Protects surfaces from carbonization and chalking and discourages mould and algae growth. It is suitable for concrete, plaster, cementboard, plasterboard, bricks and wood.

ADVANTAGES

- Very good coverage
- High resistance to ageing
- Bright white finish
- Great surface adhesion
- Easy application
- Excellent resistance to frequent washing and atmospheric pollution
- Protects surfaces from carbonization and chalking
- Discourages mould and algae growth

APPLICATIONS

- It is suitable for interior horizontal and vertical building surfaces.
- It is suitable for concrete, plaster, cementboard, plasterboard, bricks and wood

SWAN HYDRO PAINT

Waterbased paint ideal for interior ceilings, staircases, storage rooms

DESCRIPTION

SWAN HYDRO EMULSION PAINT is waterbased paint ideal for ceilings, staircases, storage rooms, suitable for interior use. It is an economic solution for areas where resistance to stains and washing is not required. It has a special formulation that allows surface breathing. It offers very good coverage, smooth finish with resistance in ageing. It is suitable for plaster and lime.

ADVANTAGES

- Very good coverage
- Bright white finish
- High resistance to ageing
- Allows surface breathing
- Easy application

APPLICATIONS

- It is suitable for ceilings, staircases, storage rooms etc.
- It is suitable for plaster and lime surfaces.

PRO MOULD

Anti - mould additive for acrylic and emulsion paints

DESCRIPTION

PRO MOULD is anti-mould additive for emulsion and acrylic waterbased paints, offering long lasting protection from mould. The "black spots" that appear on ceilings and walls in humid areas, rooms with bad ventilation, darkness and heat (i.e. kitchen and bathroom ceilings), are caused from the mould fungi, which grows exactly on those surfaces and destroys the painted surface. PRO MOULD added to emulsion or acrylic paints, offers excellent mould protection properties.

ADVANTAGES

- Excellent protection from mould that appears on ceilings and walls
- Compatible with all waterbased paints
- Does not alter the shade of the emulsion or acrylic paint
- Easy to calculate the required amount
- Free of Volatile Organic Components (VOC)

APPLICATIONS

- Application as additive for improving the anti-mould properties of acrylic and emulsion paints.
- It is suitable for concrete, plaster, cementboard, plasterboard etc.
- Exterior and interior use

SWAN SUPER ACRYLIC

Excellent quality acrylic paint suitable for exterior use
PURE ACRYLIC TECHNOLOGY

DESCRIPTION

SWAN SUPER ACRYLIC is high quality emulsion paint based on acrylic resins, suitable for exterior use. It offers very good protection from weather conditions, rain, direct sunlight and atmospheric pollution. It has very good coverage and bright finish with resistance to ageing. It presents excellent surface adhesion and working properties and gives a durable finish. Protects surfaces from carbonization and chalking and discourages mould and algae growth. It is suitable for concrete, plaster, bricks, wood and undulated roof panels.

ADVANTAGES

- Offers very good protection from weather conditions, rain, direct sunlight and atmospheric pollution
- Very good coverage
- Bright white finish
- High resistance to ageing
- Great surface adhesion
- Easy application
- Long lasting
- Protects surfaces from carbonization and chalking
- Discourages mould and algae growth

APPLICATIONS

- It is suitable for exterior horizontal and vertical building surfaces.
- Application on concrete, plaster, cementboard, plasterboard, bricks and wood.

CONSUMPTION: 10 - 12 m²/Lt

126 Interior & Exterior Paints

SWAN PRO MAX ACRYLIC

High performance acrylic paint suitable for exterior use
PURE ACRYLIC TECHNOLOGY

DESCRIPTION

SWAN PRO MAX ACRYLIC is emulsion paint based on acrylic resins suitable for exterior use. It offers very good protection from weather conditions, rain, direct sunlight and atmospheric pollution. It has very good coverage and bright finish with resistance to ageing. It presents great surface adhesion and working properties and gives a durable finish. Protects surfaces from carbonization and chalking and discourages mould and algae growth. It is suitable for concrete, plaster, bricks, wood and ondulated roof panels.

ADVANTAGES

- Offers very good protection from weather conditions, rain, direct sunlight and atmospheric pollution.
- Very good coverage
- Bright white finish
- Resistance to ageing
- Great surface adhesion
- Easy application
- Protects surfaces from carbonization and chalking
- Discourages mould and algae growth

SWAN BATH & KITCHEN

Bath and kitchen acrylic paint with excellent resistance to humidity and mould

DESCRIPTION

SWAN BATH & KITCHEN is a 100% acrylic premium quality emulsion paint based on new micro technology suitable for interior and exterior use. It contains special additives which prevent effectively the growth of mould in areas with high moisture and vapour condensation. It provides thermal insulation properties by maintaining the temperature of the interior surface and thus preventing from water condensation and mould. It is ideal for areas with high moisture and vapour condensation such as kitchens, bathrooms, ceilings, basements. It offers excellent coverage and a smooth matt and bright finish with high resistance to ageing. It presents great surface adhesion properties, high resistance to frequent washing and atmospheric pollution. It is suitable for concrete, plaster, cementboard, plasterboard, bricks and wood.

ADVANTAGES

- Increased resistance to mould, algae growth and condensation
- Thermal insulation properties
- Excellent coverage
- Brilliant white finish
- High resistance to ageing
- Great surface adhesion
- Easy application
- Smooth and matt finish
- Excellent resistance to frequent washing and atmospheric pollution
- Protects surfaces from carbonization and chalking

APPLICATIONS

- It is suitable for interior horizontal and vertical surfaces with increased humidity such as as kitchens, bathrooms, ceilings, basements.
- It is suitable for concrete, plaster, cementboard, plasterboard, bricks and wood.

CONSUMPTION: 8 - 12 m²/Lt

LOW ODOUR

SWAN BETOFLEX AQUA

Extra strong waterbased, acrylic paint for exposed concrete

DESCRIPTION

SWAN BETOFLEX AQUA is superior quality waterbased, acrylic paint specially formulated to provide long lasting protection to exposed concrete. It is suitable for exterior use. It offers excellent coverage and surface adhesion properties with resistance to frequent washing, ageing and atmospheric pollution. Protects surfaces from carbonization and chalking and discourages mould and algae growth. It is also suitable for plaster, bricks, stones etc.

ADVANTAGES

- Provides long lasting protection to exposed concrete
- Highly resistant to frequent washing, ageing and atmospheric pollution
- Very elastic
- Excellent coverage
- Excellent surface adhesion
- Easy application
- Protects surfaces from carbonization and chalking
- Discourages mould and algae growth

APPLICATIONS

- It is suitable for exterior horizontal and vertical building surfaces.
- Specially formulated for concrete surfaces.
- Also suitable for plaster, cementboard, plasterboard, bricks wood etc..

CONSUMPTION: 10 - 12 m²/Lt

SWAN PLUS EMULSION

Acrylic paint based on synthetic resins, suitable for exterior and interior use

DESCRIPTION

SWAN PLUS EMULSION is acrylic paint suitable for interior and exterior use. It offers very good coverage and a smooth and bright finish with resistance to ageing. It presents great surface adhesion properties, resistance to washing and atmospheric pollution. Protects exterior surfaces from weather conditions, and direct sunlight. It is suitable for plaster, concrete, cementboard, plasterboard, bricks and wood.

ADVANTAGES

- Very good coverage
- Bright white finish
- Resistance to ageing
- Great surface adhesion
- Easy application
- Protects surfaces from carbonization and chalking
- Discourages mould and algae growth

APPLICATIONS

- It is suitable for interior horizontal and vertical surfaces such as walls, ceilings, staircases etc. as well as exterior surfaces protected from direct exposure to rain - water.
- Application on plaster, concrete, cementboard, plasterboard, bricks and wood.

CONSUMPTION: 10 - 12 m²/Lt

SWAN ENAMEL PAINT

Solvent based wood and metal enamel paint suitable for interior and exterior use

DESCRIPTION

SWAN ENAMEL PAINT is alkyd resin paint, suitable for exterior and interior use. It is suitable for wooden surfaces such as doors, windows, cupboards etc. as well as metallic surfaces. It offers very good coverage excellent surface adhesion properties and a smooth finish. It is resistant to water, extreme weather conditions and atmospheric pollution.

ADVANTAGES

- 2 in 1 application on wood and metal
- Excellent adhesion
- Excellent coverage
- Smooth finish
- Easy application
- Excellent resistance extreme weather conditions and frequent washing
- Colour stability
- Lead free

APPLICATIONS

- It is suitable for wooden surfaces such as doors, windows, cupboards etc.
- It is suitable for metallic surfaces such as doors, windows, rails etc

CONSUMPTION: 10 - 12 m²/Lt

SWAN ENAMEL AQUA

Waterbased wood and metal enamel paint suitable for interior and exterior use

DESCRIPTION

SWAN ENAMEL AQUA is premium quality water-based enamel paint, based on new technology environmentally and user friendly raw materials. It is suitable for exterior and interior use. It does not contain dangerous substances, such as heavy metals, free formaldehyde, aromatic solvents. It is suitable for wooden surfaces such as doors, windows, cupboards etc. as well as metallic surfaces. It offers very good coverage, excellent surface adhesion properties and a smooth finish. It is resistant to water, extreme weather conditions and atmospheric pollution.

ADVANTAGES

- 2 in 1 application on wood and metal
- Waterbased – environmentally and user friendly
- Excellent adhesion
- Excellent coverage
- Smooth finish
- Easy application
- Excellent resistance extreme weather conditions and frequent washing
- Colour stability
- Lead free

APPLICATIONS

- It is suitable for wooden surfaces such as doors, windows, cupboards etc.
- It is suitable for metallic surfaces such as doors, windows, rails etc

CONSUMPTION: 10 - 12 m²/Lt

SWAN VELATURA AQUA

Waterbased undercoat for enamel paints suitable for interior and exterior use

DESCRIPTION

SWAN VELATURA AQUA is a fast drying acrylic waterbased undercoat suitable for exterior and interior use. It provides a perfect substrate for wooden surfaces and walls for finishing with SWAN solvent or waterbased enamel paints. It offers superior coverage and whiteness, smooth finish and easy sanding.

ADVANTAGES

- Waterbased – environmentally and user friendly
- Excellent adhesion
- Excellent coverage
- Smooth finish
- Easy sanding
- Lead free

APPLICATIONS

- It is ideal for wooden surfaces such as doors, windows, cupboards etc.
- It is suitable for walls and ceilings

ZINC SHEEN EPOXY 1K

Anticorrosive zinc galvanizing primer - paint

DESCRIPTION

ZINC SHEEN is a rich in zinc dust acrylic galvanizing primer-paint. It gives high and long-lasting anticorrosive protection. It is designed for the repair of pre-galvanized steel surfaces and the cathodic protection of metals. Ideal for use in production, maintenance and construction industries. It offers genuine cathodic protection on metals even under extremely acid, alkaline and high humidity environment. Its high performance has attracted big attention from demanding consumers.

ADVANTAGES

- Outstanding corrosion prevention
- Fast drying
- Excellent filling properties
- Resistant to petrol, chemicals and weather influences
- Excellent adhesion properties

APPLICATIONS

- Suitable for metallic surfaces such as pumps, pipes, machinery, stairs, rails and most steel surfaces.
- Suitable for pre-galvanized materials such as water tanks, automotive and marine parts.

CONSUMPTION: 8 - 10 m²/Lt

SWAN RUST PRIMER

Extra strong anticorrosive metal primer

DESCRIPTION

SWAN RUST PRIMER is a quick drying anticorrosive primer based on alkyd resins suitable for ferrous substrates. Protects metal surfaces from corrosion such as coaches, rails, fences and metal constructions. Offers exceptional adhesion and coverage, elasticity and excellent leveling capacity.

ADVANTAGES

- Excellent long lasting anti-corrosive action
- Excellent adhesion properties
- Excellent coverage
- Elastic
- Excellent leveling capacity

APPLICATIONS

- It is suitable for metal surfaces such as coaches, rails, fences and all metal constructions

CONSUMPTION: 8 - 12 m²/Lt

RUST CONVERTER

Rust converter - converts rust into a tough protective surface

DESCRIPTION

RUST CONVERTER is a supreme product that converts rust (new and old) into a protective black polymeric coating that adheres firmly to metal surfaces, preventing further corrosion. It seals up the metal surface from moisture and oxygen and prolongs surface protection.

ADVANTAGES

- Excellent finishing - enhances the natural beauty of stones
- Excellent penetration
- Excellent water repellence
- Long lasting protection from stains, rain, humidity, fungi, mould etc.
- Resistance to temperature variations
- Excellent UV resistance
- Easy to apply – ready to use material
- Interior and exterior use

APPLICATIONS

- Ideal for use on rusted iron or steel surfaces such as industrial equipment and machinery, agricultural equipment, metal constructions (rails, gutters, hinges, fences, gates, outdoor fixtures etc), ship repair

CONSUMPTION: 10 m²/Lt

SWAN MINIO

Anticorrosive wood and metal primer

DESCRIPTION

SWAN MINIO is a specially formulated high technology anticorrosive primer suitable for metal and wood. It offers high and long lasting anticorrosive protection to ferrous substrates as well as protection of wooden surfaces from rot and decay. It presents strong adhesion properties, elasticity and outstanding durability against extreme weather conditions. Orange color.

ADVANTAGES

- Offers high and long lasting anticorrosive protection
- Excellent adhesion
- Outstanding durability against extreme weather conditions
- Elasticity

APPLICATIONS

- Ideal for metal surfaces such as rails, doors, underwater keels, pipes and metal constructions in industrial environment and coastal areas.
- Protection of wooden surfaces exposed to marine environment such as boats, decks, poles etc..

MINOS FIRE COAT

Premium quality, high temperature paint 650°C

DESCRIPTION

MINOS FIRE COAT is premium quality, durable, high temperature paint suitable for temperatures up to 650°C. It is ideal for protection, renovation and repair applications. Dries fast and provides an excellent durable finish that will not burn, chip or flake. It is suitable for engine and exhaust - system parts, oven pipes, chimneys, barbeques and DIY projects around the house.

ADVANTAGES

- High temperature resistance
- Excellent coverage and filling power
- Long term durability
- Excellent adhesion
- Excellent flow, smooth surface
- Fast-drying
- Durable colour
- Corrosion protection
- Will not burn, chip or flake
- Easy to use

APPLICATIONS

- MINOS FIRE COAT is ideal for prime application, protection, renovation and repair applications.
- It is suitable for engine and exhaust - system parts, oven pipes, chimneys, barbeques and DIY projects around the house

CONSUMPTION: 5 - 7 m²/Lt

PREMIUM FLOOR PAINT

2 component acrylic - urethane professional paint for cement floors

DESCRIPTION

PREMIUM FLOOR PAINT is a high performance 2 component acrylic – urethane paint for concrete floors. It has excellent adhesion properties, hardness and strong resistance to abrasion and mechanical wear. It is highly resistant to chemicals, solvents, refinery products and caustic liquids. Its special acrylic – urethane technology guarantees a durable, long-lasting finish.

ADVANTAGES

- Excellent adhesion properties and hardness
- Excellent abrasion and mechanical wear resistance
- Excellent resistance to chemicals, solvents, refinery products and caustic liquids
- Guarantees a durable, long-lasting finish.

APPLICATIONS

- Suitable for painting concrete floors of factories, warehouses, garages and generally of any surface exposed to everyday wear from abrasion and chemicals.
- Suitable for application on concrete, screeds, stone, metallic and wooden surfaces

CONSUMPTION: 7 - 10 m²/Lt

PREMIUM FLOOR PAINT AQUA 2K

Professional grade waterbased 2 component epoxy paint for concrete floors

DESCRIPTION

PREMIUM FLOOR PAINT AQUA is a high performance waterbased 2 component epoxy paint for concrete floors. It has excellent adhesion properties, hardness and strong resistance to abrasion and mechanical wear. It is highly resistant to chemicals, solvents, refinery products and caustic liquids. PREMIUM POOL PAINT

2 component acrylic - urethane professional paint for swimming pools

DESCRIPTION

PREMIUM POOL PAINT is a high performance 2 component acrylic – urethane paint for swimming pools. It has excellent adhesion properties, elasticity, hardness and strong resistance to abrasion. It is highly resistant to sun UV rays, chemicals, water, seawater and suntan oils. Its special acrylic – urethane technology guarantees a durable, long-lasting finish.

ADVANTAGES

- Excellent adhesion properties and elasticity
- Excellent wear and UV resistance
- Excellent durability to water and seawater
- Excellent resistance to chemicals
- Guarantees a durable, long-lasting finish

APPLICATIONS

- Suitable for painting swimming pools of interior and exterior areas.
- Suitable for application on concrete, screeds, stone, metallic and wooden surfaces

DESCRIPTION

PREMIUM POOL PAINT AQUA is a high performance waterbased 1 component paint based on synthetic resin dispersion for swimming pools. It has excellent adhesion properties, elasticity, hardness and strong resistance to abrasion. It is highly resistant to sun UV rays, chemicals, water, seawater and suntan oils. Its special acrylic – urethane technology guarantees a durable, long-lasting finish

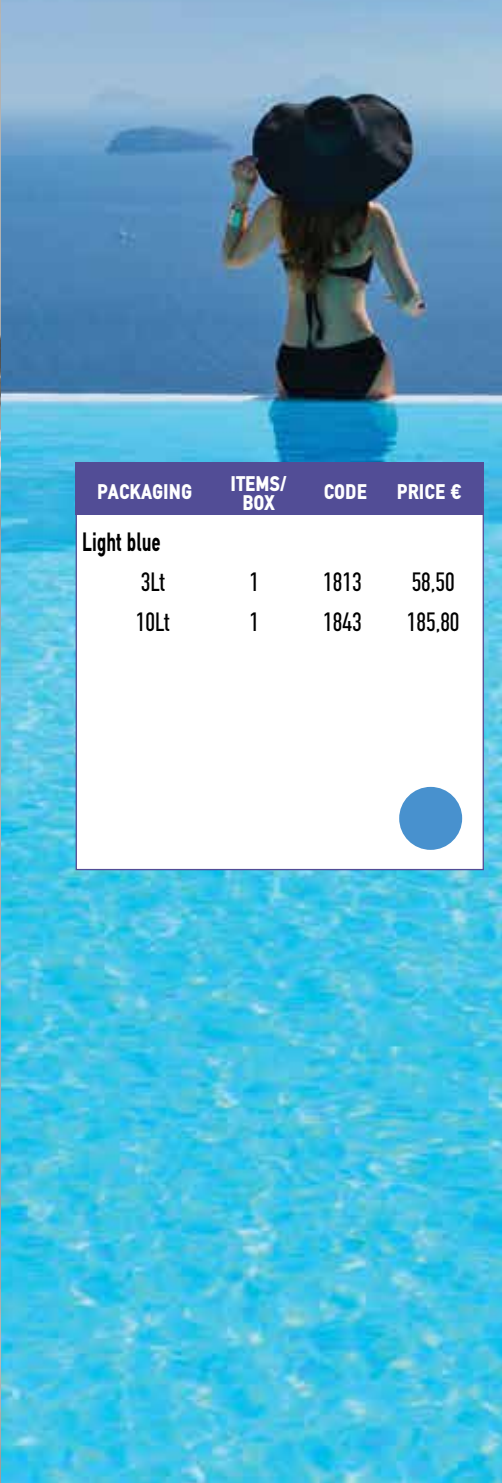

ADVANTAGES

- Excellent adhesion properties and elasticity
- Excellent wear and UV resistance
- Excellent durability to water and seawater
- Excellent resistance to chemicals
- Guarantees a durable, long-lasting finish

APPLICATIONS

- Suitable for painting swimming pools of interior and exterior areas.
- Suitable for application on concrete, screeds, stone, metallic and wooden surfaces

CONSUMPTION: 5 - 10 m²/Lt

SWAN SIGNAL FLEX

Solvent based professional grade line marking paint

DESCRIPTION

SIGNAL FLEX is a high quality, single component line marking paint based on synthetic resins, suitable for professional use. Offers excellent coverage and it is very hard wearing with resistance to UV rays, traffic and ageing. Paint visibility at night can be enhanced by scattering glass beads designed for this purpose on the paint coat. It is available in white and yellow as well as other colours for professional users.

ADVANTAGES

- Excellent adhesion properties
- Excellent resistance to ageing
- Excellent resistance to UV rays
- Easy application
- Quick drying formula
- May be enhanced with glass beads
- Professional product

APPLICATIONS

- Line marking asphalt and concrete roads, car parks, vehicle and airport signage, factory and warehouse line marking, tennis and basketball courts and much more.
- Suitable for horizontal and vertical application.
- Suitable for application on asphalt, cement, concrete, plaster and metal surfaces.
- In order to achieve reflectivity of the paint apply glass beads on the wet film 350 gr/m²

CONSUMPTION: 1 - 2 m²/Lt for 200 µm layer thickness

SWAN BETOFLEX DUR

Extra strong solvent based, acrylic paint for exposed concrete

DESCRIPTION

SWAN BETOFLEX DUR is solvent based acrylic masonry paint, specially formulated to provide long lasting protection to exposed concrete. It protects the reinforced concrete from corrosion. It offers excellent coverage and surface adhesion properties, dries quickly to a smooth and tough finish highly durable against adverse weather conditions and atmospheric pollution. It is suitable for floors and walls of exterior or interior areas. It is also suitable for plaster, bricks, stones etc.

ADVANTAGES

- Provides long lasting protection to exposed concrete
- Highly resistant to frequent washing, ageing and atmospheric pollution
- Very elastic
- Excellent coverage
- Excellent surface adhesion
- Easy application
- Protects surfaces from carbonization and chalking
- Discourages mould and algae growth

APPLICATIONS

- It is suitable for horizontal and vertical building surfaces such as floors for domestic use, walls, patios, stairs, courtyards, stairs, pavements, patios, garages etc.
- Specially formulated for concrete surfaces.
- Also suitable for plaster, cementboard, plasterboard, bricks wood etc.

SWAN COLOUR colour in syringes

**The easy way to create shades
with concentrated color syringes**

DESCRIPTION

Easy colouring system

A world full of wonderful color combinations. Discover your preferred ones in the new SWAN COLOR coloring system.

The new SWAN COLOR colouring system consists of 18 ready-made, highly concentrated high-quality pigments in a convenient 20ml dispensing syringe packaging. SWAN COLOR has been based on the most popular shades in Greece. By selecting the appropriate paint base depending on the surface, you can create the desired shade using SWAN COLOR easily, quickly and economically.

Unlimited colors and countless color combinations make the SWAN COLOR colouring system ideal for decorators, painters and consumers who like to experiment, since they make real-time shades at the space they are renovating.

SWAN COLOR technology enables testing once the tint has been prepared in real time in the room and can be changed and adjusted accordingly.

SWAN COLOR offers the best value for money solution.

ADVANTAGES

- Easy application
- Creates countless shades and colour combinations
- High tinting power
- Real time testing of the shade
- Flexibility of shade changes
- Color stability
- Excellent resistance to frequent washing and air pollution

APPLICATIONS

- With SWAN COLOR you can colour acrylic and emulsion paints, water-based or solvent based enamel paints and tile grouts.
- Use SWAN COLOR with the white base of DÉCOR XYLOFARM AQUA for creating countless shades for all wood surfaces such as doors, windows, furniture, pergolas, fences, linings, ceilings, etc.

SWAN COLOUR BASIC COLOURS

Basic acrylic colours

DESCRIPTION

The new SWAN COLOR BASIC COLORS range consists of 8 water-soluble acrylic colours, suitable for indoor and outdoor use. SWAN COLOR BASIC COLORS stand out for their excellent tinting power, ease of use and application, high coverage and resistance to frequent washing and ageing. SWAN COLOR BASIC COLORS can be used as pigments for colouring of emulsion and acrylic paints, as ready-made paints for application on properly prepared interior or exterior surfaces or for drawing.

ADVANTAGES

- Easy application
- High tinting power
- Mat finish
- Uniform finish
- Real time testing of the shade
- Color stability
- High coverage and performance
- Excellent resistance to frequent washing and air pollution

APPLICATIONS

- SWAN COLOR BASIC COLORS are suitable for tinting acrylic and emulsion paints.
- They can be applied directly on building surfaces of indoor and outdoor areas such as walls, plasterboard, wood, etc.
- Artistic applications - painting
- With SWAN COLOR BASIC COLORS, you can easily create, customize, and economically adjust the shade that suits your space.
- Ideal for decorators, painters and DIY applications.

ISOMIX CEMENT COLOR

Premium powdered oxide additive for colouring cement and mortars

DESCRIPTION

CEMENT COLOR is a coloured powder based on super fine cement oxides used for permanent coloring of cement mixtures. It is UV resistant, does not influence setting times of slurries and it is easy and economical to use.

ADVANTAGES

- Premium quality
- High performance
- Maximum colour saturation
- Weather resistant

APPLICATIONS

- Suitable for all cement applications where aesthetic coloring is required such as mortars for flooring, tiling or plastering, decorative mortars and slurries.

PGP FAUX WOOD PRIMER

The ideal solution to transform and renew old surfaces to look like beautiful and warm real wood. Base coat.

DESCRIPTION

PGP FAUX WOOD PRIMER is the basecoat for the transformation of any surface to a wood graining effect. It forms the base for the application of PGP FAUX WOOD FINISH. Provides excellent surface adhesion properties, coverage and anticorrosive protection. Can be applied to most hard surfaces. It is available in 3 different colours which are combined with the 6 colours of PGP FAUX WOOD FINISH to give the natural look of wood grain finish.

ADVANTAGES

- Easy application
- Excellent surface adhesion properties
- Anticorrosive protection
- Applied to most surfaces
- Available in 3 colour

APPLICATIONS

- It is the ideal solution to transform and renew old surfaces to look like beautiful and warm real wood.
- Can be applied on metallic surfaces, MDF, chipboard, melamine, wood and many plastic surfaces, plasterboards, cement, plaster etc

CONSUMPTION: 8 - 10 m²/Kg

PGP WOOD GRAINING TOOL

DESCRIPTION

Special tool that creates authentic wood grains and knots on any solid and smooth surface. It imitates real looking wood grain that you not even notice the difference. Used with PGP FAUX WOOD FINISH.

PGP ART GLAZING AQUA

Waterbased special decorative paint which transforms any surface to an artistic creation

DESCRIPTION

PGP ART GLAZING AQUA is a waterbased special decorative paint which transforms any surface to an artistic creation including marble effect finish. It is an easy and cost effective way to give any surface a decorative, aesthetic effect. All you need is creativity, imagination and willingness to experiment. Combine opposite or light and dark colours. It can be used on any kind of hard and smooth surface.

ADVANTAGES

- Odourless
- Easy application
- Cost effective
- Applied to most surfaces
- Available in white and transparent base

APPLICATIONS

- It is the ideal solution to transform any surface to an artistic creation
- Can be applied on metallic surfaces, MDF, chipboard, melamine, wood and some plastic surfaces, plasterboards, cement, plaster etc

LIQUID GLASS

Transparent 2 component epoxy resin, ideal for making special decorative – artistic applications

DESCRIPTION

LIQUID GLASS is a tough, transparent two-component epoxy resin, which offers great resistance to temperature, humidity and solvents. It is ideal for impregnation, molding and clear casting dissimilar materials and ornaments without shrinking. It is ideal for making special decorative – artistic applications with sculptured objects, by filling voids and pores and forming a final glass-like surface. Use LIQUID GLASS to create fantastic artistic constructions for decoration and use.

ADVANTAGES

- Ultra-clear
- Excellent adhesion and bonding strength
- Excellent mechanical properties
- Excellent water
- High temperature resistance
- High resistance to most chemicals
- Can be colored with the transparent SWAN COLORMIX LIQUID GLASS colorants

APPLICATIONS

- Thousands of applications can be made with any idea and most materials. Tabletops, bowls, serving platters, stools, 3-D displays with leaves and flowers dried or pressed, shells, insects, pebble stones, mineral stones, souvenirs, jewelry, photographs, coins, seeds, peas, beans, pasta, spices, decorative wood constructions and much more.
- Transparent floor coatings with decorative elements such as pebbles, coins, and many other items.
- LIQUID GLASS is ideal for protection and decoration of many surfaces such as wood, metal, stone, ceramics, porcelain, cardboard, etc.
- Use your imagination, internet and You Tube for ideas and application methods

150 Decorative Materials & Colouring System

SWAN COLOUR LIQUID GLASS

Transparent colorants for coloring liquid glass, polyester and polyurethane materials

DESCRIPTION

You can color the liquid glass with the transparent SWAN COLORMIX LIQUID GLASS colorants that preserve the transparency of liquid glass while providing a great color effect to your creations.

It takes a lot of care to get the desired result. The colorants are very concentrated. 1-3 drops can be enough to color 50 grams of finished product..

METHOD OF APPLICATION

Add just a few drops of colorant in component A (resin). 2-3 drops might be enough for 50gr. Stir well to blend using a tongue depressor. Special attention must be given to the bottom and sides of the container. Add part B (hardener) and mix well. Too much colorant will inhibit the cure of the resin. Consult the LIQUID GLASS Technical Data Sheet.

152 Tile Adhesives

ISOMIX ACRYLIC

Cement based white acrylic wall and floor ceramic tile adhesive C1T

DESCRIPTION

ISOMIX ACRYLIC is a cement-based white acrylic adhesive for bonding wall and floor ceramic tiles. It contains high strength Portland cement, carefully selected inert fillers, special additives and resins, which offer excellent adhesion even to difficult surfaces. It shows excellent workability, moisture resistance, increased open time and is qualified as non-slip. It is suitable for interior and exterior use. It is classified as a type C1T adhesive according to EN 12004.

ADVANTAGES

- Excellent adhesive strength
- Excellent workability
- Moisture resistance
- Excellent quality of raw materials
- Exterior and interior use
- Easy, clean and fast application

APPLICATIONS

- Bonding of any kind of tiles on walls or floors on various substrates, such as concrete, plaster, blockwork and most common building surfaces.
- Bonding of light marble and granite tiles

CONSUMPTION: 3 - 4 Kg/m²

PACKAGING	ITEMS/BOX	CODE	PRICE €

ISOMIX SUPER ACRYLIC

Cement based white acrylic wall and floor ceramic tile adhesive C2T

DESCRIPTION

ISOMIX SUPER ACRYLIC is an extra strong, cement-based, white acrylic adhesive for bonding wall and floor ceramic tiles. It contains high strength Portland cement, carefully selected inert fillers, special additives and resins, which offer excellent adhesion even to difficult surfaces. It shows excellent moisture resistance and workability, increased open time and is qualified as non-slip. It is suitable for interior and exterior use. It is classified as a type C2T adhesive according to EN 12004.

ADVANTAGES

- Excellent adhesive strength
- Excellent workability
- Excellent moisture and frost resistance
- Excellent quality of raw materials
- Exterior and interior use
- Easy, clean and fast application

APPLICATIONS

- Bonding of any type of absorptive or non-absorptive tiles on walls or floors on various substrates, such as concrete, plaster, block work, aerated concrete blocks, plasterboard, cement board and most common building surfaces.
- Bonding most tiles on various substrates where high adhesion and moisture resistance are required.
- Bonding marble and granite tiles.
- It is suitable for public and industrial areas where substrates are exposed to heavy circulation and adverse weather conditions

CONSUMPTION: 3 - 4 Kg/m²

ISOMIX FLEX

Elastic cement based white acrylic wall and floor ceramic tile adhesive C2TE

DESCRIPTION

ISOMIX FLEX is an extra strong, plastoelastic, cement based white acrylic adhesive for bonding wall and floor ceramic tiles. It contains high strength Portland cement, fine quality aggregates, special additives and resins, which offer excellent adhesion even to difficult non-porous surfaces. It shows high adhesion strength on horizontal and vertical substrates, elasticity and moisture resistance. It increases resistance to earthquake damage and is ideal for substrates with increased contraction – expansion properties. It is suitable for interior and exterior use. It is classified as type C2TE adhesive according to EN 12004.

ADVANTAGES

- Excellent adhesive strength
- Elasticity
- Excellent workability
- Excellent adhesion even on difficult substrates
- Moisture and frost resistant
- Excellent quality of raw materials
- Exterior and interior use
- Easy, clean and fast application

APPLICATIONS

- Bonding any kind of absorptive or non-absorptive tiles on walls or floors on various substrates such as plaster, concrete, plasterboard, cementboard, blockwork and most common building surfaces.
- Ideal for bonding granite and marble tiles, glass mosaic tiles or any kind of natural building material.
- Suitable for bathrooms, terraces, verandas, mosaics, old marble and floors with heavily used floors

CONSUMPTION: 2,5 - 4 Kg/m²

PACKAGING	ITEMS/BOX	CODE	PRICE €
25Kg	1	01780	21.75

ISOMIX POWERFLEX

Extra strong super elastic cement based white acrylic wall and floor ceramic tile adhesive C2TE S1

DESCRIPTION

ISOMIX POWER FLEX is extra strong, very elastic, cement-based white acrylic adhesive for bonding wall and floor ceramic tiles. It contains high strength Portland cement, fine quality aggregates, special additives and resins, which offer excellent adhesion even to difficult non-porous surfaces. It shows high adhesion strength on horizontal and vertical substrates, elasticity, moisture and frost resistance and is qualified as non-slip. It increases resistance to earthquake damage and is ideal for substrates with increased contraction – expansion properties. It is suitable for interior and exterior use. It is classified as type C2TE S1 adhesive according to EN 12004.

ADVANTAGES

- Excellent adhesive strength
- High elasticity
- Excellent workability
- Excellent adhesion even on difficult substrates
- Moisture and frost resistant
- Excellent quality of raw materials
- Exterior and interior use
- Easy, clean and fast application

APPLICATIONS

- Bonding any type of absorptive or non-absorptive tiles on walls or floors on various substrates, such as plaster, concrete, plasterboard, cementboard, block work, aerated concrete blocks, and most common building surfaces.
- Bonding granite and marble tiles, glass mosaic tiles or any kind of natural building material.
- Suitable for bathrooms, terraces, verandas, mosaics, old marbles, Karystos or Pylio type tiles, heavily used floors, water tanks, swimming pools, Jacuzzi and floors with under floor heating

CONSUMPTION: 2,5 - 4 Kg/m²

154 Tile Adhesives

CERAFIX & GROUT

Ready mixed white acrylic wall and floor tile adhesive and grout

DESCRIPTION

CERAFIX & GROUT is ready mixed white acrylic wall and floor tile adhesive and grout. It contains acrylic resins, inert particles and special additives which offer excellent adhesion on vertical and horizontal building surfaces. Presents excellent moisture resistance and high yield. It is suitable for interior and exterior use.

ADVANTAGES

- Ready mixed formula
- Easy to apply – no mixing, no mess
- Excellent bonding strength
- Excellent workability
- Extended open time
- Moisture resistance
- Interior and exterior use
- Easy, clean and fast application

APPLICATIONS

- Fixing and grouting ceramic tiles and decorative bricks on walls and floors on various substrates, such as concrete, plaster, blockwork, wood, cementboard, plasterboard, MDF and most common building surfaces.
- Fixing tiles on porous surfaces such as unpolished marble, aerated concrete blocks, cement tiles etc.
- Suitable for bathrooms and exterior applications
- Suitable for bonding and fixing thermoinsulation material such as expanded and extruded polystyrene

ISOMIX TILE GROUT

Cement based acrylic ceramic tile grout for wall and floor joints CG2

DESCRIPTION

ISOMIX TILE GROUT is water-repellent and high strength cement based acrylic tile grout. It contains high strength portland cement, carefully selected fine aggregate, acrylic resins and special additives, which offer excellent grouting even to difficult surfaces. It is suitable for grouting applications 0- 8 mm. It is classified as type CG2 / EN 13888.

ADVANTAGES

- High mechanical strength
- Excellent adhesion properties
- Moisture and frost resistant
- Stain resistant - easy clean
- Durable performance
- Colour stability
- Interior and exterior use
- Rapid and clean application

APPLICATIONS

- It is suitable for grouting tile joints on vertical and horizontal surfaces for interior and exterior applications.
- Grouting of low absorption tiles on various substrates where high adhesion and moisture resistance are required.
- Grouting ceramic granite, glass mosaic tiles and natural stone, for interior and exterior applications..

TILE SPACERS are plastic spacers that speed construction and assure uniform placement of tiles. Available in cross shape and T shape for the ends.

156 Plastering & Repair Mortars

ISOMIX ONE COAT PLASTER

One coat application white plaster for interior and exterior use

DESCRIPTION

ISOMIX ONE COAT PLASTER is a one-coat application white plaster, suitable for interior and exterior building surfaces. It contains high strength white Portland cement, hydrated lime, selected fillers and special additives that offer excellent adhesion on most substrates. It offers a very rapid and easy application.

ADVANTAGES

- High strength
- Excellent adhesion
- Moisture and frost resistant
- Does not crack nor shrink
- Interior and exterior use
- Rapid and easy application

APPLICATIONS

- One coat plastering of interior and exterior building surfaces.
- It replaces the application of mortar and final plaster in one coat. It is applied over a layer of spray-applied anchoring plaster..

CONSUMPTION: 12 Kg/m²/cm layer thickness

PACKAGING	ITEMS/ BOX	CODE	PRICE €

ISOMIX WALL STUCCO

Extra fine, white acrylic surface filler

DESCRIPTION

ISOMIX WALL STUCCO is high quality white, extra fine, acrylic surface filler, suitable for smoothing and preparing surfaces prior to painting. It contains white Portland cement, high quality extra fine aggregates, acrylic resins and special additives that offer excellent adhesion, durable finish and moisture resistance. The end product is a lump-free paste with excellent workability. It does not crack nor shrink, offers easy sanding and perfect finish. It allows surface breathing and is environmentally friendly.

ADVANTAGES

- Perfect smooth finish
- High strength
- Excellent workability
- Easy sanding
- Excellent adhesion
- Moisture and frost resistant
- Interior and exterior use
- Rapid and clean application

APPLICATIONS

- It is suitable for smoothing and preparing as well as filling minor cracks of interior and exterior walls and ceilings prior to painting.
- It is suitable for plaster, smooth concrete surfaces, aerated concrete blocks, plasterboards, cementboards etc

CONSUMPTION: 1 Kg/m² for layer thickness 1mm.

158 Plastering & Repair Mortars

ISOMIX STUCCO POWDER

White, resin fortified, high build surface filler, suitable for smoothing and preparing surfaces prior to painting

DESCRIPTION

ISOMIX STUCCO POWDER is high quality, white, resin fortified, high build surface filler, suitable for smoothing and preparing surfaces prior to painting. It contains white Portland cement, high quality aggregates, acrylic resins and special additives that offer excellent adhesion, durability and moisture resistance. It is easily mixed with water and forms a lump free paste with excellent workability. When dry it does not crack or shrink, offers easy sanding and perfect finish. Allows surface breathing and it is environmental friendly.

ADVANTAGES

- Covers imperfections
- Smooths uneven surfaces
- High build – increased coverage
- High yield - economy
- High strength
- Excellent workability
- Excellent adhesion
- Easy sanding
- Moisture and frost resistant
- Suitable for buildings close to the seaside
- Interior and exterior use
- Rapid and clean application

APPLICATIONS

- It is suitable for levelling uneven surfaces, smoothing interior and exterior walls and ceilings and can be over painted with emulsion or acrylic paints.
- It is suitable for plaster, smooth concrete surfaces, aerated concrete blocks, plasterboards, cementboards etc. ISOMIX STUCCO POWDER due to its special formulation offers excellent coverage especially for uneven surfaces and easy filling capacity (1-4mm). It replaces the multiple layer application of extra fine acrylic fillers

ISOMIX FERRO PRIME

Brushable cement based dry mix anticorrosion sealing slurry

DESCRIPTION

ISOMIX FERRO PRIME is brushable cement-based dry mix anticorrosion sealing slurry. It is suitable for protection of steel reinforcements from corrosion and also acts as a bonding agent between the old and new mortar and concrete in repair works. Based on the latest innovative technology M.C.I. (migratory corrosion inhibitors) it exhibits excellent anti-corrosion and adhesion properties Colour dark red.

ADVANTAGES

- Excellent adhesion properties
- Excellent corrosion resistance
- High mechanical strength
- Resistance to high temperatures
- Resistance to moisture and frost
- Resistance to chalking
- Resistance to cracking

APPLICATIONS

- Protection of exposed steel reinforcements in repair works of damaged concrete from earthquakes, carbonization and frost or from inefficient cover during concrete pouring.
- Protection of steel reinforcements in thin building elements or in cases where the structural elements are exposed in high humidity.
- Application as a bonding agent between old and new concrete layer or mortar.

CONSUMPTION: 0,07 - 0,13 Kg/m of steel reinforcement bar for anti corrosion protection. 2 Kg/m² as a bonding agent.

ISOMIX REPAIR PLASTER RP 300

Fast setting one coat application white repair plaster

DESCRIPTION

ISOMIX REPAIR PLASTER RP 300 is fast-setting one-coat application white plaster, waterproof, suitable for plaster repairs on old or new building surfaces. It contains high strength white Portland cement, lime, fillers and special additives that offer excellent adhesion on most substrates. It offers a very rapid and easy application.

ADVANTAGES

- Fast setting
- High strength
- Excellent adhesion
- Moisture and frost resistant
- Does not crack nor shrink
- Suitable for buildings close to the seafront
- Interior and exterior use
- Rapid and easy application -just add water

APPLICATIONS

- Repair of damaged areas of plaster on walls and ceilings of new and old building constructions.
- Repair of internal and external wall corners and damaged edges.
- Suitable for repairing wall irregularities due to damage from frost.
- Suitable for use on concrete, bricks, cement surfaces, stones, concrete blocks, aerated concrete blocks etc..

CONSUMPTION: 12 - 14 Kg/m²/cm layer thickness

ISOMIX FIRE BRICK

Fireproof, cement based adhesive for bonding and grouting firebricks

DESCRIPTION

ISOMIX FIRE BRICK is a specially formulated fireproof, cement-based, adhesive for bonding and grouting firebricks. It contains high strength fireproof cement, fine quality quartz aggregate, special additives and resins, which offer excellent strength and resistance to high temperatures and extensive temperature changes. It presents high adhesion strength, moisture resistance and excellent workability. It is suitable for interior and exterior use.

ADVANTAGES

- Excellent quality of raw materials
- Excellent resistance to high temperatures (+1400°C)
- Excellent moisture resistance
- Excellent adhesive strength
- Excellent workability
- Exterior and interior use
- Easy, clean and fast application

APPLICATIONS

- Suitable for fixing and grouting all kinds of firebricks in places where high temperatures are reached such as fireplaces, wood ovens, stoves, chimneys, barbeques etc.
- It is also suitable for repairing damaged mortar joints and firebricks

CONSUMPTION: Consumption depends on the dimensions of the firebrick and the width of joint. A rough indication of consumption for a fireplace or a barbeque is 50 – 60 kg of dry mix

ISOMIX BUILDING MORTAR

Cement based mortar for bonding most types of construction materials

DESCRIPTION

ISOMIX BUILDING MORTAR is an extra strong, cement-based mortar for bonding most types of construction materials (brickwork etc.). It contains high strength Portland cement, lime, selected aggregates and special additives which offer excellent adhesion strength, moisture and frost resistance. It presents excellent workability and easy, fast and clean application. It is suitable for interior and exterior use. It is classified as a type M5 adhesive according to EN 998.2.

ADVANTAGES

- Excellent adhesive strength
- Excellent moisture and frost resistance
- Exterior and interior use
- Easy, clean and fast application – just add water

APPLICATIONS

- Fixing any kind of building material such as bricks, cement blocks, natural stones, aerated concrete blocks, sidewalk tiles etc of interior and exterior walls and other construction surfaces.

CONSUMPTION: 20 kg of dry mix / m² for bricks 6 X 9 X 12cm

ISOMIX MECHANIC R2

Fiber reinforced cement based repair mortar R2

DESCRIPTION

ISOMIX MECHANIC is a high strength, fiber-reinforced cement-based repair mortar. It contains high strength cement, special resins, fibers and additives, which offer excellent adhesion to concrete surfaces. It protects concrete elements from corrosion, offers water resistance and has excellent adhesive strength and workability. It is suitable for interior and exterior use for layers up to 3cm thick. Specification R2.

ADVANTAGES

- Excellent adhesion
- Excellent anti-corrosive protection
- Low water penetration
- Volume stability
- Excellent workability
- Exterior and interior use

APPLICATIONS

- Demanding repairs of concrete elements.
- Repair of irregularities on a concrete surface after demolding.
- Restoration and repairs of broken edges, holes and ornaments on horizontal and vertical surfaces.
- Restoration of broken edges on balconies, staircases, pillars, wells, drains and tunnels.
- Suitable for layers up to 30 mm thick.

CONSUMPTION: 16 Kg/m²/cm of layer thickness

PACKAGING	ITEMS/BOX	CODE	PRICE €

ISOMIX MECHANIC R4

Fiber reinforced cement based repair mortar R4

DESCRIPTION

ISOMIX MECHANIC is a high strength, fiber-reinforced cement-based repair mortar. It contains high strength cement, special resins, fibers and additives, which offer excellent adhesion to concrete surfaces. It protects concrete elements from corrosion, offers water resistance and has excellent adhesive strength and workability. It is suitable for interior and exterior use for layers up to 3cm thick. Specification R4.

ADVANTAGES

- Excellent adhesion
- Excellent anti-corrosive protection
- Low water penetration
- Volume stability
- Excellent workability
- Exterior and interior use

APPLICATIONS

- Demanding repairs of concrete elements.
- Repair of irregularities on a concrete surface after demolding.
- Restoration and repairs of broken edges, holes and ornaments on horizontal and vertical surfaces.
- Restoration of broken edges on balconies, staircases, pillars, wells, drains and tunnels.
- Suitable for layers up to 30 mm thick.

CONSUMPTION: 16 Kg/m²/cm of layer thickness

162 Building & Repair Mortars

ISOMIX RAPID CEMENT RC 100

Extra strong cement based fast setting repair mortar

DESCRIPTION

ISOMIX RAPID CEMENT RC100 is an extra strong cement-based fast-setting repair mortar. It is suitable for fast repairs and high mechanical strength fixing and anchoring applications. Its mechanical properties develop at a speed twenty times faster than standard cement. Presents excellent adhesion and sealing properties as well as excellent workability.

ADVANTAGES

- Excellent adhesion properties
- High mechanical strength
- Resistance to high temperatures
- Resistance to moisture and frost
- Resistance to chalking and corrosion
- Waterproofing properties

APPLICATIONS

- Quick repair of concrete structures in both horizontal and vertical surfaces.
- Fixing of plumbing and electrical installations, sanitary installations etc.
- Anchoring of machinery and support structures.
- Construction and repair of gutters, grooves and wells.
- Patching of cavities and holes, restoration of deteriorated cement surfaces

ISOMIX CEMENT FIX

Special binder based on high strength portland cement

DESCRIPTION

To **ISOMIX CEMENT FIX** is a special binder based on high strength portland cement, suitable for construction – building applications. Available in gray and white

ADVANTAGES

- Excellent adhesion
- Excellent waterproofing properties
- Excellent workability
- Excellent resistance to scrubbing
- Excellent resistance to extreme weather conditions and humidity
- Excellent resistance to ageing

APPLICATIONS

- It is suitable for production of high quality mortars for sealing and repair applications, plaster repair, and any other application where high quality cement is required.
- It can be mixed with common cement as reinforcing material.

** ISOMIX RESIN ACR 300 is available in 200Kg & 1000Kg upon request.*

ISOMIX RESIN ACR 300

Concentrated acrylic admixture based on nano technology for cement based mortars

DESCRIPTION

ISOMIX RESIN ACR 300 is a new nanotechnology bonding agent and admixture. It is based on pure acrylic resins and nano – microtechnology particles. It is ideal for improving and reinforcing concrete and cement admixtures. It offers improved adhesion, flexibility and reinforcing properties while offering UV resistance compared to synthetic latex emulsions.

ADVANTAGES

- New micro – nano technology • Strong adhesion to old and new concrete, steel and wood. • Waterproofing of cement admixtures • Crack prevention
- Reduced shrinking during curing • High frost resistance • Improved mechanical properties • Improved resistance to water, oil and chemicals
- High wear, abrasion, and impact resistance • High flexibility (at high resin concentration) • Improved workability with corresponding reduction of water in admixtures • Does not require antifoam • UV resistance

APPLICATIONS

- Improvement of admixture properties and that of self-leveling compounds and waterproofing cementitious membranes. The increased mechanical properties of the treated admixtures make them suitable for pre-cast concrete elements.
- Development of excellent adhesion and waterproofing properties for cementitious mixtures to seal areas even with negative water pressure.
- Development of waterproofing membranes for roofs, balconies, swimming pools etc.
- Improved adhesion between old and new concrete – cementitious mixtures.
- Improved waterproofing, adhesion and flexibility for cementitious tile adhesives and grouts (specially for swimming pools).
- Priming of porous and loose surfaces prior to application of cementitious mixtures, emulsion paints etc

** ISOMIX RESIN SBR 400 is available in 200Kg & 1000Kg upon request.*

ISOMIX RESIN SBR 400

Concentrated latex admixture based on nano technology for cement based mortars

DESCRIPTION

ISOMIX RESIN SBR 400 is a new nanotechnology concentrated reinforcing latex and admixture. It is based on pure synthetic resins and nano – microtechnology particles. It is ideal for the improvement of the adhesion, waterproofing, flexibility and workability of cement admixtures, plasters etc.

ADVANTAGES

- New nano – micro technology • Strong adhesion to old and new concrete, steel, wood and usual building surfaces. • Waterproofing of cement admixtures • Crack prevention • Diminished shrinkage during drying of cement admixtures • Improved frost resistance • Improved mechanical properties • Improved water, oil and chemical resistance • High impact and wear resistance • High elasticity (at high resin addition) • Improved workability with concurrent water content • Does not require antifoam

APPLICATIONS

- Improvement of the characteristics offered by treated cement admixtures, screeds, self-leveling screeds, plasters, waterproofing slurries etc. The improved mechanical properties make it a suitable product for pre-constructed concrete elements.
- Improvement of adhesion in mortars and as a primer.
- Improvement of adhesion between old and new concrete and screeds - mortars
- Priming and fortification of absorbing and deteriorated building surfaces
- Improvement of waterproofing, adhesion and elasticity in tiling adhesives and grouts.
- Improvement of adhesion, mechanical and waterproofing properties of plasters and cementitious admixtures

ISOMIX RESIN SBR 380

Latex admixture for cement based mortars

DESCRIPTION

ISOMIX RESIN SBR 380 is reinforcing polymer latex based on synthetic resins, suitable for the improvement of the adhesion, waterproofing, flexibility and workability of cement admixtures, plasters etc.

ADVANTAGES

- Strong adhesion to old and new concrete, steel, wood and usual building surfaces.
- Waterproofing of cement admixtures
- Crack prevention
- Diminished shrinkage during drying of cement admixtures
- Improved frost resistance
- Improved mechanical properties
- Improved water, oil and chemical resistance
- High impact and wear resistance
- High elasticity (at high resin addition)
- Improved workability with concurrent water content
- Does not require antifoam

APPLICATIONS

- Improvement of the characteristics offered by treated cement admixtures, screeds, self-leveling screeds, plasters, waterproofing slurries etc. The improved mechanical properties make it a suitable product for pre-constructed concrete elements.
- Improvement of adhesion in mortars and as a primer.
- Improvement of adhesion between old and new concrete and screeds - mortars
- Priming of absorbing and deteriorated building surfaces
- Improvement of waterproofing, adhesion and elasticity in tiling adhesives and grouts.

ISOMIX ASVESTOLIT

Air entrainer additive - lime substitute

DESCRIPTION

ISOMIX ASVESTOLIT is a special air entrainer additive used as a substitute to lime in mortars, plasters and lime-mortars. It offers most advantages of lime and does not have its disadvantages

ADVANTAGES

- Offers excellent workability
- Improves adhesion of wet mortars
- Does not affect steel reinforcement
- Prolongs pot life of the mixture
- The air entraining helps the plastification of the mortars
- Helps avoid the butterfly effect and the sagging of plasters
- Improves the strength of the walls
- Reduces the cost of the mixture
- Avoids the transport and storage cost of the lime
- It does not contain corrosive material and is user friendly

APPLICATIONS

- Ideal additive for wall mortars, plasters, renders, stone and marble paving mortars etc.
- Due to its transparency it is suitable for final coat plasters

ISOMIX XYLOTIP

Emulsified mineral oil - anti-bond mould release agent for wood and steel moulds

DESCRIPTION

ISOMIX XYLOTIP is specially emulsified mineral oil used as an anti-bond mold release agent for wood and steel molds for concrete. Allows easy removal of molds from construction sites. Its formulation and thixotropy offers high performance and low consumption. Covers up-to 50% more area than conventional mineral oil mould release agents.

ADVANTAGES

- Strong anti-bond performance
- Prevents bubble formation on the concrete surface
- Prevents concrete surface soiling from oily residues
- Allows plaster and paint adhesion on concrete
- Very economical due increased coverage
- Protects steel formwork from corrosion and preserves wooden molds

APPLICATIONS

Suitable for all types of form work, leaving the edge of the concrete structure clean and well formed

CONSUMPTION: 10 - 18 m²/Lt

ISOMIX FIBRODUR

Polypropylene mortar reinforcing fibers

DESCRIPTION

ISOMIX FIBRODUR consists of polypropylene fibers. They are produced from pure polypropylene with hydrophilic surface processing, special additives and in suitable dimensions so that they can be easily dispersed in cementitious mixtures improving plastic properties and workability.

ADVANTAGES

- Crack prevention – reduction caused from contraction and shrinkage during the initial curing period of concrete application.
- Improvement of flexural, bending, tensile, impact strength as well as cracking and deterioration.
- Improvement of waterproofing properties of concrete, mortars and screeds.
- Improvement of weather, soiling and temperature effects.
- Protection against carbonization of concrete.
- Improvement of homogeneity, coagulation and coherence, reducing segregation and separation thus increasing compaction.
- Improved chemical, acid, alkali and salt resistance.
- Does not offer resistance to chlorinated hydrocarbon solvents over 60°C.
- Easy flow through pumps and spraying equipment

APPLICATIONS

- ISOMIX FIBRODUR fibers have an extended application range such as:
- Floors (Industrial, stamped, cement paving slabs, concrete stepping slabs, concrete floor heating etc) building and repair mortars.
- Prefabricated concrete construction elements such as covings, lintels, paving elements, concrete fencing elements etc.
- Water tanks, swimming pools, silos, piping, irrigation channels etc.
- Spray concrete (GUNITÉ)
- Asphalt and plumbing ways

ISOMIX ART & CRAFT

Fast setting casting and moulding plaster

DESCRIPTION

ISOMIX ART & CRAFT is a controlled setting casting and molding plaster. It is based on a special gypsum quality with special additives that offer excellent workability, adhesion, strength and plasticity. It is easily mixed with water forming a creamy mixture with homogeneous characteristics. It is suitable for the production of a variety of ornamental plaster moldings, cornices and various artifacts. It allows the reproduction of slight details. Its strength and controlled setting time makes it suitable also for the production of molds.

ADVANTAGES

- Excellent surface adhesion properties
- Extra strong
- Easy to use - just added to water
- Homogenous paste texture
- Controlled setting
- Easily sanded
- Very low shrinkage
- Can easily be painted
- High plasticity

APPLICATIONS

- Construction of plaster ornamental objects
- Construction of cast made products
- Construction of hand-made artifacts
- Construction of molds

PACKAGING	ITEMS/BOX	CODE	PRICE €
4 Kg	5	07019	3,45

ISOMIX BAUGYPSUM

Fast setting plaster for building applications

DESCRIPTION

ISOMIX BAUGYPSUM is a fast setting plaster for building applications. It is based on high quality gypsum reinforced with special additives that offer excellent workability, adhesion and strength. It is easily mixed with water forming a creamy homogeneous mixture. It dries fast and presents almost no shrinkage. It is suitable for self-leveling and surface improvement projects.

ADVANTAGES

- Excellent surface adhesion properties
- Extra strong
- Easy to use - just add to water
- Homogenous paste texture
- Dries fast
- Easily sanded
- Very low shrinkage

APPLICATIONS

- Filling of holes and repair of cracks
- Setting- up and support of various fittings (electrical, and sanitary fittings, etc.)
- Self-leveling and surface improvement projects
- Construction of artworks

DIY Adhesives

SUPER GLUE

Cyanoacrylate general purpose adhesive

DESCRIPTION

SUPER GLUE is a medium to low viscosity instant cyanoacrylate general purpose adhesive. Bonds almost immediately on contact. It is designed to bond most metals, plastics, rubbers and ceramics in a variety of bonding applications. Cure times vary according to the materials being bonded, but most combinations are very fast, fixing in 3-15 seconds.

ADVANTAGES

- Bonds a variety of materials
- Fast curing
- Extra strong bonding
- Easy application

APPLICATIONS

- General purpose bonding of plastics, name plates to equipment (plastic), thread termination on book bindings.
- Suitable for bonding variety of other materials such as metal, cardboard, wood, leather, rubber, china etc.
- Recommended for use on small gaps or relatively smooth even surfaces.
- It is ideal for repairs and DIY applications

ART n' CRAFT

Solvent free paper glue based on PVA dispersion

DESCRIPTION

ART is a solvent free all-purpose white glue based on PVA dispersion, clear when dry. ART is ideal for arts and crafts. Sticks all usual craft materials quickly and permanently. The parts to be glued remain re-adjustable for a short time. Dries to a tough elastic film that stays transparent. Does not alter the original colour of the surfaces. It is offered in an easy to use bottle with resealable cap.

ADVANTAGES

- Excellent bonding
- Bonds a variety of materials
- Solvent-free adhesive
- Ideal for children
- Washes out of clothes
- Dries clear
- Elastic
- Easy application

APPLICATIONS

- Bonds paper and cardboard to each other as well as to textiles, leather, cork, dried and artificial flowers, felt and many other decorative materials for art & craft applications such as sand, shells, dried foodstuff etc.
- It is ideal for arts & craft, school – kindergarten use and much more.
- May be used diluted as paint reinforcement .

170 DIY Adhesives

ARALDITE INSTANT SYRINGE

2 part extra strong epoxy ultra fast adhesive - 90 seconds

DESCRIPTION

ARALDITE INSTANT is a multi-purpose, ultra-fast 2 component clear epoxy adhesive supplied in a syringe. It is a strong, long lasting, solvent free adhesive which is water resistant and can be painted or sanded. Sets in 90 seconds.

ADVANTAGES

- Extra strong bonding
- Ultra-fast
- Clear and colourless
- Easy application
- Bonds a variety of materials
- Temperature resistant (-30°C - +70°C)
- Humidity resistant
- Sandable and paintable
- Fills uneven breaks
- Withstands rough handling
- 100% solid content
- Solvent free

APPLICATIONS

ARALDITE INSTANT bonds a variety of materials including metal, wood, ceramics, masonry, glass, dry concrete, chipboard, leather, cardboard, most hard plastics, fabrics and rubbers (not suitable for polyethylene, polypropylene, Teflon, expanded polystyrene).

PACKAGING	ITEMS/BOX	CODE	PRICE €
Syringe 24ml	6	00605	10,60

ARALDITE RAPID TUBES

2 part extra strong epoxy very fast adhesive - 5 minutes

DESCRIPTION

ARALDITE RAPID is a multi-purpose, fast setting 2 component epoxy adhesive supplied in tubes. It is a strong, long lasting, solvent free adhesive which is water resistant and can be painted or sanded. Sets in 5 minutes.

ADVANTAGES

- Extra strong bonding
- Rapid set
- Easy application
- Bonds a variety of materials
- Temperature resistant (-30°C - +80°C)
- Humidity resistant
- Sandable and paintable
- Fills uneven breaks
- Withstands rough handling
- 100% solid content
- Solvent free

APPLICATIONS

ARALDITE RAPID bonds a variety of materials including metal, wood, ceramics, masonry, glass, dry concrete, chipboard, leather, cardboard, most hard plastics, fabrics and rubbers (not suitable for polyethylene, polypropylene, Teflon, expanded polystyrene)

ARALDITE STANDARD TUBES

2 part extra strong epoxy slow curing adhesive - 80 minutes

DESCRIPTION

ARALDITE STANDARD is a multi-purpose, heavy duty 2 component epoxy adhesive with long open time, supplied in tubes. It is a strong, long lasting, solvent free adhesive which is water resistant and can be painted or sanded. Perfect for complicated jobs which require adjustment thanks to a long open time. Sets in 8 hours.

ADVANTAGES

- Extra strong bonding
- Long working time
- Easy application
- Bonds a variety of materials
- Temperature resistant (-30°C - +80°C)
- Humidity resistant
- Sandable and paintable
- Fills uneven breaks
- Withstands rough handling
- 100% solid content
- Solvent free

APPLICATIONS

ARALDITE STANDARD bonds a variety of materials including metal, wood, ceramics, masonry, glass, dry concrete, chipboard, leather, cardboard, most hard plastics, fabrics and rubbers (not suitable for polyethylene, polypropylene, Teflon, expanded polystyrene).

172 DIY Adhesives

ARALDITE CRYSTAL TUBES

2 part extra strong epoxy very fast adhesive - 5 minutes ideal for invisible bonding

DESCRIPTION

ARALDITE CRYSTAL is a crystal clear, fast setting 2 component epoxy adhesive supplied in tubes. It is perfect for jobs that require invisible joins or high transparency. It is a strong, long lasting, solvent free adhesive which is water resistant and can be painted or sanded. Sets in 5 minutes

ADVANTAGES

- Extra strong bonding
- Specially formulated for glass and jewellery
- Transparent - invisible
- Rapid set
- Easy application
- Temperature resistant (-30°C - +80°C)
- Humidity resistant
- Sandable and paintable
- Fills uneven breaks
- Withstands rough handling
- 100% solid content
- Solvent free

APPLICATIONS

ARALDITE CRYSTAL bonds glass, jewellery, crystals, china, porcelain, ceramics and also many other materials such as metal, wood, masonry, dry concrete, chipboard, leather, cardboard, most hard plastics, fabrics and rubbers (not suitable for polyethylene, polypropylene, Teflon, expanded polystyrene).

PACKAGING	ITEMS/BOX	CODE	PRICE €
Tubes 2x15ml	6	00677	8.85

ARALDITE STEEL TUBES

2 part extra strong epoxy very fast adhesive - 5 minutes ideal for bonding metals

DESCRIPTION

ARALDITE STEEL fast setting 2 component epoxy adhesive specially formulated for bonding most metals supplied in tubes. It is a strong, long lasting, solvent free adhesive which is water resistant and can be painted or sanded. Sets in 5 minutes.

ADVANTAGES

- Extra strong bonding
- Specially formulated for metals
- Rapid set
- Gray colour
- Does not rust
- Easy application
- Temperature resistant (-30°C - +100°C)
- Humidity resistant
- Sandable and paintable
- Fills uneven breaks
- Withstands rough handling
- 100% solid content
- Solvent free

APPLICATIONS

ARALDITE STEEL bonds most metals such as steel, galvanized steel, cast iron, aluminum, iron, copper and brass. Will also bond non metallic materials such as ceramic, wood and glass.

PACKAGING	ITEMS/BOX	CODE	PRICE €
Tubes 2x15ml	6	00680	8.40

PACKAGING	ITEMS/BOX	CODE	PRICE €
Tubes 20ml	6	00619	4,80

BOSTIK HARD PLASTICS

Extra strong, fast curing, transparent hard plastics adhesive

DESCRIPTION

BOSTIK HARD PLASTICS is a strong, water resistant, clear adhesive designed for bonding most common hard plastics. It bonds rapidly to form a strong, water resistant seal.

ADVANTAGES

- Extra strong bonding
- Rapid set
- Easy application
- Bonds a variety of materials
- Temperature resistant (-20°C - +60°C)
- Humidity resistant

APPLICATIONS

BOSTIK HARD PLASTICS is suitable for bonding PVC-U, ABS and high impact polystyrene to themselves and each other. It has a wide range of uses for repairing household objects. It is also suitable for bonding most clear plastics, wood, metal and leather.

IMPORTANT: Not suitable for polyolefin's e.g. polythene, polypropylene or PTFE. Not for repairing items that hold hot liquids

PACKAGING	ITEMS/BOX	CODE	PRICE €
Tubes 20ml	6	00620	4,80

BOSTIK SOFT PLASTICS

Extra strong, fast curing, transparent soft plastics adhesive

DESCRIPTION

BOSTIK SOFT PLASTICS is a strong, water resistant, clear adhesive designed for bonding most common soft plastics. It bonds rapidly to form a strong, water resistant seal.

ADVANTAGES

- Extra strong bonding
- Rapid set
- Easy application
- Bonds a variety of materials
- Temperature resistant (-20°C - +60°C)
- Water resistant

APPLICATIONS

BOSTIK SOFT PLASTICS is suitable for bonding flexible PVC, polyurethane, natural and sulfochlorinated rubbers. Typical applications include repairing inflatable, plastic raincoats, tents and waders.

IMPORTANT: If using soft plastics adhesive on rubber products, lightly roughen the surface to be repaired – use a fine grade of sandpaper. Not suitable for silicone, EPDM or similar rubbers. BOSTIK SOFT PLASTICS is not suitable for polyolefins e.g. polythene

174 DIY Adhesives

EPOXY PUTTY MARINE

2 component, hand kneadable, marine grade epoxy putty

DESCRIPTION

EPOXY PUTTY MARINE is a 2 component, hand kneadable, epoxy putty that mixes to provide permanent repairs to damp, wet and underwater applications. It may be applied underwater, in either fresh or salt water and will bond tenaciously to substrates such as fibreglass, metal, wood, concrete, ceramics etc. It is supplied in the form of a concentric stick with the curing agent encapsulated in the contrasting colour base material. EPOXY PUTTY MARINE when mixed it sets to a hard, white material.

ADVANTAGES

- Humid and underwater applications
- Extra strong
- Rapid set
- Easy application
- Suitable for a variety of materials
- Temperature resistant (120°C)
- Water resistant
- Sandable, paintable and machinable
- Fills uneven breaks
- Withstands rough handling
- Will not rust
- 100% solid content
- Solvent free

APPLICATIONS

- EPOXY PUTTY MARINE moulds to permanently patch dents, scratches, cuts, gouges and holes in fibreglass, metal and wooden boat decks and hulls, repair fittings, pipes, electrical connections, leaking gasket, non-potable water tanks, tackle box, tubs, battery cases, sinks, toilet basins, spas, hot tubs, pools, and to form custom gaskets.
- EPOXY PUTTY MARINE is ideal for making emergency repairs

EPOXY PUTTY FAST

2 component, hand kneadable, all purpose fast setting epoxy putty - 5 minutes

DESCRIPTION

EPOXY PUTTY STEEL is a 2 component, hand kneadable, non-rusting steel reinforced epoxy putty used to provide fast, permanent repairs to items made of ferrous metal. It is supplied in the form of a concentric stick with the curing agent encapsulated in the contrasting colour base material. EPOXY PUTTY when mixed it sets to a hard, dark grey material.

ADVANTAGES

- Extra strong
- Rapid set
- Easy application
- Suitable for a variety of materials
- Temperature resistant (120°C)
- Water resistant
- Sandable, paintable and machinable
- Fills uneven breaks
- Withstands rough handling
- Will not rust
- 100% solid content
- Solvent free

APPLICATIONS

- EPOXY PUTTY STEEL will repair holes, cracks and threads in castings, pipes, tanks, radiators and tools, and can be used to hold fixtures and signs, to make models and prototypes, to form nuts in situ and to lock threads.
- EPOXY PUTTY STEEL bonds items made of ferrous metal as well as stone, wood, marble and concrete.

EASY TACK

Permanently plastic, reusable adhesive

DESCRIPTION

EASY TACK is a permanently plastic, reusable adhesive. Clean, safe and easy to use, EASY TACK provides an ideal alternative to drawing pins and sticky tapes with hundreds of uses around the home, office or school environment. It is supplied in the form of rectangular slabs between sheets of release paper and packed in individual wallets. It is clean and economical in use.

ADVANTAGES

- Does not stain
- Multi-purpose
- Reusable
- Non toxic

APPLICATIONS

- EASY TACK holds up posters, cards, children's paintings, party decorations, maps, messages, etc.
- EASY TACK holds telephones and calculators to desks, ornaments to shelves, photos in albums, screws to screwdrivers, model parts during painting, etc.
- EASY TACK holds safe pins, keys, screws, etc.
- EASY TACK holds flowers and candles in place for table and flower arrangements.
- EASY TACK cleans fluff from fabric and dirt from typewriters, model railway tracks, etc.
- EASY TACK may be rolled and manipulated to make 3 dimensional artistic "models"
- EASY TACK is suggested for use on non – porous surfaces: - vinyl coated wallpapers, painted surfaces, glass, metal etc.

176 DIY Adhesives

BOSTIK BLU TACK

The original reusable adhesive

DESCRIPTION

BOSTIK BLU TACK is the original permanently plastic, reusable adhesive. Clean, safe and easy to use, BLU TACK provides an ideal alternative to drawing pins and sticky tapes with hundreds of uses around the home, office or school environment. It is supplied in the form of rectangular slabs between sheets of release paper and packed in individual wallets. It is clean and economical in use.

ADVANTAGES

- Original product
- Does not stain
- Multi-purpose
- Reusable
- Non toxic

APPLICATIONS

- BLU TACK holds up posters, cards, children's paintings, party decorations, maps, messages, etc.
- BLU TACK holds telephones and calculators to desks, ornaments to shelves, photos in albums, screws to screwdrivers, model parts during painting, etc.

BOSTIK STICK 'N FIX

The original reusable white adhesive

DESCRIPTION

BOSTIK STICK 'N FIX is the original white permanently plastic, reusable adhesive. Clean, safe and easy to use, **STICK 'N FIX** provides an ideal alternative to drawing pins and sticky tapes with hundreds of uses around the home, office or school environment. It is supplied in cut lengths of four strips extruded between release paper and transparent film, packed in individual wallets. It is clean and economical in use.

ADVANTAGES

- Original product
- Does not stain
- Multi-purpose
- Reusable
- Non toxic

APPLICATIONS

- **STICK 'N FIX** holds up posters, cards, children's paintings, party decorations, maps, messages, etc.
- **STICK 'N FIX** holds telephones and calculators to desks, ornaments to shelves, photos in albums, screws to screwdrivers, model parts during painting, etc.
- **STICK 'N FIX** holds safe pins, keys, screws, etc.
- **STICK 'N FIX** holds flowers and candles in place for table and flower arrangements.
- **STICK 'N FIX** cleans fluff from fabric and dirt from typewriters, model railway tracks, etc.
- **STICK 'N FIX** may be rolled and manipulated to make 3 dimensional artistic "models"
- **STICK 'N FIX** is suggested for use on non – porous surfaces: - vinyl coated wallpapers, painted surfaces, glass, metal etc

Cleaners, Lubricants, Humidifiers

178 Cleaners, Lubricants, Humidifiers

CL 13 MOULD CLEANER

Extra strong mould cleaner

DESCRIPTION

CL 13 MOULD CLEANER immediately destroys mould, algae and moss in humid areas. It is easily applied on horizontal and vertical surfaces as well as in difficult places thanks to its practical packaging. It is suitable for interior and exterior use.

ADVANTAGES

- Immediate action in 10 minutes
- Active foam formula
- Protects from mould regrowth

APPLICATIONS

- Cleans mould spots and stains in humid areas such as bathrooms, kitchens, basements, warehouses, garages, cupboards, storage rooms, swimming pools, balconies, flowerpots etc.
- Can be applied on ceramic tiles, tile joints, walls and ceilings

CL 17 OXY CLEAN

Concentrated cleaner suitable for ceramic tiles, tile grouts, stones

DESCRIPTION

OXY CLEAN CL 17 is extra strong concentrated cleaner suitable for ceramic tiles, tile grouts, natural and artificial stones. Removes fast, easily and effectively inorganic deposits such as cement, plaster, joint fillers etc. Cleans accumulated dirt from ageing, pollution, rain and frequent use. Removes persistent stains from oil, coffee, rust, paint etc. Restores the original appearance of surface applied. It is suitable for interior and exterior use.

ADVANTAGES

- Instant action
- Very effective with stagnant stains
- Suitable for many surfaces
- Restores the original appearance of surfaces
- Exterior and interior use

APPLICATIONS

OXY CLEAN CL 17 is suitable for

- All types of absorptive and non-absorptive ceramic tiles such as cotto, terracotta, glazed and enameled tiles, pedestrian and garden cement tiles etc.
- Cement based tile grouts. Restores the original colour of the grout.
- Most types of natural stones such as Pilon and Karystos slates, building stones, decorative stones etc.
- Most types of artificial stones.
- Unpolished mosaic and cement floors
- Horizontal and vertical surfaces such as verandas, yards, garden patios, pedestrians, windowsills, building facades etc.
- It is suitable for interior and exterior use

CL 17 OXY CLEAN is highly recommended prior to the application of waterproofing and protection material WATER BLOCK

CONSUMPTION: 5-8 m²/Lt

CL 22 OXY CLEAN

Concentrated cleaner suitable for all types of unpolished marble

DESCRIPTION

OXY CLEAN CL 22 is extra strong concentrated marble cleaner suitable for all types of unpolished marble. Removes fast, easily and effectively inorganic deposits such as cement, plaster, joint fillers etc. Cleans accumulated dirt from ageing, pollution, rain and frequent use. Removes stagnant stains from oil, coffee, rust, paint etc. Restores the original appearance of marble. It is suitable for interior and exterior use.

ADVANTAGES

- Instant action
- Very effective with stagnant stains
- Suitable for most types of unpolished marbles
- Restores the original appearance of surfaces
- Exterior and interior use

APPLICATIONS

OXY CLEAN CL 22 is suitable for

- All types of popular white unpolished marble such as Dionyssos, Thasos, Veria, Kavala, etc.
- Most types of coloured unpolished marble such as Naoussa, Veria, Ioannina, Volos etc.
- Unpolished granites and granite tiles.
- Unpolished mosaic and cement floors
- Cement based tile and marble grouts.
- Horizontal and vertical surfaces such as verandas, yards, windowsills, building facades etc.

CL 22 OXY CLEAN is highly recommended prior to the application of waterproofing and protection material WATER BLOCK

CONSUMPTION: 5 - 8 m²/Lt

CL 27 GREASE CLEANER

Professional grade, superior grease cleaner

DESCRIPTION

CL 27 GREASE CLEANER is a professional grade, superior grease cleaner that lifts off the toughest dried and baked on grease and removes animal and vegetable fats and food oils.

ADVANTAGES

- Immediate action in 5 minutes
- Active foam formula
- Effective with stubborn stains
- Suitable for many surfaces

APPLICATIONS

- Ideal for barbeques, grills, ovens, kitchen hoods, work tops, cookware and much more. Restores the original look of the surface applied.
- Can be applied on stainless steel, galvanized, cast iron and aluminium surfaces as well as ceramic tiles, bricks, stone, glass and synthetic materials.

CL 32 STRONG ALL PURPOSE CLEANER

Strong concentrated all-purpose cleaner

DESCRIPTION

CL 32 STRONG ALL PURPOSE CLEANER is a strong concentrated all-purpose cleaner for tough stains suitable for professional and household use. Use full strength on hard-to-remove stains or diluted for lighter soiled surfaces. Removes effectively soil and stains from oil, grease, salt, wine, coffee, soot and much more. Suitable for interior and exterior use.

ADVANTAGES

- Extremely strong concentrated formula
- Effective with stubborn stains
- Suitable for many surfaces
- May be used diluted for daily use
- Suitable for professional or household use

APPLICATIONS

Cleans fast and effectively ceramic tiles, marble, mosaic, PVC floors, car and boat engines, car wheels and tires, plastic boats, balconies, flowerpots, sanitary ware, plastic furniture, electrical equipment, work tops, barbecues, walls, wallpaper, carpets and much more. Can be used with pressure washer.

CL 38 TEAK CLEANER

Highly effective cleaner for teak and other types of tropical wood

DESCRIPTION

CL 38 TEAK CLEANER is a highly effective cleaner for teak and other types of tropical wood. Its unique concentrated formula enables easy removal of stains and weathering from exposure to environmental attack. Restores the original appearance of wood. Combine CL 38 TEAK CLEANER with TEAK OIL or DECK OIL to preserve and protect the clean surface.

ADVANTAGES

- High performance cleaning agent
- Highly concentrated
- Restores the original appearance of wood
- Suitable for many types of timber

APPLICATIONS

- It is suitable for garden furniture, garden, pool and boat decks
- It is also suitable for any type of unvarnished wood construction such as pergolas, flower pots, fences etc.
- Can be applied on many types of tropical wood such as teak, iroko, bangirai, merbau, meranti as well as other types of exterior wood such as pine, fir, oregon etc.
- Regular application will help prevent the wood from greying and maintain the original colour and appearance

CL 36 INOX CLEANER

Stainless steel cleaner and polisher

DESCRIPTION

CL 36 INOX CLEANER is a stainless steel cleaner and polisher. Its unique formula enables easy removal of greasy stains, fingerprints, soil, smudges and salt stains while restores surface shine. Protects surfaces with a thin coat.

ADVANTAGES

- Immediate action in 5 minutes
- Very effective with stagnant stains
- Suitable for a wide range of surfaces
- Cleaning and shining action in one easy step

APPLICATIONS

- It is suitable for all common stainless steel surfaces such as elevators, stairs, counter tops, electric appliances, sinks, nobis, rails, accessories etc

CL 24 AIR CONDITIONER CLEANER

Cleaning fluid for air condition units

DESCRIPTION

CL 24 AIR CONDITIONER CLEANER is a cleaning fluid for air condition unit filters and fins. It helps to maintain the high efficiency of the units, while also increasing the life of the air conditioners. Cleans micro-organisms, accumulated atmospheric pollutants, dust, cigarette smoke and pollen, offering a healthy environment. Eliminates unpleasant odors.

ADVANTAGES

- Immediate action
- Clean and pleasant environment
- Ease of use and low application cost
- Maintains high performance of the units
- Environmentally and user friendly

CL 48 HEAVY DUTY HAND CLEANER PASTE

Hand cleaning paste for easy and effective removal of hard stains

DESCRIPTION

CL 48 HEAVY DUTY HAND CLEANER PASTE is a paste for easy and effective hand cleansing of hard stains such as grease, tar, paints, cement, plaster, adhesives, ink, soil, etc. Thanks to the natural orange peel extract, d-Limonene, known for its cleansing action, deeply cleanses the hands and at the same time treats them, leaving them soft, without peeling and unpleasant odors. It does not contain allergens, ammonia, phosphates and petroleum derivatives. Hand cleanser CL 48 HEAVY DUTY HAND CLEANER PASTE is environmentally and user-friendly. No water is required for use.

ADVANTAGES

- Excellent cleaning action
- Deep and at the same time gentle cleaning
- With natural orange peel extract, d-Limonene
- Does not contain allergenic substances
- Does not stick, does not leave unpleasant odors
- No water needed
- Environmental friendly

APPLICATIONS

- Professionals working in car repair, printing houses, constructions (painters, plumbers, etc.), machine shops, shipbuilding repairs, metal structures etc.
- Industries

CL 14 VIT CLEAN

Heavy duty, highly concentrated drain acidic solvent

DESCRIPTION

CL 14 VIT CLEAN is extra strong, heavy duty, highly concentrated drain liquid, for professional use only. It is suitable for all drain and waste lines. Being heavier than water, it flows quickly to the blockage. Within a few minutes it unblocks pipes, sinks, toilets, bathtubs etc. It disintegrates grease, paper, fat, soap, hair, all types of food and organic matter. It is most suitable for emergency use. Will not harm plastic pipes, porcelain and stainless steel.

WARNING: Due to its high acidity extreme caution should be taken in handling the product. Read carefully the instructions for use

ADVANTAGES

- Instant action
- Suitable for emergency use
- Suitable for all drain and waste lines
- Does not harm plastic pipes, porcelain and stainless steel surfaces.
- Professional product

APPLICATIONS

CL 14 VIT CLEAN unblocks rapidly and effectively drains and waste lines in hospitals, hotels, factories, restaurants, houses etc. It is the fastest and cost effective way of unblocking and maintaining drain systems in optimal conditions. The frequent use of CL 14 VIT CLEAN is suggested in order to prevent blockages and unpleasant odours.

CONSUMPTION: 900gr for unblocking sinks, toilets, bathtubs etc.
1800gr for unblocking 10cm diameter drain and waste lines

CL 50 VIT CLEAN

Extra strong heavy duty cesspool and drain solvent

DESCRIPTION

VIT CLEAN CL 15 is an extra strong heavy duty cesspool and drain solvent, for professional use only. It has the most effective and rapid action for unblocking septic tanks, cesspools and waste lines. It disintegrates grease, fat, soap, hair and organic residues. Minimizes significantly the cost of frequent tank emptying and eliminates unpleasant odors by clearing the inner walls of the tank and restoring the porosity of the ground.

ADVANTAGES

- Instant action
- Suitable for septic tanks, cesspools and waste lines.
- Minimizes significantly the cost of frequent tank emptying
- Minimizes significantly unpleasant odors
- Does not harm pipelines, cesspool inner wall building materials and cast iron tank covers.
- Professional product

APPLICATIONS

VIT CLEAN CL 15 is suitable for unblocking cesspools, septic tanks, sewer, waste lines, and drainage fields. It guarantees the optimum function of septic tanks and cesspools. It does not harm pipe lines, cesspool inner wall building materials and cast iron tank covers. It is the most efficient and cost effective way of unblocking and preventing the malfunctioning of cesspools and septic tanks.

PGP CLEAN & FREE

Special acid cleaner, used for the effective removal of alkalis and salts of cement surfaces

DESCRIPTION

PGP CLEAN & FREE is a special acid cleaner, used for the effective neutralization of alkalis of cement surfaces, the removal of concrete's salts and the opening of surface pores. It is particularly recommended for the preparation of structural surfaces prior to the application of waterproofing materials DRYPROOF MASONRY WATERPROOFER and DRYPROOF WATERBASED WATERPROOFER.

ADVANTAGES

- Easy and fast application
- Very effective
- Suitable for interior and exterior use

APPLICATIONS

- Prepares smooth concrete for application of waterproofing materials or painting
- Removes efflorescence (salt-like deposits caused by moisture) from concrete
- Cleans - etches the surface pores
- Cleans mortar from bricks and tiles
- Conditions galvanized surfaces for painting
- Can be applied on concrete, stones, tiles, bricks and galvanized metal

CONSUMPTION: Diluted product in 5Lt of water cleans 30m²

GRAFFITI REMOVER

High performance graffiti remover

DESCRIPTION

TGRAFFITI REMOVER is a high performance graffiti remover for surfaces which have been coated with the ANTIGRAFFITI COATING. It dissolves easily most types of paints without affecting the antigraffiti coating. It is recommended for professional cleaning companies, building managers and property owners. It is also suitable for cleaning coaches and buses, trains, letter-boxes, vending machines etc.

APPLICATIONS

- Removal of graffiti from surfaces treated with ANTIGRAFFITI COATING.
- Cleaning of gloss surfaces such as glass, steel, plexiglas etc.
- Cleaning of vehicle bodies

CONSUMPTION: 3-5 m²/Kg

MINOS WHITE LITHIUM GREASE

White lithium grease suitable for protection & lubrication in moving parts

DESCRIPTION

MINOS WHITE LITHIUM GREASE is high quality white lithium grease used for protection and lubrication. It is ideal for lubrication on moving metal or plastic mechanical parts. It is water repellent and offers protection in all weather conditions. It is also suitable for applications where light colour grease with temperature resistance of 10°C - 150°C is required. .

ADVANTAGES

- Excellent mechanical stability
- Prevents wear from friction
- High viscosity
- Resistance to weather conditions.
- Resistance to light acids and bases
- Anticorrosive capacity
- Moisture resistant
- Easy to use

APPLICATIONS

- Suitable for lubrication in couplings, brakes, hinges, mechanical regulators, springs, cables, etc.
- Excellent for lubrication on plain bearing bearings and pumps where water penetration has reduced lubricating performance.

CONSUMPTION: 1,5 gr/cm

SLIP OIL

Liquid lubricant suitable for protection and lubrication of moving metallic parts

DESCRIPTION

All-purpose liquid lubrication oil suitable for protection and lubrication in moving mechanical parts. Reduces friction and protects from rust, corrosion and humidity. Its precise, easy to use drip spout enables precise application, drop by drop.

ADVANTAGES

- Excellent lubricating properties
- Excellent penetration
- Corrosion protection
- Solvent-free
- Easy application

APPLICATIONS

- It is ideal for lubricating brake linkages, tools, latches, cams, window regulators, locks, hinges, springs, sliding doors and windows, sewing machines, bicycles etc.
- It is ideal for all moving mechanical parts.

HUMI LOCK

Moisture absorber device

DESCRIPTION

HUMI LOCK is a moisture absorber device. It collects the moisture from the air and converts it to water in the container. Combats condensation, damp, mould and bad odours.

ADVANTAGES

- Brings the relative humidity of the room to the normal value of 40%- 60%.
- With regular refill it maintains the humidity at that level.
- Combats condensation, damp, mould and bad odours.
- Easy to use and refill

APPLICATIONS

• It is ideal for spaces locked for a long time, rooms with little or no ventilation such as cellars, basements, garages, store rooms, bathrooms, kitchens cupboards, wardrobes, holiday homes, warehouses, garden houses, boats, caravans etc.

ANTIFREEZE

High quality anti - freeze liquid for closed freezing-heating circuits

DESCRIPTION

ANTIFREEZE is a high quality anti-freeze liquid. Assures complete protection in all kinds of closed freezing-heating circuits, regardless of weather conditions, all throughout the year (-20°C - +106°C).

ADVANTAGES

- Complete anti-freeze and anti-thermal ability
- Antirust protection
- Suitable for all temperatures
- Reduces cleaning and maintenance costs

APPLICATIONS

- Protection of engine radiators as well as solar water heaters
- Protection of all closed freezing-heating circuits, regardless of type of metal (iron, copper, aluminium etc.)
- Protects from rust, corrosion and salt deposits.
- Minimizes the precipitation of metallic oxides.

MINOS COLOR SPRAY

Premium grade fast drying general use decorative acrylic paint spray

DESCRIPTION

MINOS COLOR SPRAY is a high quality multipurpose, fast drying acrylic spray paint. It is easily and evenly applied and creates a tough, hard wearing and resistant to scratches surface. It is water resistant, will not fade or yellow and it protects surfaces from rust. It contains safe to ozone layer propellant.

ADVANTAGES

- Fast drying
- Excellent coverage
- Excellent surface adhesion properties
- Long lasting gloss – UV resistant
- Interior and exterior use
- Weather resistant
- Easy to apply
- Environmentally and user friendly

APPLICATIONS

MINOS COLOR SPRAY is suitable for virtually any surface such as iron, aluminium, glass, masonry, metal, paper, papier Mache, plastic, steel, stone, terracotta, wood etc.

It is suitable for most interior or exterior decorative project

- Home: garden furniture, flower pots, cupboards, radiators and any kind of decorative project.
- Car: wheels, metallic parts etc.
- Motorcycles: tank, handles, covers etc.
- Work: restoration, renovation and protection of bare or painted surfaces

CONSUMPTION: 2-3 m²/400ml

MINOS XD 500

Unique multi-purpose lubricant - corrosion protector - deep penetrating - water displacer spray

DESCRIPTION

MINOS XD 500 is a high performance multi-purpose lubricant – corrosion protector – deep penetrating – water displacement product. Exhibits superior protection and lubrication, prevents rust and corrosion by displacing moisture and leaving behind a thin, clear, protective film. It also releases rusted parts, removes light soils and contaminants.

ADVANTAGES

- Excellent penetrating properties
- Weather resistant
- Moisture repellant
- Effective rust remover
- Corrosion protection
- Easy to use
- Environmentally friendly

APPLICATIONS

MINOS XD 500 has thousands of uses around the house, at work, hobbies etc.

- Loosens and penetrates rusted or stuck bolts and plumbing joints
- Protects metal from rust and corrosion
- Displaces moisture and lubricates just about anything
- Penetrates stuck parts
- Eliminates squeaks
- Cleans bikes & tools, removes grease, lubricates locks, hinges, & all moving parts
- Removes paint, gum, rubber cement, stickers and other adhesives
- Removes dirt, dust, petroleum and water

MINOS 21 ORIGINAL PENETRATING OIL

Highly penetrating, lubricating and rust protecting oil

DESCRIPTION

MINOS 21 ORIGINAL PENETRATING OIL is the first Greek multi use spray that marked the introduction of technical sprays in Greece in 1967. Using the old authentic formulation, we link the past with the present emphasizing the timeless value of the product. MINOS 21 is the most useful multi use chemical tool. It has thousands of applications at home, at work, in hobbies etc.

ADVANTAGES

- Outstanding mechanical stability
- Prevents wear and sticking
- High viscosity
- Excellent penetration
- Resistant to weather influences
- Resistant to weak acids and bases
- Corrosion prevention
- Water-humidity repellent
- Easy to use

APPLICATIONS

MINOS 21 has thousands of uses around the house, at work, hobbies etc.

- Lubricates moving parts such as hinges, wheels, rollers, chains, and gears.
- Penetrates and releases stuck corroded parts like nuts, bolts, valves and locks.
- Protects against rust and corrosion tools, sporting equipment etc.
- Quickly removes corrosion and grease.
- Displaces moisture to restore water flooded equipment such as engines, plugs and power tools

ORIGINAL FORMULA

MINOS WATER BLOCK**High performance water and oil repellent****DESCRIPTION**

MINOS WATER BLOCK is a high performance water and oil repellent transparent coating based on silicone and teflon technology. Creates a protection shield on the surface applied from rain and moisture, daily stains and air pollution. It is suitable for many applications around sports, camping, home, car, boat and industry.

ADVANTAGES

- Excellent protection against water and moisture
- Excellent protection against staining and dirt
- Maintains breathing of the surface applied - it is invisible
- Durable protection
- Dries quickly
- Does not alter the appearance of the surface applied

APPLICATIONS

MINOS WATER BLOCK has thousands of applications at home, at work, in hobbies. It restores waterproofing properties to items that have lost their ability to repel water.

- It is suitable for polyester surfaces, nylon, polypropylene, cotton, leather, fabrics, stones, wood and many other materials
- It is ideal for protection of sports and camping equipment such as jackets, gloves, boots, sleeping bags, tents, umbrellas, backpacks etc.
- protection of covers at home, boat or car.
- Protection of cushions and mattresses of outdoor furniture.
- It is applied according to the desired protection in 2-3 coats

Caution: suitability testing is recommended before application to the entire surface

MINOS FOAM CLEANER

Quick acting, effective upholstery and carpet cleaner

DESCRIPTION

MINOS FOAM CLEANER is a quick acting, effective upholstery and carpet cleaner. The easy to apply cleaning foam, with a subtle odour, removes dirt and stains with a simple application while it freshens the colour of the surface applied..

ADVANTAGES

- Strong action
- Quick dissolving properties
- Leaves no residues
- Easy to use

APPLICATIONS

MINOS FOAM CLEANER gently cleans upholstery and carpets, in vehicles, yachts and houses.

MINOS CLEAR LACK ACRYLIC

Super transparent decorative acrylic varnish for metals, wood, stone, ceramics

DESCRIPTION

CLEAR LACK ACRYLIC is a pure acrylic coating. Offers a fast drying, tough, clear acrylic finish. It is user friendly with a very wide range of applications at work, home, DIY, hobbies. It is suitable for most surfaces including all kinds of wood, metal, stones, paper, plastics, ceramics etc.

ADVANTAGES

- Fast drying
- Good coverage
- Lasting gloss
- Good surface hardness
- Non-fading and UV resistant
- Resistance to water and weather influences
- Resistant to petrol, chemicals
- Wear resistant and scratch free
- Easy to use

APPLICATIONS

- Protection and decoration of arts and crafts
- Protection and finishing of wooden surfaces
- Metal over lacquering
- Waterproofing coating for maps and technical drawings
- Protection and insulation of circuit boards and other electronic components

MINOS CLEAR VARNISH

Transparent fast drying acrylic varnish

DESCRIPTION

MINOS CLEAR VARNISH SPRAY is a pure acrylic coating. Offers a fast drying, tough, clear acrylic finish. It is user friendly with a very wide range of applications at work, home, DIY, hobbies. It is suitable for most surfaces including all kinds of wood, metal, stones, paper, plastics, ceramics etc.

ADVANTAGES

- Fast drying
- Excellent coverage
- Excellent adhesion
- Non-fading lasting gloss -UV resistant
- Resistance to water and weather influences
- Resistant to petrol, chemicals
- Wear resistant and scratch free
- Easy to use

APPLICATIONS

MINOS CLEAR VARNISH SPRAY has hundreds of uses around the house, work, hobbies and DIY projects.

- Suitable for most surfaces such as wood, metal, stone, paper, plastics, ceramics and most painted surfaces.
- It is suitable for coating bare and painted wooden and metal surfaces.
- Ideal for finishing decorative craft projects as well as sealing and protecting electrical contacts and boards.

MINOS ADHESIVE SPRAY

All purpose spray adhesive for permanent bonding

DESCRIPTION

MINOS ADHESIVE SPRAY is an all-purpose spray adhesive that offers exceptionally strong permanent adhesion for a wide range of demanding uses. Dries fast, will not shrink and has excellent humidity and temperature resistance (up to 70°C). Finds considerable use in the furniture, flooring, and automotive industries as well as in many DIY applications.

ADVANTAGES

- Excellent adhesion
- Fast tack
- Adheres to both porous and non-porous materials
- Humidity resistance
- Temperature resistance (up to 70°C).
- Won't bleed through - surfaces remain unstained
- Suitable to glue large surfaces
- Suitable for permanent or temporary bonding
- Will not shrink
- Easy to use

APPLICATIONS

- MINOS ADHESIVE SPRAY finds considerable use in the furniture and automotive industries flooring applications such as bonding wall to wall carpets, plastic – PVC floor coverings etc. It is suitable for bonding foam to a wide range of surfaces.
- Ideal for use in repair and non-structural applications where an exceptionally high strength bond is required. Should not be used on surfaces where temperatures may exceed 800C.
- Bonds the following substrates: paper, cardboard, metal, fabric, most plastics, leather, rubber, felt, polyurethane foam, cork, foam rubber, foil, wood etc.

MINOS METALLIC PAINT

Premium grade fast drying metallic effect paint

DESCRIPTION

MINOS METALLIC PAINTS are premium grade metallic effect paints suitable for a wide range of materials. Metallic paints come in five popular colours. They offer an ultra-modern reflective metallic finish on virtually any surface. They have several decoration and craft applications.

ADVANTAGES

- Metallic shine
- Excellent coverage
- Long-term durability
- Excellent adhesion
- Excellent flow, smooth surface
- Fast-drying
- Corrosion protection
- Smear and scratch proof
- Protection against weather conditions
- Easy to use
- Environmentally friendly

APPLICATIONS

- MINOS METALLIC PAINTS have several uses such as paint and decoration of picture frames, bicycles, festive – Christmas ornaments and many DIY, art and craft projects.
- They are suitable for wood, metal, glass, stone and various types of plastic.

MINOS SMALTO

Premium grade fast drying electrical appliances white paint

DESCRIPTION

MINOS SMALTO is a specially formulated high quality acrylic spray paint that can be used on most metal electric appliances. It provides a quick drying, long lasting finish that can put life back into old and tired kitchen appliances. The finish obtained is both durable and professional. It is resistant to scratches, stains, ageing and durable warmth.

ADVANTAGES

- Excellent coverage
- Long term durability
- Excellent adhesion
- Excellent flow, smooth surface
- Fast-drying
- Durable colour and gloss retention
- Corrosion protection
- Scratch and bump proof
- Excellent resistance to continuous heat
- Easy to apply
- Environmentally friendly

APPLICATIONS

- Ideal to refresh, restore and repair damaged or tired white electrical appliances and other metal surfaces around the house such as ovens, refrigerators, washing machines, dishwashers, water heaters etc.
- Not suitable for use on sinks, cookers or hobs.

MINOS RADIATOR PAINT

Premium grade fast drying acrylic based radiator paint

DESCRIPTION

MINOS RADIATOR PAINT is a specially formulated product to make painting radiators quick and easy. The finish obtained is both durable and professional. It is resistant to durable warmth. It is ideal for renovating and repair of radiators. To improve adhesion and for long-lasting durability of the paint, we recommend to prime the radiators with MINOS UNIVERSAL PRIMER.

ADVANTAGES

- Excellent coverage and filling power
- Long-term durability
- Excellent adhesion
- Excellent flow, smooth surface
- Fast-drying
- Durable colour- and gloss retention
- Corrosion protection
- Scratch and bump proof
- Excellent resistance to continuous heat
- Environmentally friendly

APPLICATIONS

- Ideal to refresh, restore and repair damaged or deteriorated radiator surfaces, hot water tanks, heating elements, warm water pipes and other metal surfaces.
- Not suitable for use on stoves or hobs.

MINOS FLUORESCENT PAINT

Premium grade fast drying fluorescent paint with special reflective ingredients

DESCRIPTION

MINOS FLUORESCENT PAINTS are premium quality paints with special fluorescent pigments that glow in the dark. They ensure instant visibility and are ideal for identification and safety as well as decorative and craft projects. They can be used on both interior and exterior surfaces and on a wide range of materials.

ADVANTAGES

- Bright glow colours
- Excellent coverage
- Long-term durability
- Excellent adhesion
- Excellent flow, smooth surface
- Fast-drying
- Corrosion protection
- Scratch and bump proof
- Protection against weather conditions
- Easy to use

APPLICATIONS

- MINOS FLUORESCENT PAINTS are ideal for identification and safety in fire extinguishing vehicles and pumps, street signs, bicycles, ambulances, danger signs as well as decorative, DIY and craft projects.
- They are suitable for a wide range of materials such as wood, metal, glass, stone, ceramics and various types of plastic.

MINOS UNIVERSAL PRIMER

Multi purpose, fast drying, hard wearing anti - corrosive primer

DESCRIPTION

MINOS UNIVERSAL PRIMER is a premium grade, fast drying, hard wearing general use primer. Offers rust protection to metal surfaces. Fills imperfections of the substrate and improves adhesion and appearance of topcoat ensuring long-lasting durability of the painting. It is suitable for most surfaces and is compatible with most final coatings (alkyd, nitro, acrylic etc).

ADVANTAGES

- Excellent coverage and filling power
- Universal – compatible to all common surfaces
- Long term durability
- Excellent adhesion
- Excellent flow, smooth surface
- Fast-drying
- Corrosion protection
- Scratch and bump proof
- Environmentally friendly

APPLICATIONS

- Ideal to prime surfaces to ensure a perfect finish and a long lasting corrosion protection. It is suitable for iron, glass, steel, stone, terracotta, wood etc.
- Ideal for priming common plastics to ensure adhesion of topcoat

MINOS PLASTIC & MULTI SURFACE PRIMER

Specially formulated, high quality, super strong primer for plastic surfaces

DESCRIPTION

PLASTIC & MULTI SURFACE PRIMER is a specially formulated high quality, super strong primer for plastic surfaces. It presents excellent surface adhesion properties and prepares surfaces for painting with most topcoats. It is also suitable for aluminium, galvanized and inox surfaces. Dries fast, corrects imperfections of the substrate and improves adhesion and appearance of topcoat. Can be recoated with most lacquers and enamels such as alkyd, nitro, acrylic etc (suitability test is recommended).

ADVANTAGES

- Excellent adhesion properties
- Guarantees excellent application of topcoat
- Smooth finish
- Excellent coverage
- Fast drying
- Interior and exterior use
- Environmentally friendly

APPLICATIONS

- Priming plastic surfaces prior to the application of the topcoat, ensuring excellent adhesion of the paint. It is suitable for most types of polypropylene, polystyrene, vinyl, fiberglass, PVC etc.
- It is ideal for priming aluminium, galvanized and inox surfaces, ensuring excellent adhesion of the topcoat.

MINOS FIRE COAT SPRAY

Fast drying, durable, high temperature paint 650°C

DESCRIPTION

MINOS FIRE COAT is premium quality, durable, high temperature paint suitable for temperatures up to 650°C. MINOS FIRE COAT has a heat curing formula that once cured, forms a hard, long lasting finish. Suitable for any surface exposed to very high heat. It is ideal for decoration, protection, renovation and repair applications.

ADVANTAGES

- High temperature resistance
- Excellent coverage and filling power
- Long term durability
- Excellent adhesion
- Excellent flow, smooth surface
- Fast-drying
- Durable colour
- Corrosion protection
- Will not burn, chip or flake
- Easy to use

APPLICATIONS

- MINOS FIRE COAT is ideal for priming, protection, renovation and repair applications.
- It is suitable for engine and exhaust - system parts, oven pipes, chimneys, barbeques and DIY projects around the house.

MINOS CONTACT CLEANER

Fast drying cleaner suitable for cleaning and degreasing electrical contacts

DESCRIPTION

MINOS CONTACT CLEANER is highly penetrating, fast drying cleaner suitable for cleaning and degreasing electrical contacts. Loosens dirt, grease and impurities. Prevents and removes faults caused by moisture. It is electrically neutral and totally residue-free. Frequent use guarantees the optimum operation of electrical contacts and installations.

ADVANTAGES

- Excellent penetration
- Strong cleaning action
- High dissolving properties
- Leaves no residue
- Neutral non-conductive
- Non-corrosive
- Water-humidity repellent
- Prevents wearing
- Easy to use

APPLICATIONS

Suitable for cleaning and degreasing electrical contacts, cables, switches, batteries, circuit board switches, etc.

NOT SUITABLE FOR APPLICATIONS WITH DANGER OF SPARKS

MINOS SILICONE SPRAY

Premium grade lubricant based on silicones suitable for lubrication, protection and insulation

DESCRIPTION

MINOS SILICONE SPRAY is a multi-purpose, colorless silicone-based lubricant suitable for lubrication, waterproofing and protection of plastic, rubber and metal parts. Forms a transparent protective film that eliminates squeaks and protects surfaces from humidity and weather conditions. Suitable for use on most materials such as metals, plastics, wood etc.

ADVANTAGES

- Excellent penetration
- Water-repellent
- Resistant to weather influences
- High heat resistant
- Prevents freezing and drying out of rubber parts
- Prevents creaking and squeaking of plastic parts
- Easy to apply
- Environmentally friendly

APPLICATIONS

MINOS SILICONE SPRAY has thousands of uses around the house, at work, hobbies etc.

- Mould releasing and lubrication in the automotive, clothing and furniture industries where the clean, low toxicity lubrication properties of silicone are ideal.
- Ideal for waterproofing surfaces such as camping accessories (tents, umbrellas) marine parts, boats etc.
- Great for use on belts, linkages, pulleys, valves, slide conveyors, guide rails, tools, locks, doors, hinges, and more.
- Lubrication and protection for dashboards, leatherette and rubber parts.

MINOS ZINC SHEEN SPRAY

Premium grade, fast drying galvanizing primer - paint rich in pure zinc dust

DESCRIPTION

MINOS ZINC SHEEN SPRAY is a rich in zinc dust acrylic galvanizing primer-paint. It gives high quality and long-lasting anticorrosive protection. It is designed for the repair of pre-galvanized steel surfaces and the cathodic protection of metals. Ideal for use in production, maintenance and construction industries. It offers genuine cathodic protection on metals even under acidic, alkaline and high humidity environment.

ADVANTAGES

- Outstanding corrosion prevention
- Fast drying
- Excellent filling properties
- Highly resistant to petrol, chemicals and weather influences
- Excellent adhesion properties
- Excellent UV resistance
- Contains specially modified zinc to match galvanized surfaces

APPLICATIONS

- Suitable for metallic surfaces such as pumps, pipes, rails and most steel surfaces.
- Suitable for pre-galvanized materials such as water tanks, door – window galvanized frames, metal constructions, automotive and marine parts.

MINOS WHITE LITHIUM GREASE SPRAY

Premium grade sprayable white lithium grease suitable for lubrication and protection in moving parts

DESCRIPTION

MINOS WHITE LITHIUM GREASE SPRAY is premium grade lithium grease suitable for protection and lubrication in moving mechanical parts. It is water repellent and exhibits excellent resistance in weather conditions. It has an operating temperature range of 10°C -150°C. It finds particular use where for visual reasons a light colour grease is desirable.

ADVANTAGES

- Outstanding mechanical stability
- Prevents wear and sticking
- High viscosity
- Resistant to weather influences
- Resistant to weak acids and bases
- Corrosion prevention
- Water-humidity repellent
- Easy to use

APPLICATIONS

- Ideal for lubricating brake linkages, latches, cams, window regulators, hinges, springs, wires, cables etc.
- It can be used in anti-friction, plain bearings and pumping equipment where the ingress of water has previously reduced lubrication effectiveness.

220 Minos TECH Technical

MINOS ASPHALT SEAL

Fast drying, durable, elastic bitumen coating

DESCRIPTION

MINOS ASPHALT SEAL is a durable elastic bitumen coating suitable for sealing and protecting various surfaces. Dries fast, it is resistant to extreme weather effects and offers excellent rust prevention. Suitable for sealing, insulation and protection.

ADVANTAGES

- Excellent corrosion protection
- Fast drying
- Excellent adhesion properties
- Long-lasting elasticity
- Water-repellent
- No drips on vertical surfaces
- Resistant to weather influences
- Resistant to weak acids and alkalines
- Easy to use

APPLICATIONS

Suitable for sealing car and metal cavities, bitumen and special roof and gutter insulation, wooden boats, wooden electricity pillars etc.

MINOS WHEEL PAINT

Premium grade, fast drying, metallized wheel paint

DESCRIPTION

MINOS WHEEL PAINT is a premium grade metallized paint specially formulated to repair, refresh and renovate metal wheels. Dries fast and provides a tough, long lasting finish that resists scratches and nicks, and will not tarnish, weather or rust.

ADVANTAGES

- Metallic shine
- Excellent coverage
- Dries fast
- Durable finish resists dust and chemicals
- Restores to the original wheel appearance
- Resists cracking, flaking, peeling
- Easy to use

APPLICATIONS

MINOS WHEEL PAINT is suitable for repairing, refreshing and renovating metal wheels, hubcaps, auto trims, motorcycles, bicycles and other metal surfaces.

MINOS CHAIN LUBRICANT

Premium grade sprayable molybdenum grease MoS₂ suitable for lubrication and protection in moving parts

DESCRIPTION

MINOS CHAIN LUBRICANT is a premium grade molybdenum grease designed to lubricate and protect moving metallic parts such as chains, cogwheels, gears and machinery. Protects metal parts and mechanisms from humidity and corrosion. Highly resistant to friction up to 200°C. Ideal for heavy duty applications throughout industry, automotive and marine sectors.

ADVANTAGES

- Premium grade grease
- Outstanding mechanical stability
- Prevents wear and sticking
- High viscosity
- Resistant to weather influences
- Resistant to weak acids and bases
- Corrosion prevention
- Water-humidity repellent
- Easy to use

APPLICATIONS

- Ideal for lubricating chains, cogwheels, gears and machinery
- Suitable for all kinds of moving mechanical parts when a premium grease is required

MINOS BRAKE & METAL CLEANER

Special brake & metal cleaner

DESCRIPTION

MINOS BRAKE & METAL CLEANER is a quick acting special cleaner with high dissolving properties suitable for drum brakes, disk brakes, brake linings, brake calipers, clutch, gears and other components. Cleans soot, grease, brake dust, brake fluid build-up and oily residues. Prevents squeaking brakes and clutch slipping. Cleans dirt from metal parts and bare metal surfaces.

ADVANTAGES

- Ensures good performance of brakes
- Extra strong dissolving action
- Leaves no residue
- Easy to use

APPLICATIONS

- Suitable for automobiles, vans, trucks, buses, trailers, motorcycles etc.
- Suitable for cleaning burners, lift equipment, machinery, metal parts and bare metal surfaces.
- It penetrates difficult blocked points with old deposits of dirt and grease.
- Stops brake squeaks and clutch slips.

PACKAGING	ITEMS/BOX	CODE	PRICE €
400ml	6	9234	4.65

MINOS CARBURETOR CLEANER

Powerful carburettor, injection, valve, and metallic cleaner

DESCRIPTION

MINOS CARBURETOR CLEANER is a powerful carburettor, injection, valve, and metallic cleaner. It cleans oxidation residues and sediments and reduces deposition by restoring engine performance and reducing fuel consumption. It directly dissolves deposits of coal, mud, grease, grease, varnish and dirt from the carburettor valves, flaps, plates and cylinder. Forms a very thin layer that protects against corrosion on bare metal surfaces.

ADVANTAGES

- Resets the maximum engine power
- Improves the operation of components with moving parts and in particular fueling systems
- Direct dissolving action
- Leaves no residue
- Easy to use

APPLICATIONS

- Cleaning the body and all points of the carburetor, injection, valves and metal parts. It penetrates difficultly blocked points
- Cleaning the entrance of the air, all entry points and the valves. It is important to keep the vital parts moving free from deposits so as to maintain a smooth flow of air into the system. This is vital because even a small roughness of the surface from deposits can prevent smooth operation and cause power losses
- It is also suitable for cleaning metal surfaces from dirt and grease residues

MASKING TAPES

DESCRIPTION

Mercola's Masking tapes are made of crepe paper coated with rubber adhesive. It is the most useful tool for professional and DIY painters ensuring razor-sharp edges. It is perfectly suitable for taping off long, straight lines and slight curves and adheres to both smooth and slightly rough surfaces. Can be left for up to 3 days without leaving a residue.

ADVANTAGES

- Instant adhesion to many surfaces
- Controlled unwind from the roll for ease of use and reduced waste
- Easy tearing by hand
- Crepe backing conforms and seals around corners
- Temperature resistance of up to 80°C
- Does not leave a surface residue

APPLICATIONS

- Interior paint masking
- Holding and bundling for a wide variety of materials

- Σήμανση καλωδίων • Κάλυψη αιχμηρών ακρών
- Στερέωση προστατευτικών επικαλύψεων • Εφαρμόζονται σε τούβλα και ξύλα
- Εφαρμογή στην πλινθοδομή και την ξυλεία • Σφράγιση κάδων και βαρελιών
- Κάθε εργασία στερέωσης, σφράγισης και συσκευασίας • Σήμανση δαπέδων

ISOMIX FIBRE TAPE

ΠΕΡΙΓΡΑΦΗ

Η **ISOMIX FIBRE TAPE** είναι αυτοκόλλητη δικτυωτή υαλοταινία fiberglass κατάλληλη για αρμολόγηση γυψοσανίδων και ενίσχυση σοβάδων και τσιμεντοκονιών που κινδυνεύουν από ρηγματώσεις. Η ειδική επικάλυψη του πλέγματος εξασφαλίζει εξαιρετική σταθερότητα, αντοχή στη διάτμηση και προστασία σε αλκαλικά περιβάλλοντα όπως σοβάδων και τσιμεντοκονιών. Χρώμα λευκό, άνοιγμα καρέ: 3mm x 3mm.

ΠΛΕΟΝΕΚΤΗΜΑΤΑ

- Αποφυγή ρωγμών
- Βελτιώνει την αντοχή των επιχρισμάτων - στόκων
- Εξασφαλίζει ανθεκτικότητα στο χρόνο
- Μεγάλη αντοχή στις αλλαγές της θερμοκρασίας
- Σταθερότητα πλέγματος
- Αντοχή στη διάτμηση και ελαστικότητα
- Έχει ειδική επικάλυψη για αντοχή σε αλκαλικό περιβάλλον

ΕΦΑΡΜΟΓΕΣ

- Σταθεροποίηση και αποφυγή ρηγματώσεων σε εργασίες αρμολόγησης γυψοσανίδων
- Καλύπτει αρμούς, ρωγμές, τρύπες, ανοίγματα κλπ.
- Εφαρμόζεται σε συνδυασμό με το ISOMIX ARMOGIPS ή με το JOINT FILLER
- Εσωτερικής & εξωτερικής χρήσης

Εταιρική Κοινωνική Ευθύνη

Εταιρική Κοινωνική Ευθύνη

Η Εταιρική Κοινωνική Ευθύνη αποτελεί μια από τις βασικές προτεραιότητες της εταιρείας μας και μία από τις βασικές αξίες μας. Στο πλαίσιο αυτό θεωρούμε δέσμευσή μας να εφαρμόζουμε προγράμματα κοινωνικής προσφοράς.

Πιστεύουμε στους ανθρώπους μας. Οι άνθρωποι μας είναι η κινητήριος δύναμη μας. Βασίζουμε τη πολιτική μας πάνω σε αρχές όπως η τιμιότητα, το ήθος, η ειλικρίνεια και ο αμοιβαίος σεβασμός.

Δημιουργούμε για τους συνεργάτες μας ένα ασφαλές και υγιές εργασιακό περιβάλλον όπου υποστηρίζουμε τη δημιουργικότητα, τη διαφορετικότητα, την καινοτομία, την υπευθυνότητα.

Οι αξίες μας αντικατοπτρίζονται στην ποιότητα των σχέσεων μας. Σκεφτόμαστε και ενεργούμε με ακεραιότητα και σεβασμό. Σεβόμαστε τους συνεργάτες μας, τους πελάτες μας και τους προμηθευτές μας. Η εταιρεία μας διοικείται με υψηλά ηθικά πρότυπα. Ενεργούμε και λειτουργούμε σύμφωνα με την Ελληνική και την Ευρωπαϊκή νομοθεσία. Εφαρμόζουμε τα πρότυπα ασφαλείας της Ευρωπαϊκής Ένωσης για την προστασία του περιβάλλοντος και την ασφάλεια των συνεργατών μας. Εξασφαλίζουμε ποιότητα και ασφάλεια των προϊόντων μας για τους πελάτες μας και τους τελικούς χρήστες.

Θεωρούμε ότι σε αυτήν τη δύσκολη συγκυρία για τη χώρα μας, η εταιρική υπευθυνότητα είναι καθοριστική για να μπορέσει η χώρα μας να αντεπεξέλθει στα νέα δεδομένα που έχουν διαμορφωθεί. Έχοντας αυτό ως γνώμονα μας και αντιλαμβανόμενοι την προσπάθεια που όλοι μας οφείλουμε να κάνουμε, συμβάλλουμε με τον καλύτερο δυνατό τρόπο σε διάφορους τομείς δράσης.

Κοινωνική Συμβολή

Η **ENOCHEM A.E.** συμβάλλει με οικονομικά και υλικά μέσα στην ενίσχυση ατόμων με ανάγκες και κοινωνικών φορέων, υποστηρίζοντας το πολύτιμο έργο τους. Σε ειδικές περιπτώσεις αναλαμβάνει επισκευές σε κτιριακές εγκαταστάσεις υποβαθμισμένων κατοικιών ανθρώπων με χαμηλά εισοδήματα και ειδικές ανάγκες.

Η **ENOCHEM A.E.** προσπαθεί με κάθε τρόπο να συμβάλλει στην ανάπτυξη των θέσεων εργασίας, αξιοποιώντας νέους και παλαιούς εργαζόμενους, προσφέροντας ίσως από τα πλέον σημαντικά εργαλεία ζωής, την ίδια την δουλειά. Μέσα στην δύσκολη αυτή εποχή η εταιρεία έχει αυξήσει σχεδόν κατά 50% τις θέσεις εργασίας.

Η **ENOCHEM A.E.** υποστηρίζει κάθε χρόνο το έργο του ραδιοφωνικού σταθμού της Πειραιϊκής Εκκλησίας, ο οποίος με την εμβέλεια του από Καναδά μέχρι Αυστραλία και σε όλη την Ελλάδα, προσφέρει ψυχωφελές έργο μοναδικής πνευματικής ποιότητας, σε ανθρώπους που ταλαιπωρούνται από οικονομική δυσπραγία και άλλα προσωπικά προβλήματα.

Επίσης η εταιρεία μας υποστηρίζει τις εξής μη κερδοσκοπικές οργανώσεις

‘Φλογα’ (σύλλογος γονιών παιδιών με νεοπλασματική ασθένεια)

‘Γιατροί Χωρίς Σύνορα’ (Médecins Sans Frontières/MSF) (διεθνής, ανεξάρτητη, ιατρική ανθρωπιστική οργάνωση που παρέχει ιατρική φροντίδα σε ανθρώπους αποκλεισμένους από την υγειονομική περίθαλψη, σε θύματα βίας, φυσικών καταστροφών ή ενόπλων συγκρούσεων)

‘Σύλλογος Συμπαράστασης Κρατουμένων Ονήσιμος’ (σύλλογος φροντίδας για την κάλυψη των αναγκών των άπορων κρατουμένων, των οικογενειών τους αλλά και των αποφυλακισμένων)

‘Πανελλήνια Ένωση Φίλων Πολυτέκνων’ (σύλλογος συμπαράστασης των απόρων κυρίως υπερπολύτεκνων οικογενειών)

‘Σύλλογος Εθελοντικής Διακονίας Ασθενών’ (κοινωνικές, φιλανθρωπικές σωματείο συμπαράστασης ασθενών νοσηλευτικών ιδρυμάτων)

‘Διορθόδοξο Κέντρο Πορευθέντες’ (συνλογική προσπάθεια υποστήριξης της Ορθόδοξης Ιεραποστολής σε όλο τον κόσμο)

Άστεγους του Δήμου Φυλής με αγορές τροφίμων και αγαθών.

Την Εκτενή Γκάμα των Προϊόντων μας

Με περισσότερους από 1500 κωδικούς, τα προϊόντα μας θα καλύψουν ακόμη και τις πιο απαιτητικές ανάγκες των επαγγελματιών και DIY καταναλωτών.

Αναπτύσσουμε συνεχώς νέα, πιο έξυπνα, πιο εμπορεύσιμα και φιλικότερα προς το περιβάλλον & τον χρήστη προϊόντα.

Τα Καινοτόμα Προϊόντα μας

Την Εξαιρετική Σχέση Ποιότητας - Τιμής

Βαδίζουμε μπροστά από τον ανταγωνισμό, εξασφαλίζοντας ανταγωνιστικές τιμές χωρίς κανένα συμβιβασμό ως προς την ποιότητα των προϊόντων μας.

Τα brands της ENOCHEM Α.Ε., με μακροχρόνια παρουσία στο χώρο, βασίζουν τη φήμη και αναγνωρισιμότητα τους στη θετική εμπειρία, την εμπιστοσύνη και την προτίμηση του επαγγελματία και DIY καταναλωτή.

Το Branding

Την Τεχνική Υποστήριξη Πριν & Μετά την Πώληση

- Βοηθάμε τους πελάτες μας στην επιλογή των προϊόντων τους
- Προσφέρουμε τη βαθιά γνώση των προϊόντων μας και το κατάλληλο υποστηρικτικό υλικό
- Θέλουμε να είμαστε σίγουροι ότι τα προϊόντα μας εφαρμόζονται σωστά
- Παρέχουμε τεχνική υποστήριξη κατά τη διάρκεια της εφαρμογής
- Επιδιώκουμε τη γνώμη των πελατών μας και των τελικών καταναλωτών μετά την εφαρμογή
- Προσφέρουμε λύσεις σε δύσκολα έργα

Για εμάς, οι ανάγκες των πελατών μας έρχονται πάντα πρώτες. Η πελατοκεντρική φιλοσοφία της εταιρείας μας διασφαλίζει την εξυπηρέτηση και την επιτυχημένη ικανοποίηση των πελατών μας σε όλα τα επίπεδα της εταιρείας μας.

Το Ανθρώπινο Δυναμικό

Την Ιδανική Τοποθεσία

Η ιδανική τοποθεσία της γραμμής παραγωγής μας και των υπερσύγχρονων αποθηκών μας στην περιοχή του Ασπροπύργου Αττικής, εξασφαλίζει εύκολη πρόσβαση στο λιμάνι του Πειραιά και σε όλες τις μεταφορικές εταιρείες που εξυπηρετούν τις εθνικές και διεθνείς μεταφορές.

Δημιουργούμε μακροπρόθεσμες και επιτυχημένες συνεργασίες. Η ανάπτυξη της εταιρείας μας βασίζεται στην στρατηγική επιλογή των συνεργατών μας. Μαζί με τους συνεργάτες μας ανακαλύπτουμε, εξελίσσουμε και προσδίδουμε υψηλή προστιθέμενη αξία και βελτιωμένα περιθώρια κέρδους στη συνεργασία μας.

Τη Σχέση Εμπιστοσύνης

Οι τιμές του τιμοκαταλόγου επιβαρύνονται με τον αναλογούντα Φ.Π.Α.

II. Οι παραγγελίες αφορούν ακέραιο αριθμό χαρτοκιβωτίων.

III. Για αποστολές στην Ελλάδα εκτός νομού Αττικής τα εμπορεύματα παραδίδονται σε πρακτορείο αποστολών επιλογής του πελάτη και ταξιδεύουν με αποκλειστική ευθύνη του πελάτη.

IV. Η εταιρεία διατηρεί δικαίωμα αλλαγής του παρόντος τιμοκαταλόγου χωρίς προειδοποίηση.

V. Η εταιρεία διατηρεί δικαίωμα κατάργησης προϊόντων χωρίς προειδοποίηση.

VI. Ο παρών τιμοκατάλογος αναιρεί κάθε προηγούμενο.

ΣΗΜΕΙΩΣΕΙΣ

1. Η πωλήτρια εταιρεία πραγματοποιεί τις παραδόσεις εντός Νομού Αττικής στον συντομότερο δυνατό χρόνο και με μεταφορικά μέσα επιλογής της. Εκτός του Νομού Αττικής οι παραδόσεις γίνονται με μεταφορικά μέσα επιλογής του πελάτη και χρέωσής του.

2. Τα εμπορεύματα παραδίδονται από την εταιρεία στη μεταφορική εταιρεία σε άριστη κατάσταση και σε επιμελημένη συσκευασία.

Οι αποστολές των εμπορευμάτων γίνονται με ευθύνη του πελάτη και ο κάθε παραλήπτης οφείλει να επαληθεύσει την ποιότητα και την ποσότητα κάθε αποστολής τη στιγμή της παράδοσης.

Για οποιαδήποτε διαφορά οφείλει να ενημερώσει άμεσα την πωλήτρια εταιρεία. Οι πελάτες έχουν την ευθύνη επιλογής του μεταφορέα και τυχόν ασφάλισης των εμπορευμάτων. Ποσοτικές διαφορές ή ποιοτικές αλλοιώσεις που αναφέρονται στην πωλήτρια εταιρεία καθυστερημένα και όχι σύμφωνα με την πολιτική επιστροφών, δεν αναγνωρίζονται.

3. Η πωλήτρια εταιρεία φροντίζει για την συμμόρφωση όλων των πωλουμένων ειδών στην ισχύουσα νομοθεσία και συνοδεύει τα είδη με τα σχετικά έντυπα. Ο πελάτης δηλώνει ότι γνωρίζει τα τεχνικά χαρακτηριστικά των ειδών, την ασφαλή αποθήκευση, χρήση και λειτουργία αυτών και σε καμία περίπτωση δεν χρησιμοποιεί τα αγορασθέντα είδη αν διαπιστώσει ελάττωμα ή παράλειψη στα ανωτέρω.

4. Σε καμία περίπτωση η πωλήτρια δεν είναι υπεύθυνη για ζημιές που ενδεχομένως προκληθούν σε ανθρώπους ή πράγματα από τη χρήση των αγορασθέντων ειδών ή για άλλες ζημιές οποιουδήποτε είδους που προκληθούν ή πηγάζουν από την κακή λειτουργία, πλημμελή χρήση ή αντικατάσταση των αγορασθέντων ειδών.

5. Για κάθε διαφορά, αρμόδια είναι τα Δικαστήρια Αθηνών.

ΕΠΙΣΤΡΟΦΕΣ ΕΜΠΟΡΕΥΜΑΤΩΝ

1. Κάθε επιστροφή εμπορευμάτων πρέπει να προαναγγέλλεται στην εταιρεία προκειμένου να εγκρίνεται γραπτά από αυτή. Επιστροφή που δεν έχει αναγγελθεί και συνεπώς δεν έχει εγκριθεί, δεν θα παραλαμβάνεται (με κίνδυνο απώλειας στα πρακτορεία κλπ.) και δεν πιστώνεται η αξία τους.

2. Η κατάσταση των εμπορευμάτων που επιστρέφονται πρέπει να είναι άριστη (αχρησιμοποίητα, καθαρά, καλοδιατηρημένα και μέσα στην αρχική τους συσκευασία). Να έχουν αγοραστεί έως ένα μήνα πριν από την επιστροφή και να εξακολουθούν να αποτελούν αντικείμενο ενδιαφέροντος για την εταιρεία μας.

3. Εφόσον υπάρχει γραπτή έγκριση, η διαδικασία που ακολουθείται είναι η εξής: εκδίδεται Δελτίο Αποστολής, από τον πελάτη που επιστρέφει τα εμπορεύματα, με ταυτόχρονη αναγραφή στο Δελτίο Αποστολής του αριθμού του αντίστοιχου τιμολογίου αγοράς, της ημερομηνίας του καθώς και του σκοπού της επιστροφής.

4. Χρεώνονται τα καταβληθέντα από την πωλήτρια εταιρεία μεταφορικά και έξοδα επιστροφής.

5. Αν τα εμπορεύματα επιστρέφονται εξ αιτίας λάθους στην εκτέλεση της παραγγελίας εκ μέρους της πωλήτριας εταιρείας, εννοείται ότι δεν ισχύουν οι χρεώσεις, αλλά η διαδικασία παραμένει η ίδια.
